BEFORE THE PATENT TRIAL AND APPEAL BOARD

---

STEADYMED LTD.,

Petitioner,

v.

UNITED THERAPEUTICS CORPORATION

Patent Owner.

Case IPR2016-00006

Patent No. 8,497,393

---

**PETITIONER'S RESPONSIVE LIST PURSUANT TO BOARD'S ORDER  
(PAPER NO. 56)**

Mail Stop "Patent Board"  
Patent Trial and Appeal Board  
U.S. Patent and Trademark Office  
P.O. Box 1450  
Alexandria, VA 22313-1450

Pursuant to Paper No. 56, Petitioner SteadyMed Ltd. ("Petitioner") submits its responsive itemized list:

**(1) Portions that Respond to Patent Owner's Arguments Regarding Melting Point of Polymorphs, Including Form A and Form B:**

a) Rogers Declaration (Ex. 1022), p. 21, line 4 from the end of the page through p. 24, last line: See Patent Owner Response, at 22-24;

Williams Declaration (Ex. 2020), at ¶¶ 72-78; *see also* Exs. 2030 and 2031. For example:

"It is known in the art that sample size, rate of heating, the recrystallization solvent(s) used, and the conditions under which the crystalline sample was obtained can significantly affect the DSC data. Dr. Winkler's conclusion based on this single vague and incompletely described DSC data is not scientifically sound."

Williams Declaration, Ex. 2020, at ¶ 76; Patent Owner Response at 24.

b) Rogers Declaration (Ex. 1022), p. 29, first line through p. 30, line 4:

*See* Response to (a), above.

**(2) Portions that Teach the Meaning and Provide Background to the**

**Scientific Terminology Used in Dr. Rogers' Opinion:**

a) Petitioner's Reply, p. 13, line 8: *See* Petitioner's Reply at 14-15. For example:

"By contrast, Dr. Rogers' Declaration cites several literature sources explaining that melting point uniquely identifies a polymorph. (Ex. 1022, ¶¶ 49-52). Thus, for the same polymorph, if the melting point differs, it is due to impurities contained in the sample having a lower melting point. (*Id.*, ¶ 64.) Dr. Rogers concludes that Phares' higher melting point is necessarily due to higher or at least identical purity. (*Id.*, ¶ 74.). Moreover, the width of the DSC peak in the Phares reference is very narrow, consistent with a very pure material. (*Id.*, ¶ 84.)."

Petitioner's Reply at 15.

b) Rogers Declaration (Ex. 1022), p. 9, line 8 through p. 24, last line: *See* Petitioner's Reply at 14-15, Exs. 1001 ('393 Patent) and 1005 (Phares prior art reference); *see also* Petition, at 27-28, and 55. Patent Owner elected not to depose Dr. Rogers.

c) Rogers Declaration (Ex. 1022), p. 26, line 7 from the end of the page through p. 30, line 4: *See* Response to (b), above, and Ex. 1027.

- d) Rogers Declaration (Ex. 1022), p. 30, line 11 (beginning of Section VIII.A.) through p. 34, line 6 from the end of the page: See  
Petitioner's Reply at 15: "Moreover, the width of the DSC peak in the Phares reference is very narrow, consistent with a very pure material."
- e) Rogers Declaration (Ex. 1022), p. 35, line 1 through p. 36, last line:  
See Petitioner's Reply at 15.
- f) Rogers Declaration (Ex. 1022), p. 37, line 4 through p. 38, last line:  
See Response to (b), above.

**(3) Portions Quoting Patent Owner's Expert, and the Board's Statements**

**Prohibiting Introduction of New Evidence**

Petitioner quotes the October 6, 2016 transcript (Ex. 2060):

"MR. MAEBIUS: Well, this listing of the new arguments in petitioner's reply, and the Rogers' declaration, and the instances of mischaracterized testimony from patent owner's expert, will that allow us to get a decision on the question of whether we can address at the final hearing the mischaracterized testimony of Dr. Williams by pointing out other parts of the Williams' deposition transcript?

[...]

JUDGE HARLOW: Thank you for holding. Just to clarify, the parties will not be permitted to introduce new evidence at the oral hearing.

You will be permitted to point out any alleged mischaracterization and to identify other parts of the transcript *if they are of record* that might be responsive, but *the parties will not be permitted to raise new arguments or present new evidence.*"

(Ex. 2060, at 25:5-26:6) (emphasis added).

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
