Journal of Neurology

Official Journal
of the European Neurological Society

Organ of the Deutsche Gesellschaft
für Neurologie

The Journal of Neurology is an international journal which officially represents the European Neurological Society and provides a source for publishing original communications on clinical neurology and related basic research.

Commentaries on new developments in clinical neuroscience, which may be commissioned or submitted, are published as editorials. Letters to the Editors serve as a forum for the exchange of ideas or clinical notes and provide an opportunity for commenting on published papers. News sections provide information on the development of neurological medicine, Society news, and reports on recent congresses. Occasional book reviews are also published in this section. The journal lists details of forthcoming meetings.

Every neurologist interested in the field of organic neurological disease needs access to the information contained in this valuable journal.

The journal publishes the following types of articles:

1. Editorials
2. ENS reviews
3. Reviews
4. Original communications
5. Letters to the Editors

Indexing and Abstract Services

- EMBASE/Excerpta Medica
- Index Medicus
- Institute for Scientific Information (ISI)
 - Science Citation Index®
 - SciSearch® (also known as Science Citation Index-Expanded)
- ISI Alerting Services (includes Research Alert®)
- Current Contents®/Life Sciences
- Neuroscience Citation Index®
- Medical Documentation Service®

Copyright

Submission of a manuscript implies: that the work described has not been published before (except in form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all co-authors, if any, as well as – tacitly or explicitly – by the responsible authorities at the institution where the work was carried out. Transfer of copyright to Springer-Verlag be-

accepted for publication. The copyright covers the exclusive right (for U.S. government employees: to the extent transferable) to reproduce and distribute the article, including reprints, translations, photographic reproductions, microform, electronic form (offline, online) or other reproductions of similar nature.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher. The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

An author may make an article published by Springer-Verlag available on his/her personal home page, provided the source of the published article is cited and Springer-Verlag is mentioned as the copyright holder. Authors are requested to create a link to the published article in SpringerLink, Springer's internet service. The link must be accompanied by the following text: "The original publication is available on SpringerLink at www.springerlink.com".

Please use the appropriate URL and/or DOI for the article in SpringerLink. Articles disseminated via SpringerLink are indexed, abstracted and referenced by many abstracting and information services, bibliographic networks, subscription agencies, library networks, and consortia.

While the advice and information in this journal is believed to be true and accurate at the date of its publication, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA. Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. All fees should be paid to the *Copyright Clearance Center, Inc.*, 21 Congress Street, Salem, MA 01970, USA, stating the ISSN, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

The *Canada Institute for Scientific and Technical Information (CISTI)* provides a comprehensive, world-wide document delivery service for all Springer-Verlag journals. For more information, or to place an order for a copyright-cleared Springer-Verlag document, please contact Client Assistant, Document Delivery, CISTI, Ottawa K1A 0S2, Canada (Tel.: +1-613/993-9251, Fax: +1-613/952-8243, E-Mail: cisti.docdel@nrc.ca).

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
