**Subject:** BG12 Feasibility Summary - EU Reg Mtg

Gilmore,

In follow up to our discussion the other day - here is my first pass at presenting the feasibility data for BG12 re: protocol design and the estimated number of patients the investigators feel they could enroll per month. There are two spreadsheet in the attached workbook - the first is the raw data and the second is the summary. Please take a look at the summary and let me know if this is sufficient or if you need additional information.

PS - this is based on results received on 6Jun06
