Subject: CRO Selection for 109MS301/302

Based on the feedback that I have received from [REDACTED] and from other members of the SMT, I have notified [REDACTED] that they have been selected to manage the BG12 Phase 3 studies. I have also let [REDACTED] know that they have not been selected. I let [REDACTED] know that work will need to begin right away and we will sign an LOI to allow for that. I have also reminded that we are due revised costing and a new EU CTM candidate. As with any award to a CRO, we award contingent upon a successful negotiation of the scope of work (including budget) and approval of all team members. I will keep the SMT updated as the contract progresses, but I wanted to just let you all know that the study had been awarded.

Thanks,
