

**Labeled Claim Language of Claims 1-20  
of U.S. Patent No. 7,787,904 B2**

CLAIM ELEMENT NO.	CLAIM LANGUAGE
<b>1, Preamble</b>	A mobile device for controlling digital content played by a plurality of media devices comprising:
<b>1[a]</b>	a wireless communication interface for communicating with the plurality of media devices;
<b>1[b]</b>	a media database; and
<b>1[c]</b>	a control system adapted to, for each of the plurality of media devices:
<b>1[c][i]</b>	communicate with the media device when the mobile device is within a wireless personal area network (WPAN) associated with the media device to obtain information describing content residing at the media device; and

<p><b>1[c][ii]</b></p>	<p>store the information describing the content residing at the media device in the media database;</p>
<p><b>1[d]</b></p>	<p>wherein desired content is selected from the content at the media device based on the information in the media database and played at the media device when the mobile device is within the WPAN associated with the media device.</p>
<p><b>2.</b></p>	<p>The mobile device of claim 1 wherein the control system is further adapted to select the desired content to play at the media device from the media database and instruct the media device to play the desired content when the mobile device is within the WPAN associated with the media device.</p>
<p><b>3.</b></p>	<p>The mobile device of claim 2 wherein the control system is further adapted to interact with a user such that the user selects the desired content to play at the media device from the media database.</p>

4.	The mobile device of claim 2 wherein the control system is further adapted to automatically select the desired content based on predetermined user preferences.
5.	The mobile device of claim 4 wherein the user preferences comprise a preference to play new content from the content stored at the media device.
6.	The mobile device of claim 4 wherein the user preferences comprise a preference to play non-duplicate content from the content stored at the media device that has not been previously played by any of the plurality of media devices.
7.	The mobile device of claim 4 wherein the user preferences comprise a predetermined play list for each of the plurality of media devices.

<p><b>8.</b></p>	<p>The mobile device of claim 4 wherein the user preferences comprise a preferred genre of music.</p>
<p><b>9.</b></p>	<p>The mobile device of claim 2 wherein the control system is further adapted to randomly select the desired content.</p>
<p><b>10, Preamble</b></p>	<p>The mobile device of claim 2 wherein if the mobile device is simultaneously within the WPAN associated with a first one of the plurality of media devices and the WPAN associated with a second one of the plurality of media devices, the control system is further adapted to:</p>
<p><b>10[a]</b></p>	<p>select one of the first and second ones of the plurality of media devices as a select media device; and</p>
<p><b>10[b]</b></p>	<p>select desired content to play for only the select media device from the media database and instruct only the select media device to play the desired content.</p>

<p><b>11.</b></p>	<p>The mobile device of claim 2 wherein if the mobile device is simultaneously within the WPAN associated with a first one of the plurality of media devices and the WPAN associated with a second one of the plurality of media devices, the control system is further adapted to select the desired content to play at the first and second ones of the plurality of media devices such that the first and second ones of the plurality of media devices do not play interfering content.</p>
<p><b>12, Preamble</b></p>	<p>The mobile device of claim 2 wherein the mobile device is included within a system further comprising the plurality of media devices, wherein each of the plurality of media devices comprises:</p>
<p><b>12[a]</b></p>	<p>a wireless communication interface for communicating with the mobile device when the mobile device is within the WPAN associated with the media device;</p>
<p><b>12[b]</b></p>	<p>a content database storing the content; and</p>

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
