DISCLOSURE OF ASSERTED
CLAIMS AND INFRINGEMENT
CONTENTIONS, PURSUANT TO
PATENT L.R. 3.1 AND THE JUNE 10,
2015 COURT ORDER**

JURY TRIAL DEMANDED

Judge: Hon. Cathy Ann Bencivengo
Ctrm: 4C

CASE NO. 14-CV-2668-CAB-WVG

WEST VIEW'S REVISED DISCLOSURE OF ASSERTED CLAIMS AND INFRINGEMENT CONTENTIONS
PURSUANT TO PATENT LR 3.1 AND THE JUNE 10, 2015 COURT ORDER

1 In connection with the above-entitled action, Plaintiff and Counter-Defendant
 2 WEST VIEW RESEARCH, LLC (“West View” or “Plaintiff”) hereby makes the
 3 following Revised Disclosure of Asserted Claims and Infringement Contentions,
 4 pursuant to Southern District of California Local Patent Rule 3.1 and this Court’s
 5 June 10, 2015 Order on Motions to Amend and Strike adopting West View’s
 6 revised seven selected claims for each Patent-in-Suit (the “June 10 Order”).

7 West View’s disclosure in this regard is made without the benefit of
 8 discovery, and therefore it reserves the right to amend its Revised Disclosure of
 9 Asserted Claims and Infringement Contentions.

10
 11 **I. Patent L.R. 3.1.a - Each claim of each patent in suit that is allegedly**
 12 **infringed by each opposing party.**

13 In accordance with Patent L.R. 3.1.a, West View discloses that the following
 14 claims are infringed by Defendants AUDI AG, VOLKSWAGEN AG, and
 15 VOLKSWAGEN GROUP OF AMERICA, INC. d/b/a AUDI OF AMERICA, INC.
 16 (collectively, “Audi/VW”), with respect to each of U.S. Patent Nos. 8,719,038 (the
 17 “’038 patent”), 8,719,037 (the “’037 patent”), 8,682,673 (the “’673 patent”),
 18 8,296,146 (the “’146 patent”), 8,065,156 (the “’156 patent”), 8,290,778 (the “’778
 19 patent”), 8,706,504 (the “’504 patent”), and 8,781,839 (the “’839 patent”)
 20 (collectively, the “Patents-in-Suit”).

Patent No.	Asserted Claims
8,719,038	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 22, 23, 24, 25, 26, 27, 30, 31, 32, 33, 34, 35, 36, 37, 38, 40, 41, 42, 43, 44, 45, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, and 68
8,719,037	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, and 77

1	8,682,673	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, and 30
2	8,296,146	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, and 34
3	8,065,156	7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 31, 32, 33, 34, 35, 36, and 37
4	8,290,778	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 27, 28, 29, and 30
5	8,706,504	1, 2, 3, 4, 5, 6, 7, 9, 10, 11, 13, 16, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 29, 30, 31, 33, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, and 48
6	8,781,839	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, and 47

11 In accordance with the June 10 Order, West View selects the following seven
12 claims in each of the Patents-in-Suit, which West View hereby asserts against
13 Audi/VW:
14

15	Patent No.	Revised Seven Selected Claims
16	8,719,038	1, 5, 12, 16, 22, 54, and 66
17	8,719,037	1, 22, 37, 42, 48, 75, and 77
18	8,682,673	1, 15, 19, 23, 25, 27, and 28
19	8,296,146	1, 11, 17, 18, 19, 27, and 30
20	8,065,156	10, 11, 15, 18, 20, 22, and 24
21	8,290,778	1, 5, 9, 22, 27, 28, and 30
22	8,706,504	1, 37, 43, 44, 45, 46, and 48
23	8,781,839	1, 10, 11, 16, 23, 29, and 35

22 **II. Patent L.R. 3.1.b - Separately for each asserted claim, each accused**
23 **apparatus, product, device, process, method, act, or other instrumentality**
24 **(“Accused Instrumentality”) of each opposing party of which the party is**
25 **aware. This identification must be as specific as possible. Each product, device**
26 **and apparatus must be identified by name or model number, if known. Each**
27 **method or process must be identified by name, if known, or by any product,**
28

1 **device, or apparatus which, when used, allegedly results in the practice of the**
2 **claimed method or process.**

3 Upon information and belief, as of the date of this disclosure, West View is
4 aware of the following Accused Instrumentalities, grouped into the following
5 categories:

- 6 (1) Model year 2011 and later “AUDI”-branded “A3,” “A4,” “A5,” “A6,”
7 “A7,” “A8,” “Allroad”, “Q3”, “Q5,” and “Q7”-models (including
8 without limitation “Premium”, Premium Plus”, “Prestige”, “S” , “RS”,
9 “Sportback”, “L”, “W12”, Hybrid, and other variants of the foregoing
10 as applicable) of motor vehicles with Defendants’ so-called “Audi
11 MMI” (“Multi Media Interface” or “MMI”) technology, and may also
12 include such vehicles with Defendants’ so-called “Audi connect®”
13 technology (hereinafter, the “Audi MMI and Audi connect®
14 Products”);
- 15 (2) “AUDI”-branded “Smart Display” touchscreen tablet device (and any
16 other similar platforms that incorporate this technology) (hereinafter,
17 the “Audi Smart Display Products”);
- 18 (3) “AUDI”-branded vehicles, including but not limited to, 2016 “Q7”
19 vehicles, with, and/or having capability to interface with, Defendants’
20 so-called “Smart Display” (and any other vehicles which incorporate
21 this technology) (hereinafter, the “Audi Smart Display Vehicles”);
- 22 (4) “AUDI”-branded vehicles with smartphone integration (“Android
23 Auto®” only), which may include, but is not limited to, “A3,” “A4,”
24 “A5,” “A6,” “A7,” “A8,” “Allroad”, “Q3”, “Q5,” and “Q7”-models
25 (including without limitation “Premium”, “Premium Plus”, “Prestige”,
26 “S”, “RS”, “Sportback”, “L”, “W12”, Hybrid, and other variants of the
27 foregoing as applicable), (hereinafter “Audi Android Auto Products”);
28

- 1 (5) “VOLKSWAGEN”-branded vehicles with standard or optional Hard
2 Drive/SD Card navigation systems with touchscreen capability and
3 voice recognition, including but not limited to the RNS-510 and RNS-
4 850 units, and also including, but not limited to, the following models:
5 “Passat,” “CC,” “Touareg,” “Golf,” “Golf GTI,” and “Golf Sport
6 Wagon” (hereinafter “Volkswagen HD/SD Navigation Systems”);
- 7 (6) “VOLKSWAGEN”-branded vehicles with “Modularen Infotainment-
8 baukasten” (MIB) modular infotainment systems, including without
9 limitation the MIB and MIB-II variants, and which may include
10 smartphone integration (“Android Auto®” and “MirrorLink” only),
11 and which may include any related Volkswagen-branded software
12 applications (“apps”), such vehicles which may include, without
13 limitation, “Jetta,” “Passat,” “CC,” “Golf,” “Golf GTI,” and “Golf
14 Sport Wagon,” as well as “Touareg,” “Beetle,” “Eos,” and “Tiguan”
15 models (hereinafter “Volkswagen MIB Products”);
- 16 (7) Incipient “VOLKSWAGEN” branded “Cross”-based SUV vehicles
17 (model names to be determined), and the related “CrossBlue”, Cross
18 Coupe, and/or “Cross Coupe GTE” concept vehicles, and any variants
19 thereof (hereinafter “Volkswagen Cross Vehicles”);
- 20 (8) All versions of the “VOLKSWAGEN”-branded “Media Control”
21 software application for portable electronic tablet and/or smartphone
22 devices (Android only) usable with vehicles in the U.S. (hereinafter
23 “Volkswagen Media Control Tablet/Smartphone Application
24 Products”); and
- 25 (9) Incipient “VOLKSWAGEN”-branded “Cross”-based vehicles (model
26 names to be determined), and the related “Cross Blue”, Cross Coupe,
27 and/or “Cross Coupe GTE” concept vehicles, which include Wi-Fi
28 hotspot capability and integration for a portable electronic tablet

1 computing device, including those with the with the Media Control
2 Tablet/Smartphone Application Products, (hereinafter “Volkswagen
3 Cross with Tablet Integration Vehicles”).

4 Audi MMI and Audi connect® Products, Audi Smart Display Products, Audi
5 Smart Display Vehicles, Audi Android Auto Products, Volkswagen HD/SD
6 Navigation Systems, Volkswagen MIB Products, Volkswagen Cross Vehicles,
7 Volkswagen Media Control Tablet/Smartphone Application Products, and
8 Volkswagen Cross with Tablet Integration Vehicles may be collectively referred to
9 herein as the “Accused Instrumentalities.”

10 West View identifies the foregoing Accused Instrumentalities separately for
11 each asserted claim for each of the Patents-in-Suit in **Exhibit A** attached hereto.

12
13 **III. Patent L.R. 3.1.c - A chart identifying specifically where each element of**
14 **each asserted claim is found within each Accused Instrumentality, including**
15 **for each element that such party contends is governed by 35 U.S.C. § 112(6),**
16 **the identity of the structure(s), act(s), or material(s) in the Accused**
17 **Instrumentality that performs the claimed function.**

18 Consistent with the April 24, 2015 Case Management Order and the June 10
19 Order, Plaintiff’s Claim Charts consist of at least one representative product and/or
20 method for each of the revised seven selected claims of each Patent-in-Suit asserted
21 against Audi/VW.

22 In addition, when a selected claim depends upon a non-selected dependent
23 and/or independent claim, and therefore by virtue of its dependency necessarily
24 includes the limitations of the non-selected claim(s), those non-selected claims are
25 charted for sake of thoroughness and completeness.

26 Therefore, West View’s attached Claim Charts consist of at least one
27 representative product and/or method for each of the revised seven selected claims
28 of the Patents-in-Suit asserted against Audi/VW, and any necessarily included non-

1 selected claims.

2 Attached hereto as **Exhibit B** is a claim chart identifying specifically where
3 each element for each applicable one of the seven selected claims of the '038 patent
4 asserted against Audi/VW is found within an exemplary Accused Instrumentality.

5 Attached hereto as **Exhibit C** is a claim chart identifying specifically where
6 each element for each applicable one of the seven selected claims of the '037 patent
7 asserted against Audi/VW is found within an exemplary Accused Instrumentality.

8 Attached hereto as **Exhibit D** is a claim chart identifying specifically where
9 each element for each applicable one of the seven selected claims of the '673 patent
10 asserted against Audi/VW is found within an exemplary Accused Instrumentality.

11 Attached hereto as **Exhibit E** is a claim chart identifying specifically where
12 each element for each applicable one of the seven selected claims of the '146 patent
13 asserted against Audi/VW is found within an exemplary Accused Instrumentality.

14 Attached hereto as **Exhibit F** is a claim chart identifying specifically where
15 each element for each applicable one of the seven selected claims of the '156 patent
16 asserted against Audi/VW is found within an exemplary Accused Instrumentality.

17 Attached hereto as **Exhibit G** is a claim chart identifying specifically where
18 each element for each applicable one of the seven selected claims of the '778 patent
19 asserted against Audi/VW is found within an exemplary Accused Instrumentality.

20 Attached hereto as **Exhibit H** is a claim chart identifying specifically where
21 each element for each applicable one of the seven selected claims of the '504 patent
22 asserted against Audi/VW is found within an exemplary Accused Instrumentality.

23 Attached hereto as **Exhibit I** is a claim chart identifying specifically where
24 each element for each applicable one of the seven selected claims of the '839 patent
25 asserted against Audi/VW is found within an exemplary Accused Instrumentality.

26
27 **IV. Patent L.R. 3.1.d - For each claim which is alleged to have been**
28 **indirectly infringed, an identification of any direct infringement and a**

1 **description of the acts of the alleged indirect infringer that contribute to or are**
2 **inducing that direct infringement. Insofar as alleged direct infringement is**
3 **based on joint acts of multiple parties, the role of each such party in the direct**
4 **infringement must be described.**

5 West View asserts that all Patents-in-Suit, the '156, '146, '673, '037, '038,
6 '778, '504, and '839 patents, are indirectly infringed. West View alleges
7 Defendants advertise, entice, encourage, instruct, enable, and otherwise aid and abet
8 third-parties, including but not limited to Defendants' past, present, and prospective
9 sales personnel and agents, as well as past, present, and prospective customers,
10 owners, drivers of, and/or passengers in the Accused Instrumentalities to directly
11 infringe the Patents-in-Suit, including the '156, '146, '673, '037, '038, '778, '504,
12 and '839 patents, through the publication and dissemination of marketing and
13 promotional materials, detailed operational manuals, on-line instructional videos,
14 and/or technical assistance in a manner that directly infringes the '156, '146, '673,
15 '037, '038, '778, '504, and '839 patents.

16 Defendants characterize certain features of the Accused Instrumentalities as
17 "must-have" additions to "AUDI"- and "VW"-branded vehicles. Furthermore,
18 through Defendants' publication of detailed operating manuals, educational and
19 tutorial materials, instructional videos, and press releases concerning their
20 technology, Defendants direct the attention of past, present, and prospective
21 customers, owners, drivers of, and/or passengers in the Accused Instrumentalities to
22 such instructional, educational, and tutorial publications, thereby enticing,
23 encouraging, and aiding and abetting third parties to use certain features disposed
24 within the Accused Instrumentalities in a manner that directly infringes the Patents-
25 in-Suit, including the '156, '146, '673, '037, '038, '778, '504, and '839 patents.

26 ///

27 ///

28 ///

1 **V. Patent L.R. 3.1.e - Whether each element of each asserted claim is**
2 **claimed to be literally present and/or present under the doctrine of equivalents**
3 **in the Accused Instrumentality.**

4 West View identifies in its Claims Charts related to the Patents-in-Suit,
5 attached as Exhibits B-I, whether each element of each one of the seven selected
6 claims of the Patents-in-Suit asserted against Audi/VW, is claimed to be literally
7 present and/or present under the doctrine of equivalents in the exemplary Accused
8 Instrumentality.

9
10 **VI. Patent L.R. 3.1.f - For any patent that claims priority to an earlier**
11 **application, the priority date to which each asserted claim allegedly is entitled.**

12 Each of the Patents-in-Suit has a priority date of June 10, 1999, and an
13 expiration date of June 10, 2019 (exclusive of any term extensions).

14
15 **VII. Patent L.R. 3.1.g - If a party claiming patent infringement asserts or**
16 **wishes to preserve the right to rely, for any purpose, on the assertion that its**
17 **own apparatus, product, device, process, method, act, or other instrumentality**
18 **practices the claimed invention, the party must identify, separately for each**
19 **asserted claim, each such apparatus, product, device, process, method, act, or**
20 **other instrumentality that incorporates or reflects that particular claim.**

21 No such instrumentalities are being identified pursuant to Patent L.R. 3.1.g,
22 and therefore no identification is being made.

23 ///

24 ///

25 ///

26 ///

27 ///

28 ///

1 **VIII. Patent L.R. 3.1.h - If a party claiming infringement alleges willful**
2 **infringement, the basis for such allegation.**

3 West View is not alleging willful infringement.

Audi/Volkswagen Products vs. U.S. Patent No. 8,719,038
“Computerized Information and Display Apparatus”

Exemplary Claim Language	Audi Implementation	Literal / DOE ¹	Direct / Indirect ²
<p>organization or entity;</p>	<p>BURLINGTON, Mass.--(BUSINESS WIRE)--Nuance Communications Inc. (NASDAQ: NUAN) today announced that its automotive-grade Dragon Drive! Messaging service for the connected car is powering the text message dictation in the new Audi A3, creating a hands-free messaging experience. With Audi connect Messaging, drivers can simply use their voice to dictate and send text messages while driving, as well as hear incoming text or e-mail messages.’</p> <p>...</p> <p>“Dragon Drive! Messaging’s flexible and customizable architecture enables world-leading automotive brands like Audi to deeply integrate powerful voice capabilities as part of their unique in-car experience, without compromising quality or adding dangerous distractions.”</p> <p>The Audi A3 deeply integrates Dragon Drive! Messaging as part of the in-car user interface. Drivers simply connect their phone via Bluetooth or insert their SIM card into the MMI Navigation plus to quickly and easily dictate and send text messages without having to take their hands off of the wheel. For example, just say “Dictate text message to John Smith” to quickly access the contact from a mobile address book, and then speak the message, “I am stuck in traffic and will be late for the meeting. Start without me.” The message is read to the driver, and from there they can continue dictating, edit or send the message using simple voice commands. Nuance’s natural, humanlike text-to-speech capabilities also read out incoming text and email messages, keeping Audi drivers connected to friends and family from anywhere.</p> <p>...</p> <p>Audi also integrates Nuance’s voice command and control as part of Audi’s voice user interface, letting drivers speak voice commands to search and access contacts and make calls on their phone, select Audi connect services and one-shot voice commands to input navigation address information.”</p> <p>[12] http://www.businesswire.com/news/home/20121011005696/en/Nuance%E2%80%99s-Dragon-Drive!-Messaging-Powers-Text-Message#.VYsO7_IVhBd</p> <p>FOR GOOGLE LOCAL SEARCH (AKA “ONLINE DESTINATIONS” FUNCTION IN THE NAVIGATION SUBMENU), THE “GOOGLE VOICE” ALGORITHM IS USED FOR DIGITIZATION, AND THE “PACKET” REFERENCED ABOVE IS SENT TO THE REMOTE GOOGLE SERVICE FOR RECOGNITION AND SEARCH OF THE GOOGLE LOCAL DATABASE RELEVANT TO THE VEHICLE’S CURRENT LOCATION:</p> <p>“Another new Audi connect service is the POI (Point Of Interest) search, which can be operated via the voice control</p>

“Computerized Information and Display Apparatus”**

Exemplary Claim Language	Audi Implementation	Literal / DOE ¹	Direct / Indirect ²
	<p style="color: blue;">THE USER’S VOICE IS DIGITIZED BY A CODEC INTO A SMALL PACKET, WHICH IS SENT TO THE GOOGLE SERVERS FOR RECOGNITION AND SEARCH.</p> <p style="color: blue;">SO, AS ONE EXAMPLE, THE USER SAYS A SEARCH TERM UNDER THE “NAVIGATION/ONLINE DESTINATIONS” FUNCTION TO FIND A DESIRED RESTAURANT:</p> <p style="text-align: center;">Your destiny is on the tip of your tongue.</p> <div style="border: 1px solid red; padding: 5px;"> <p>Google Voice™ Local Search allows you to easily search via voice commands for restaurants, historical landmarks and places of interest, both near and far? Imagine entering a destination address by just speaking the words—Audi connect® makes that possible. With the power of Google™ on the tip of your tongue, Audi connect brings a vast Internet database to you with the advanced engineering and style of Audi. The same ease of use and thorough location search capability you’ve come to expect from Google™ rolled into your every commute.</p> <p>Search nearby and faraway points of interest with the power of Google Voice™ Local Search. Need to take the client out for nine holes? Just tell Audi connect “golf course.” Looking for a meal with a little kick? Just ask for “spicy chicken”—Google™ will populate your navigation display with restaurants or descriptions that match the phrase you speak. Select the destination that best suits your appetite, and style, and your Audi MMI® navigation system will guide you there in clear and accurate detail. More than just a companion on the road, Audi connect, once you use it, will become an integral part of the family.</p> </div>

“Computerized Information and Display Apparatus”

Exemplary Claim Language	Audi Implementation	Literal / DOE ¹	Direct / Indirect ²
	<p>“How Voice Search works</p> <p>Voice Search allows you to provide a voice query to a Google search client application on a device instead of typing that query. It uses pattern recognition to transcribe spoken words to written text. For each voice query made to Voice Search, we store the language, the country, the utterance and our system’s guess of what was said. The stored audio data does not contain your Google Account ID unless you have selected otherwise. We do not send any utterances to Google unless you have indicated an intent to use the Voice Search function (for example, pressing the microphone icon in the quick search bar or in the virtual keyboard or saying “Google” when the quick search bar indicates that the Voice Search function is available). We send the utterances to Google servers in order to recognize what was said by you. We keep utterances to improve our services, including to train the system to better recognize the correct search query.” [27] https://www.google.com/policies/technologies/pattern-recognition/</p>		
<p>use at least the identified at least one word or phrase to identify a plurality of possible matches for the name;</p>	<p>SEE ABOVE; THE IDENTIFIED WORDS/PHRASES ARE USED TO CONDUCT THE SEARCH OF THE GOOGLE DATABASE(S) FOR POSSIBLE MATCHES:</p> <p>“How similar keywords match to search terms</p> <p>Your ads are eligible to appear based on the similarity of your keywords to the search terms a person enters when they're searching on Google or our search partner sites. Only one keyword can trigger an ad per search term. Check out the examples below to learn what happens when multiple keywords in your account match a search at the same time.” [28] https://support.google.com/adwords/answer/2756257?hl=en</p> <p>“Welcome to the Google Places API</p> <p>Power your location-based app with the Google Places API, which can be used to find detailed information about places across a wide range of categories. Backed by the same database used by Google Maps and Google+ Local, the Google Places API features over 95 million businesses and points of interest that are updated frequently through owner-verified listings and user-moderated contributions.” [14] https://developers.google.com/places/?hl=e</p>	<p>L, DOE</p>

	 <p>“Server types</p> <p>Google's server infrastructure is divided into several types, each assigned to a different purpose:^{[14][17][49][50][51]}</p> <ul style="list-style-type: none"> • Web servers coordinate the execution of queries sent by users, then format the result into an HTML page. The execution consists of sending queries to index servers, merging the results, computing their rank, retrieving a summary for each hit (using the document server), asking for suggestions from the spelling servers, and finally getting a list of advertisements from the ad server. • Data-gathering servers are permanently dedicated to spidering the Web. Google's web crawler is known as GoogleBot. They update the index and document databases and apply Google's algorithms to assign ranks to pages. • Each index server contains a set of index shards. They return a list of document IDs ("docid"), such that documents corresponding to a certain docid contain the query word. These servers need less disk space, but suffer the greatest CPU workload. • Document servers store documents. Each document is stored on dozens of document servers. When performing a search, a document server returns a summary for the document based on query words. They can also fetch the complete document when asked. These servers need more disk space. <p>Ad servers manage advertisements offered by services like AdWords and AdSense..”</p> <p>http://en.wikipedia.org/wiki/Google_platform</p> <p>“When you talk to Android's voice recognition software, the spectrogram of what you've said is chopped up and sent</p>

EXHIBIT C

**Audi/Volkswagen Vehicles and Products vs. U.S. Patent No. 8,719,037
"Transport Apparatus with Computerized Information and Display Apparatus"**

U.S. Patent No. 8,719,037 Data	Filed: 1/9/13 Issued: 5/6/14 Priority date: June 10, 1999 77 claims total - 6 independent, 71 dependent
---	--

**Provided pursuant to Patent Local Rule 3.1 and June 10, 2015 Order;
Plaintiff reserves the right to supplement.**

Claim Language	Exemplary Audi/Volkswagen Implementations	Literal / DOE ¹	Direct / Indirect ²
	<p>THIS ANALYSIS IS DIRECTED TO THE 2015/2016 VW GOLF GTI WITH MIB-II INFOTAINMENT SYSTEM WITH MIRRORLINK FUNCTIONALITY.</p> <p>“Later this year [2015], VW will introduce the second generation "modular infotainment platform" (MIB II) in the United States. Along with the new infotainment system, MirrorLink™ will also be made available for the first time, integrating the apps and operating layout of numerous smartphones (including Samsung, HTC, LG and Sony) into cars. When MirrorLink™ is introduced, two other interfaces will also be launched under the App-Connect label: ... Android Auto™ (Google®). Simultaneously, VW will also launch ... Android Auto™ in the European market.” http://media.vw.com/release/908/</p> <p>NOTE THAT WHILE FOLLOWING ANALYSIS IS BASED ON THE INCIPIENT MIB-II SYSTEM, AN ACTUAL VEHICLE IS NOT YET ON SALE IN THE U.S. AS OF THE DATE OF THIS SUBMISSION. ACCORDINGLY, THE FOLLOWING IS PREDICATED AT LEAST IN PART ON THE EXTANT 2015 GOLF GTI (I.E., WITH PREDECESSOR TO MIB-II) NOW SOLD IN THE U.S., WITH DIFFERENCES NOTED AS APPLICABLE.</p>		

¹ West View denotes allegations of literal infringement as “L” and infringement under the doctrine of equivalents as “DOE,” as applicable.

a network interface;	<p>MirrorLink Specification 1.0.3 Core Architecture CCC-TS-001</p> <p style="text-align: right;">Page 8/12</p> <p>1 1 ABOUT</p> <p>2 This document specifies an interface for enabling remote user interaction of a mobile device via another de- 3 vice. This specification is written having a vehicle head-unit to interact with the mobile device in mind, but 4 it will similarly apply for other devices, which do provide a colored display, audio input/output and user 5 input mechanisms.</p> <p>4 Figure 2: MirrorLink Architecture</p> <p>5 MirrorLink Architecture consists of a set of protocols, providing the following features:</p> <p>6 1. Connectivity, as specified in [1], providing 7 a. Wired and wireless IP based connection-oriented and connection-less connectivity, and 8 b. Dedicated Bluetooth connectivity</p> <p>9 2. UPnP based Services, providing 10 a. Mechanisms for advertisement of MirrorLink enabled Server devices as specified in [7] 11 b. Mechanisms for MirrorLink client profiles as specified in [6] and</p> <p>[“Car Connectivity Consortium,” April 28, 2015]</p> <p>AS SHOWN ABOVE, THE MOBILE DEVICE IS PAIRED TO THE VW MIB-II SYSTEM VIA A “USB” CABLE (E.G., MICRO-USB/USB OR SIMILAR). WIRELESS INTERFACE OF SMARTPHONE IS USED FOR EXTERNAL CONNECTIVITY.</p>	L, DOE

processing apparatus in data communication with the network interface;	<p style="color: blue; font-weight: bold;">FOLLOWING RELATES TO EXTRA-U.S. VERSION OF MIB-II, LAUNCHED BEFORE U.S. MODEL:</p> <p style="color: red; font-weight: bold;">“Generation II of MIB systems: Ideally networked world with Car-Net, MirrorLink™ and SMS by TTS* The new Passat is launching with Generation II of Volkswagen infotainment systems. The latest generation of this modular information toolkit (MIB) enables a maximum degree of connectivity in terms of coupling external devices. Its diverse interfaces include interfacing to smart phones and their apps via MirrorLink™. In addition, the systems were given much faster processors (optimised booting, quicker route calculation, smoother touchscreen performance, perfected language dialogues) and new higher-resolution displays (in the 6.5-inch systems). ... 2. Faster processors. The new generation of devices is characterised by better system performance. Consider the “Discover Media”, the radio-navigation system with 6.5-inch display: Compared to the first generation, performance of the CPU (main processor) was more than doubled from 950 MIPS (million instructions per second) to 2,500 MIPS. ...”</p>	L, DOE

	<p>4. MirrorLink™. For the first time in the Passat, MirrorLink™ is available – from the “Composition Media” it is optional, in the “Discover Pro” it is standard. MirrorLink™ makes it possible to integrate numerous apps or functions of Android smart phones into the infotainment system. Related apps will be offered directly from Volkswagen and from third party suppliers. The Volkswagen apps: “Mobile Office”, “audioMOTION”, “ThinkBlue. Trainer”, “Shared Audio”, “Drive&Track” and “My Guide”. Third party apps include “Audioteka” (audio books), “Glympse” (social media), “Aupeo!” (Internet radio), “Life360” (family locator) and “Kaliki” (news).”</p> <p>http://www.vwvortex.com/news/volkswagen-news/detail-new-passat-generation-8-2/</p> <p>HENCE, MIB-II SYSTEM HAS CPU, GPU, ETC. IN COMMUNICATION WITH EXEMPLARY ANDROID SMARTPHONE VIA USB.</p> <p>EXEMPLARY NEXUS 5 ANDROID SMARTPHONE (USED FOR PURPOSES OF ILLUSTRATION – OTHER ANDROID PHONES ARE EQUALLY APPLICABLE) HAS NUMEROUS PROCESSING APPARATUS WHICH, <i>INTER ALIA</i>, SUPPORT THE FUNCTIONS OF THE MIRRORLINK SYSTEM:</p> <p>“PROCESSING CPU: Qualcomm Snapdragon™ 800, 2.26GHz processor GPU: Adreno 330, 450MHz” [https://support.google.com/nexus/answer/3467463?hl=en]</p> <p>“Snapdragon 800</p> <p>Beyond its cellular connectivity, the Nexus 5 is meaningful for sporting the fastest Android-compatible SoC in 2013, Qualcomm's Snapdragon 800. At almost 2.3 GHz, its Krait 400 cores represent a significant speed-up compared to the APQ8064's 1.5 GHz Krait 200 architecture.</p> <p>The fact that Google's sub-\$400 Nexus 5 has this SoC comes as somewhat of a surprise considering that quite a few premium Snapdragon 600-based phones were released only a few months prior. When the Nexus 5 launched in late October, it became one of the first widely available Snapdragon 800-based devices in the U.S. market. Putting such a premium SoC in this phone means no performance compromises were made. Apparently, Google wants its customers to experience the very best that Android has to offer on the company's own branded line of devices.</p>

	<p>Ultra HD Capture and Playback DTS-HD and Dolby Digital Plus audio Expanded Gestures</p> <p>Low-power Snapdragon Sensor Core increases sensor accuracy and efficiency</p> <p>21MP with dual ISP</p> <p>Support for up to 2560x2048 display Miracast 1080p HD support</p> <p>IZat GNSS with support for three GPS constellations</p> <p>Krait 400 CPU features 28HPm process technology superior 2GHz+ performance</p> <p>Adreno 330 for advanced graphics</p> <p>Hexagon QDSP6 for ultra low power applications and custom programmability</p> <p>Integrated Gobi 4G LTE World Mode¹, 802.11ac¹, USB 3.0 and BT 4.0 offers broad array of high speed connectivity</p> <p>On paper, the Snapdragon 800 SoC offers a lot potential performance. Some of this is related to hardware accelerators, but the Adreno 330 graphics core is largely responsible for its alacrity in games. Nvidia's Tegra K1 has us talking about a future with console-quality games on smartphones, but at least today, titles written for Android run very smoothly at maxed out quality settings on the Adreno engine. Recent releases like <i>Asphalt 8: Airborne</i>, <i>Riptide GP 2</i>, and <i>Grand Theft Auto: San Andrea</i> run exceedingly well at maxed out settings, while slightly older games like <i>Real Racing 3</i>, <i>Shadowgun</i>, and <i>Riptide GP</i> appear smoother than ever. I was frankly quite surprised at the improvement, having previously come from a Xiaomi MI-2 with its Snapdragon S4 Pro/Adreno 320 SoC." [http://www.tomshardware.com/reviews/google-nexus-5-smartphone,3720.html]</p> <p>THE CPU/GPU OF THE MIB-II SYSTEM AND EXEMPLARY SMARTPHONE COORDINATE VIA THE USB CABLE (USING INTERNET PROTOCOL OVER TOP OF THE USB PROTOCOL) TO PROVIDE, AMONG OTHER THINGS, THE EMULATION OF THE PHONE'S DISPLAY AND FUNCTIONS ON THE VEHICLE TOUCHSCREEN DISPLAY.</p>

	<p>7) Service is available soon</p> <div style="border: 2px solid red; padding: 5px;"> <p>The mobile online service (Car-Net) can only be used with the optional Discover Media and Discover Pro equipment. A mobile terminal (e.g. smartphone) with the ability to act as a mobile WLAN hotspot is also required. Alternatively, a mobile phone with a remote SIM Access Profile (rSAP) or a SIM card with call and data options can be used with the "Premium mobile phone interface" option. The Car-Net service is available only with an existing mobile phone contract or one which must be separately established between you and your mobile service provider, and only within the coverage of the individual mobile phone network. Additional fees (e.g. roaming charges) may arise when receiving data from the internet, depending on your particular mobile phone tariff and especially when using the service abroad. Due to the accumulation of data when using the Car-Net service, it is strongly recommended that you organise an unlimited data plan with your mobile service provider.</p> </div> <p>A separate contract with Volkswagen AG must be set up online in order to use Car-Net. After the vehicle handover, the customer has 90 days to register the vehicle at [http://volkswagen-carnet.com/int/en/start/online-devices.html#tab/open/mirror-link]</p> <p>NOTE THAT CAR-NET SERVICE IS STANDARD ON GOLF GTI, BUT REQUIRES PRESENCE OF WIRELESS CONNECTION (E.G., CELLULAR SMARTPHONE WITH WI-FI HOTSPOT CAPABILITY, WHICH IMPLIES THAT CAR DOES NOT HAVE ITS OWN INDIGENOUS CELLULAR MODEM.</p>		
<p>obtain digitized speech generated based on speech received from a passenger, the digitized speech comprising an affirmative query for desired information which the passenger wishes to find;</p>	<p>GOLF GTI HAS INDIGENOUS MICROPHONE AND SPEAKERS TO SUPPORT, AMONG OTHER THINGS VOICE RECOGNITION FUNCTIONS:</p> <div style="border: 2px solid red; padding: 5px; margin: 10px 0;"> <p>Accepting and rejecting calls</p> <p>Accepting a call</p> <p>– To accept a call, briefly press the button ⇒ page 25, fig. 8 (b). The radio will go silent and the words: ANS CALL and then TALKING will appear in the display.</p> <p>Rejecting a call</p> <p>– Briefly press the button ⇒ page 25, fig. 8 (c) to reject an incoming call during the “ring” signal. CALL ENDED will appear in the display.</p> <p>Each time there is an incoming call to the connected cell phone with the radio on, an acoustic signal will sound and the display will read CALL FROM. If the connected cell phone has caller ID, the number from which the call is incoming will appear in the radio display.</p> <p>The audio connection will be available through the vehicle’s front speakers and the microphone in the front of the radio.</p> <p>Transferring a call from the radio to the cell phone and vice versa</p> <p>Briefly press the button ⇒ page 25, fig. 8 (d) during the call, it will then be transferred from the radio to the cell phone and vice versa. CALL TRANS will appear on the display.</p> <p>Tips</p> <ul style="list-style-type: none"> • It is possible to control volume and audio adjustments with the radio buttons. • In order to end the call, briefly press the button ⇒ page 25, fig. 8 (e). CALL ENDED will appear in the display. ◀ </div> <p>[http://parts.vw.com/media/images/ecatalog/itemdocuments/1000/VW%20Sound%20System.pdf]</p> <p>SEE BELOW; MIB-II UTILIZES E.G., RTP MEDIA PROTOCOL TO TRANSFER USER’S VOICE AUDIO IN DIGITAL FORMAT (I.E., RTP PACKETS) TO SMARTPHONE VOICE RECOGNITION INTERFACE:</p>	<p>L, DOE</p>

	<p>On paper, the Snapdragon 800 SoC offers a lot potential performance. Some of this is related to hardware accelerators, but the Adreno 330 graphics core is largely responsible for its alacrity in games. Nvidia's Tegra K1 has us talking about a future with console-quality games on smartphones, but at least today, titles written for Android run very smoothly at maxed out quality settings on the Adreno engine. Recent releases like <i>Asphalt 8: Airborne</i>, <i>Riptide GP 2</i>, and <i>Grand Theft Auto: San Andrea</i> run exceedingly well at maxed out settings, while slightly older games like <i>Real Racing 3</i>, <i>Shadowgun</i>, and <i>Riptide GP</i> appear smoother than ever. I was frankly quite surprised at the improvement, having previously come from a Xiaomi MI-2 with its Snapdragon S4 Pro/Adreno 320 SoC." http://www.tomshardware.com/reviews/google-nexus-5-smartphone,3720.html</p>

<p>42. A transport apparatus configured to transport one or more persons from one location to another, comprising:</p>	<p style="background-color: yellow;">THIS ANALYSIS IS TARGETED AT THE EXEMPLARY 2016 Q7 WITH “ANDROID AUTO” (ANDROID SMARTPHONE INTEGRATION)</p>  <p>http://www.audiusa.com/search?query=2016+Q7#</p> <p>“Audi plans to begin introducing Android Auto technology with all-new models it launches in 2016. Audi was a founding member of – and the only luxury brand among them – the Open Automotive Alliance, a coalition of Google and other technology companies and auto-industry leaders that was formed in early 2014 with the objective of bringing the Android platform to cars. Google demonstrated its Android Auto system for the first time at its I/O developer conference in San Francisco later in the year. Android Auto will provide a seamless link for Android mobile car apps to function through Audi connect. Motorists will be able to project apps and services optimized for voice commands and the driving environment, using Audi connect displays and controls optimized for safe and intuitive operation on the road. The Open Automotive Alliance is dedicated to building an open ecosystem around a common digital-tech platform in order to drive innovation in connectivity.” http://www.audiusa.com/newsroom/topics/2014/audi-connect</p>	L, DOE	D, I

Claim Language	Exemplary Audi/Volkswagen Implementations	Literal / DOE ¹	Direct / Indirect ²
	<p>On paper, the Snapdragon 800 SoC offers a lot potential performance. Some of this is related to hardware accelerators, but the Adreno 330 graphics core is largely responsible for its alacrity in games. Nvidia's Tegra K1 has us talking about a future with console-quality games on smartphones, but at least today, titles written for Android run very smoothly at maxed out quality settings on the Adreno engine. Recent releases like <i>Asphalt 8: Airborne</i>, <i>Riptide GP 2</i>, and <i>Grand Theft Auto: San Andrea</i> run exceedingly well at maxed out settings, while slightly older games like <i>Real Racing 3</i>, <i>Shadowgun</i>, and <i>Riptide GP</i> appear smoother than ever. I was frankly quite surprised at the improvement, having previously come from a Xiaomi MI-2 with its Snapdragon S4 Pro/Adreno 320 SoC." [http://www.cnet.com/products/2015-audi-a3-sedan/]</p>

	<p style="text-align: center;"><i>DIRECTIONS OR DIRECTIONSSERVICE API PROVIDES DIRECTIONS.</i></p> <p style="border: 2px solid red; padding: 5px;">You can calculate directions (using a variety of methods of transportation) by using the <code>DirectionsService</code> object. This object communicates with the Google Maps API Directions Service which receives direction requests and returns computed results. You may either handle these directions results yourself or use the <code>DirectionsRenderer</code> object to render these results.</p> <p>Directions may specify origins and destinations either as text strings (e.g. "Chicago, IL" or "Darwin, NSW, Australia") or as <code>LatLng</code> values. The Directions service can return multi-part directions using a series of waypoints. Directions are displayed as a polyline drawing the route on a map, or additionally as a series of textual description within a <code><div></code> element (e.g. "Turn right onto the Williamsburg Bridge ramp").</p> <p>Overview</p> <p>Directions Requests</p> <p>Accessing the Directions service is asynchronous, since the Google Maps API needs to make a call to an external server. For that reason, you need to pass a <i>callback</i> method to execute upon completion of the request. This callback method should process the result(s). Note that the Directions service may return more than one possible itinerary as an array of separate <code>routes []</code>.</p> <p>https://developers.google.com/maps/documentation/javascript/directions</p>

<p>obtain digitized speech generated based on speech received from the occupant, the digitized speech comprising a request for desired information which the occupant wishes to obtain;</p>	<p>THE AUDI A3 UTILIZES VOICE DIGITIZATION APPARATUS/FUNCTIONS IN AT LEAST THREE AREAS; (I) GOOGLE LOCAL SEARCH; (II) VEHICLE (LOCAL) COMMANDS, AND (III) MESSAGING; THESE INPUTS ARE RECEIVED VIA A MICROPHONE BUILT INTO THE VEHICLE:</p> <p>“Another new Audi connect service is the POI (Point Of Interest) search, which can be operated via the voice control system. The driver simply chooses a destination and specifies their interest – the name of a restaurant, for instance. The voice command, or “voice tag,” is converted to a small data packet that is sent to the Google search engine.” http://www.audiworld.com/articles/audi-connect-the-car-in-the-cloud/</p> <p>“October 11, 2012 08:00 AM Eastern Daylight Time</p> <p>BURLINGTON, Mass.--(BUSINESS WIRE)--Nuance Communications Inc. (NASDAQ: NUAN) today announced that its automotive-grade Dragon Drive! Messaging service for the connected car is powering the text message dictation in the new Audi A3, creating a hands-free messaging experience. With Audi connect Messaging, drivers can simply use their voice to dictate and send text messages while driving, as well as hear incoming text or e-mail messages.’</p>	L, DOE	

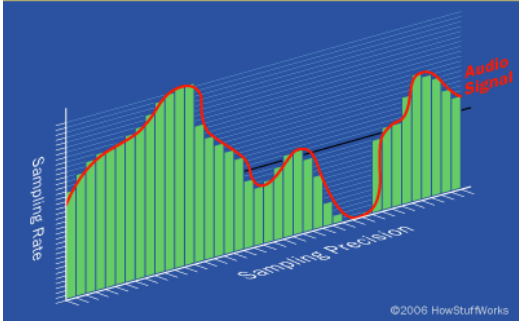

**Audi/Volkswagen Vehicles and Products vs. U.S. Patent No. 8,719,037
 “Transport Apparatus with Computerized Information and Display Apparatus”**

Claim Language	Exemplary Audi/Volkswagen Implementations	Literal / DOE ¹	Direct / Indirect ²
	<p>...</p> <p>“Dragon Drive! Messaging’s flexible and customizable architecture enables world-leading automotive brands like Audi to deeply integrate powerful voice capabilities as part of their unique in-car experience, without compromising quality or adding dangerous distractions.”</p> <p>The Audi A3 deeply integrates Dragon Drive! Messaging as part of the in-car user interface. Drivers simply connect their phone via Bluetooth or insert their SIM card into the MMI Navigation plus to quickly and easily dictate and send text messages without having to take their hands off of the wheel. For example, just say “Dictate text message to John Smith” to quickly access the contact from a mobile address book, and then speak the message, “I am stuck in traffic and will be late for the meeting. Start without me.” The message is read to the driver, and from there they can continue dictating, edit or send the message using simple voice commands. Nuance’s natural, humanlike text-to-speech capabilities also read out incoming text and email messages, keeping Audi drivers connected to friends and family from anywhere.</p> <p>...</p> <p>Audi also integrates Nuance’s voice command and control as part of Audi’s voice user interface, letting drivers speak voice commands to search and access contacts and make calls on their phone, select Audi connect services and one-shot voice commands to input navigation address information.”</p> <p>[http://www.businesswire.com/news/home/20121011005696/en/Nuance%E2%80%99s-Dragon-Drive!-Messaging-Powers-Text-Message#.VYsxLflVhBd]</p> <p>DEPENDING ON THE FUNCTION, DIFFERENT SPEECH DIGITIZATION /RECOGNITIONS APPARATUS AND FUNCTIONS ARE USED TO EFFECTUATE THE VOICE COMMAND/SEARCH TERM. FOR GOOGLE LOCAL SEARCH (AKA “ONLINE DESTINATIONS” FUNCTION), THE “GOOGLE VOICE” ALGORITHM IS USED FOR DIGITIZATION, AND THE “PACKET” REFERENCED ABOVE IS SENT TO THE REMOTE GOOGLE SERVICE FOR RECOGNITION AND SEARCH OF THE GOOGLE LOCAL DATABASE RELEVANT TO THE VEHICLE’S CURRENT LOCATION:</p> <p>“For non-personalized services (such as Navigation enhanced by Google, information about parking, city events, flight information, weather, gas prices,) we share location information with the appropriate content providers as needed to respond to the requests, but we do not share information that directly identifies you or your Audi vehicle.”</p> <p>[http://www.audiusa.com/technology/intelligence/audi-connect/connect-privacy.html]</p>

	<p style="text-align: center;">Your destiny is on the tip of your tongue.</p> <div style="border: 1px solid red; padding: 5px;"> <p>Google Voice™ Local Search allows you to easily search via voice commands for restaurants, historical landmarks and places of interest, both near and far.³ Imagine entering a destination address by just speaking the words—Audi connect® makes that possible. With the power of Google™ on the tip of your tongue, Audi connect brings a vast Internet database to you with the advanced engineering and style of Audi. The same ease of use and thorough location search capability you’ve come to expect from Google™ rolled into your every commute.</p> <p>Search nearby and faraway points of interest with the power of Google Voice™ Local Search. Need to take the client out for nine holes? Just tell Audi connect “golf course.” Looking for a meal with a little kick? Just ask for “spicy chicken”—Google™ will populate your navigation display with restaurants or descriptions that match the phrase you speak. Select the destination that best suits your appetite, and style, and your Audi MMI® navigation system will guide you there in clear and accurate detail. More than just a companion on the road, Audi connect, once you use it, will become an integral part of the family.</p> </div>

network entity via the network interface to cause retrieval of the desired information;	<p>ILLUSTRATED EXAMPLE, SUSHI ROKU RESTAURANTS GENERALLY IN PROXIMITY TO THE USER’S VEHICLE).</p> <p>“Audi’s IT department is also on the job whenever an Audi driver requests certain Audi connect services such as weather information or the news. Such requests are transmitted via the mobile communications network to back-end servers in Ingolstadt, which identify the vehicle in question. Requests are then forwarded to content providers, which in turn deliver data directly to the customer’s vehicle. Audi has already begun managing Audi connect data with cutting-edge precision. This is particularly intriguing in terms of the wireless use of media data via cloud computing, which Audi refers to as “seamless media.” “ [http://www.audiworld.com/articles/audi-connect-the-car-in-the-cloud/]”</p>		
and receive the desired information via the network interface;	<p>THE REQUESTED INFORMATION (E.G., SPICY CHICKEN OR SUSHI ROKU LOCATIONS) IS SENT BACK VIA THE LTE WIRELESS INTERFACE TO THE VEHICLE.</p> <p>LTE INTERFACE ENABLES SUFFICIENT BANDWIDTH FOR E.G., GOOGLE EARTH IMAGE/STREET VIEW DOWNLOADS:</p> <p>“It was important during the development process to not only provide a high-speed Internet connection mobile devices, but also to provide high-speed Internet access for the car’s internal systems. This enables Audi connect services such as navigation with Google Earth and Google Street View to load and display much, much faster. Full integration of LTE and the associated fast transfer of data will enable the targeted expansion of the Audi connect range in the years ahead, from cloud-based music services to car-to-X services such as wireless payment or communication with traffic signals. LTE makes it possible to provide these services everywhere, even in rural areas.” [https://www.audi-mediacycenter.com/en]”</p>	L, DOE

<p>obtain digitized speech generated based on speech received from the occupant,</p>	<p>THE AUDI A3 UTILIZES VOICE DIGITIZATION APPARATUS/FUNCTIONS IN AT LEAST THREE AREAS; (I) GOOGLE LOCAL SEARCH; (II) VEHICLE (LOCAL) COMMANDS, AND (III) MESSAGING; THESE INPUTS ARE RECEIVED VIA A MICROPHONE BUILT INTO THE VEHICLE:</p> <p>“Another new Audi connect service is the POI (Point Of Interest) search, which can be operated via the voice control system. The driver simply chooses a destination and specifies their interest – the name of a restaurant, for instance. The voice command, or “voice tag,” is converted to a small data packet that is sent to the Google search engine.”</p> <p>http://www.audiworld.com/articles/audi-connect-the-car-in-the-cloud/</p>	L, DOE	

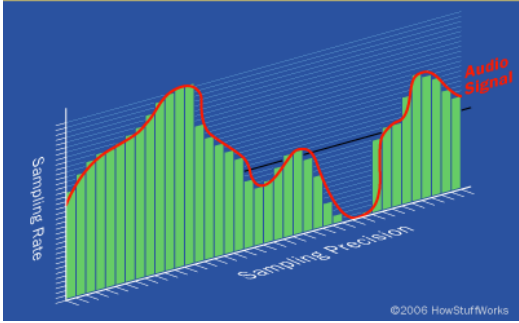

Audi/Volkswagen Vehicles and Products vs. U.S. Patent No. 8,719,037
“Transport Apparatus with Computerized Information and Display Apparatus”

Claim Language	Exemplary Audi/Volkswagen Implementations	Literal / DOE ¹	Direct / Indirect ²
	<p>“October 11, 2012 08:00 AM Eastern Daylight Time</p> <p>BURLINGTON, Mass.--(BUSINESS WIRE)--Nuance Communications Inc. (NASDAQ: NUAN) today announced that its automotive-grade Dragon Drive! Messaging service for the connected car is powering the text message dictation in the new Audi A3, creating a hands-free messaging experience. With Audi connect Messaging, drivers can simply use their voice to dictate and send text messages while driving, as well as hear incoming text or e-mail messages.’</p> <p>...</p> <p>“Dragon Drive! Messaging’s flexible and customizable architecture enables world-leading automotive brands like Audi to deeply integrate powerful voice capabilities as part of their unique in-car experience, without compromising quality or adding dangerous distractions.”</p> <p>The Audi A3 deeply integrates Dragon Drive! Messaging as part of the in-car user interface. Drivers simply connect their phone via Bluetooth or insert their SIM card into the MMI Navigation plus to quickly and easily dictate and send text messages without having to take their hands off of the wheel. For example, just say “Dictate text message to John Smith” to quickly access the contact from a mobile address book, and then speak the message, “I am stuck in traffic and will be late for the meeting. Start without me.” The message is read to the driver, and from there they can continue dictating, edit or send the message using simple voice commands. Nuance’s natural, humanlike text-to-speech capabilities also read out incoming text and email messages, keeping Audi drivers connected to friends and family from anywhere.</p> <p>...</p> <p>Audi also integrates Nuance’s voice command and control as part of Audi’s voice user interface, letting drivers speak voice commands to search and access contacts and make calls on their phone, select Audi connect services and one-shot voice commands to input navigation address information.”</p> <p>[http://www.businesswire.com/news/home/20121011005696/en/Nuance%E2%80%99s-Dragon-Drive!-Messaging-Powers-Text-Message#.UPAdMVdXN8]</p> <p>DEPENDING ON THE FUNCTION, DIFFERENT SPEECH DIGITIZATION /RECOGNITIONS APPARATUS AND FUNCTIONS ARE USED TO EFFECTUATE THE VOICE COMMAND/SEARCH TERM. FOR GOOGLE LOCAL SEARCH (AKA “ONLINE DESTINATIONS” FUNCTION), THE “GOOGLE VOICE” ALGORITHM IS USED FOR DIGITIZATION, AND THE “PACKET” REFERENCED ABOVE IS SENT TO THE REMOTE GOOGLE SERVICE FOR RECOGNITION AND SEARCH OF THE GOOGLE LOCAL DATABASE RELEVANT TO THE VEHICLE’S CURRENT LOCATION:</p> <p>“For non-personalized services (such as Navigation enhanced by Google, information about parking, city events, flight information, weather, gas prices,) we share location information with the appropriate content providers as needed to respond to the requests, but we do not share information that directly identifies you or your Audi vehicle.”</p> <p>http://www.audiusa.com/technology/intelligence/audi-connect/connect-privacy.html</p>

	<p>The new Passat is launching with Generation II of Volkswagen infotainment systems. The latest generation of this modular information toolkit (MIB) enables a maximum degree of connectivity in terms of coupling external devices. Its diverse interfaces include interfacing to smart phones and their apps via MirrorLink™. In addition, the systems were given much faster processors (optimised booting, quicker route calculation, smoother touchscreen performance, perfected language dialogues) and new higher-resolution displays (in the 6.5-inch systems).</p> <p>...</p> <p>2. Faster processors. The new generation of devices is characterised by better system performance. Consider the “Discover Media”, the radio-navigation system with 6.5-inch display: Compared to the first generation, performance of the CPU (main processor) was more than doubled from 950 MIPS (million instructions per second) to 2,500 MIPS. ...</p> <p>4. MirrorLink™. For the first time in the Passat, MirrorLink™ is available – from the “Composition Media” it is optional, in the “Discover Pro” it is standard. MirrorLink™ makes it possible to integrate numerous apps or functions of Android smart phones into the infotainment system. Related apps will be offered directly from Volkswagen and from third party suppliers. The Volkswagen apps: “Mobile Office”, “audioMOTION”, “ThinkBlue. Trainer”, “Shared Audio”, “Drive&Track” and “My Guide”. Third party apps include “Audioteka” (audio books), “Glympse” (social media), “Aupeo!” (Internet radio), “Life360” (family locator) and “Kaliki” (news).”</p> <p>http://www.vwvortex.com/news/volkswagen-news/detail-new-passat-generation-8-2/</p> <p>HENCE, MIB-II SYSTEM HAS CPU, GPU, ETC. IN COMMUNICATION WITH EXEMPLARY ANDROID SMARTPHONE VIA USB.</p> <p>EXEMPLARY NEXUS 5 ANDROID SMARTPHONE (USED FOR PURPOSES OF ILLUSTRATION – OTHER ANDROID PHONES ARE EQUALLY APPLICABLE) HAS NUMEROUS PROCESSING APPARATUS WHICH, INTER ALIA, SUPPORT THE FUNCTIONS OF THE MIRRORLINK SYSTEM:</p> <p>“PROCESSING CPU: Qualcomm Snapdragon™ 800, 2.26GHz processor GPU: Adreno 330, 450MHz” [https://support.google.com/nexus/answer/3467463?hl=en] “Snapdragon 800</p>

	<p>Beyond its cellular connectivity, the Nexus 5 is meaningful for sporting the fastest Android-compatible SoC in 2013, Qualcomm's Snapdragon 800. At almost 2.3 GHz, its Krait 400 cores represent a significant speed-up compared to the APQ8064's 1.5 GHz Krait 200 architecture.</p> <p>The fact that Google's sub-\$400 Nexus 5 has this SoC comes as somewhat of a surprise considering that quite a few premium Snapdragon 600-based phones were released only a few months prior. When the Nexus 5 launched in late October, it became one of the first widely available Snapdragon 800-based devices in the U.S. market. Putting such a premium SoC in this phone means no performance compromises were made. Apparently, Google wants its customers to experience the very best that Android has to offer on the company's own branded line of devices.</p> <div style="text-align: center;"> </div> <p>Ultra HD Capture and Playback DTS-HD and Dolby Digital Plus audio Expanded Gestures</p> <p>Low-power Snapdragon Sensor Core increases sensor accuracy and efficiency</p> <p>21MP with dual ISP</p> <p>Support for up to 2560x2048 display Miracast 1080p HD support</p> <p>IZat GNSS with support for three GPS constellations</p> <p>Krait 400 CPU features 28HPm process technology superior 2GHz+ performance</p> <p>Adreno 330 for advanced graphics</p> <p>Hexagon QDSP6 for ultra low power applications and custom programmability</p> <p>Integrated Gobi 4G LTE World Mode¹, 802.11ac¹, USB 3.0 and BT 4.0 offers broad array of high speed connectivity</p> <p>On paper, the Snapdragon 800 SoC offers a lot potential performance. Some of this is related to hardware accelerators, but the Adreno 330 graphics core is largely responsible for its alacrity in games. Nvidia's Tegra K1 has us talking about a future with console-quality games on smartphones, but at least today, titles written for Android run very smoothly at maxed out quality settings on the Adreno engine. Recent releases like <i>Asphalt 8: Airborne</i>, <i>Riptide GP 2</i>, and <i>Grand Theft Auto: San Andrea</i> run exceedingly well at maxed out settings, while slightly older games like <i>Real Racing 3</i>, <i>Shadowgun</i>, and <i>Riptide GP</i> appear smoother than ever. I was frankly quite surprised at the improvement, having previously come from a Xiaomi MI-2 with its Snapdragon S4 Pro/Adreno 320 SoC.” http://www.tomshardware.com/reviews/google-nexus-5-smartphone.3720.html</p>

The latest generation of this modular information toolkit (MIB) enables a maximum degree of connectivity in terms of coupling external devices. Its diverse interfaces include interfacing to smart phones and their apps via MirrorLink™. In addition, the systems were given much faster processors (optimised booting, quicker route calculation, smoother touchscreen performance, perfected language dialogues) and new higher-resolution displays (in the 6.5-inch systems).</p> <p>...</p> <p>2. Faster processors. The new generation of devices is characterised by better system performance. Consider the “Discover Media”, the radio-navigation system with 6.5-inch display: Compared to the first generation, performance of the CPU (main processor) was more than doubled from 950 MIPS (million instructions per second) to 2,500 MIPS. ...</p> <p>4. MirrorLink™. For the first time in the Passat, MirrorLink™ is available – from the “Composition Media” it is optional, in the “Discover Pro” it is standard. MirrorLink™ makes it possible to integrate numerous apps or functions of Android smart phones into the infotainment system. Related apps will be offered directly from Volkswagen and from third party suppliers. The Volkswagen apps: “Mobile Office”, “audioMOTION”, “ThinkBlue. Trainer”, “Shared Audio”, “Drive&Track” and “My Guide”. Third party apps include “Audioteka” (audio books), “Glympse” (social media), “Aupeo!” (Internet radio), “Life360” (family locator) and “Kaliki” (news).”</p> <p>http://www.vwvortex.com/news/volkswagen-news/detail-new-passat-generation-8-2/</p> <p>HENCE, MIB-II SYSTEM HAS CPU, GPU, ETC. IN COMMUNICATION WITH EXEMPLARY ANDROID SMARTPHONE VIA USB.</p> <p>EXEMPLARY NEXUS 5 ANDROID SMARTPHONE (USED FOR PURPOSES OF ILLUSTRATION – OTHER ANDROID PHONES ARE EQUALLY APPLICABLE) HAS NUMEROUS PROCESSING APPARATUS WHICH, INTER ALIA, SUPPORT THE FUNCTIONS OF THE MIRRORLINK SYSTEM:</p> <p>“PROCESSING CPU: Qualcomm Snapdragon™ 800, 2.26GHz processor GPU: Adreno 330, 450MHz” [https://support.google.com/nexus/answer/3467463?hl=en]</p>

	<p>“Snapdragon 800</p> <p>Beyond its cellular connectivity, the Nexus 5 is meaningful for sporting the fastest Android-compatible SoC in 2013, Qualcomm's Snapdragon 800. At almost 2.3 GHz, its Krait 400 cores represent a significant speed-up compared to the APQ8064's 1.5 GHz Krait 200 architecture.</p> <p>The fact that Google's sub-\$400 Nexus 5 has this SoC comes as somewhat of a surprise considering that quite a few premium Snapdragon 600-based phones were released only a few months prior. When the Nexus 5 launched in late October, it became one of the first widely available Snapdragon 800-based devices in the U.S. market. Putting such a premium SoC in this phone means no performance compromises were made. Apparently, Google wants its customers to experience the very best that Android has to offer on the company's own branded line of devices.</p> <div style="text-align: center;"> </div> <p>On paper, the Snapdragon 800 SoC offers a lot potential performance. Some of this is related to hardware accelerators, but the Adreno 330 graphics core is largely responsible for its alacrity in games. Nvidia's Tegra K1 has us talking about a future with console-quality games on smartphones, but at least today, titles written for Android run very smoothly at maxed out quality settings on the Adreno engine. Recent releases like <i>Asphalt 8: Airborne</i>, <i>Riptide GP 2</i>, and <i>Grand Theft Auto: San Andrea</i> run exceedingly well at maxed out settings, while slightly older games like <i>Real Racing 3</i>, <i>Shadowgun</i>, and <i>Riptide GP</i> appear smoother than ever. I was frankly quite surprised at the improvement, having previously come from a Xiaomi MI-</p>

FEATURES OF 2015 A3
WITH MMI AND
CONNECT

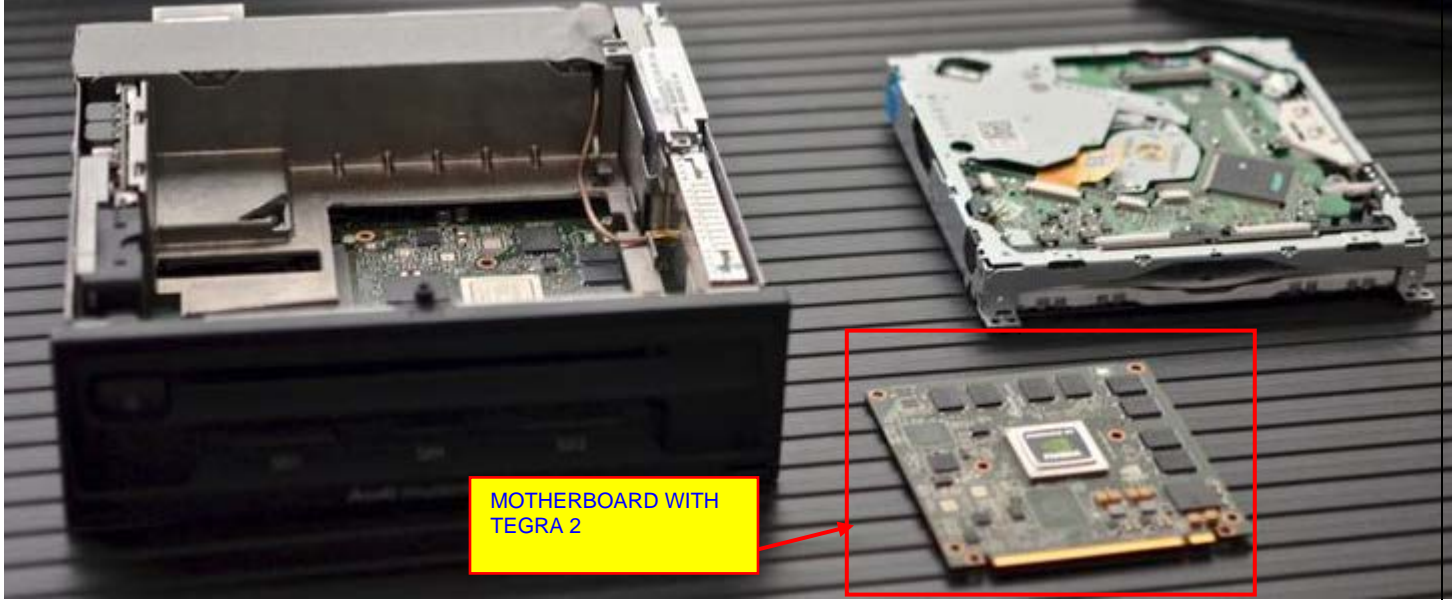

**Audi/Volkswagen Vehicles and Services vs. U.S. Patent No. 8,682,673
“Computerized Information and Display Apparatus”**

Claim Language	IMPLEMENTATION	Literal / DOE ¹	Direct / Indirect ²
	SIRIUSXM, WHICH IS SATELLITE/DOWNLINK BASED, AND WHICH REQUIRES A SEPARATE SUBSCRIPTION FROM THE CONNECT SYSTEM OFFERED BY AUDI).		
a network interface;	<p>“Connectivity, Navigation, and Interface</p> <p>The A3 has several new tech features that haven't made it to even Audi's top-of-the-line A8. It's the first Audi with 4G LTE wireless connectivity via AT&T, for example, while Facebook and Twitter apps are new additions and for now exclusive to the A3's Audi connect system....</p> <p>Even if you are able to connect your portable device and have ample power, you don't really get much of a chance to use it—or its data plan—beyond listening to music or making calls via Bluetooth. Most of the A3's connected features are dependent on having the AT&T data plan that's part of the Audi connect system and costs \$99 for a six-month/5GB-total package or \$499 for a 30-month/30GB-total package after a free six-month trial....</p> <p>Instead of leveraging a smartphone to connect to the cloud, as with some systems, features such as Internet radio and Picture navigation are communicated via Audi Connect, and through the A3's onboard Wi-Fi connection that's part of the AT&T data plan. This means that if you allow your 4G subscription to lapse, you lose these features.” [http://www.pcmag.com/article2/0,2817,2455739,00.asp]</p>  <p>AUDI A3 CONNECT UTILIZES A 4G LTE MODEM AND SERVICE THROUGH AT&T. THIS IS THE PRIMARY WIRELESS INTERFACE FOR THE VEHICLE.</p>	L, DOE	

Audi/Volkswagen Vehicles and Services vs. U.S. Patent No. 8,682,673
 "Computerized Information and Display Apparatus"

Claim Language	IMPLEMENTATION	Literal / DOE ¹	Direct / Indirect ²
<p>processing apparatus in data communication with the network interface;</p>	<p>AUDI A3 MMI WITH CONNECT ARCHITECTURE IS MODULAR, AND INCLUDES AN NVIDIA TEGRA 2 PROCESSOR AND VARIOUS STORAGE DEVICES SUCH AS HDD, RAM, CACHES, ETC. BOTH SUPPORTING TEGRA 2 CHIP AND OTHER COMPONENTS. THE PROCESSING APPARATUS IS IN DATA COMMUNICATION WITH THE NETWORK (E.G., 4G LTE) INTERFACE IN ORDER TO, INTER ALIA, RECEIVE AND PROCESS DATA FROM THE CONNECT REMOTE SERVERS.</p> <p>Figure 1. Tegra 2 Series Block Diagram</p>	<p>L, DOE</p>	

**Audi/Volkswagen Vehicles and Services vs. U.S. Patent No. 8,682,673
“Computerized Information and Display Apparatus”**

Claim Language	IMPLEMENTATION	Literal / DOE ¹	Direct / Indirect ²
	<p>[http://www.chiark.greenend.org.uk/~theom/riscos/docs/Tegra2_TRM_DP04508001v01p.pdf][http://www.pcmag.com/article2/0,2817,2455739,00.asp]</p> <p>“The future of Audi is modular</p> <p>The A3's Multi Media Interface (MMI) infotainment system is powered by Nvidia's Tegra 2 processor and features crisply rendered 3D topographical map data for the navigation system and snappy, sharp menus. ...</p> <p>Right now, it's packing the Tegra 2 and 4G LTE connectivity, but next year it could be rocking a more powerful brain or a faster connection. ...</p> 		

**Audi/Volkswagen Vehicles and Services vs. U.S. Patent No. 8,682,673
"Computerized Information and Display Apparatus"**

Claim Language	IMPLEMENTATION	Literal / DOE ¹	Direct / Indirect ²
	 <p>The A3's infotainment system's guts are designed to be modular. The brains of the entire system fit into a box that's about the same size as a single-DIN CD player." [http://www.cnet.com/products/2015-audi-a3-sedan/]</p> <p><i>"Powered by Nvidia Tegra 2</i></p> <p>Individual components, such as the processor, radios, and such, can be individually upgraded by Audi without disturbing the rest of the vehicle's systems. Right now, the 2015 A3 is powered by an Nvidia Tegra 2 system on a chip with 64GB of storage space for maps, data, and more, but in 16 months, a 2016 model could just as easily be powered by a Tegra 4 with minimal retooling."</p>		

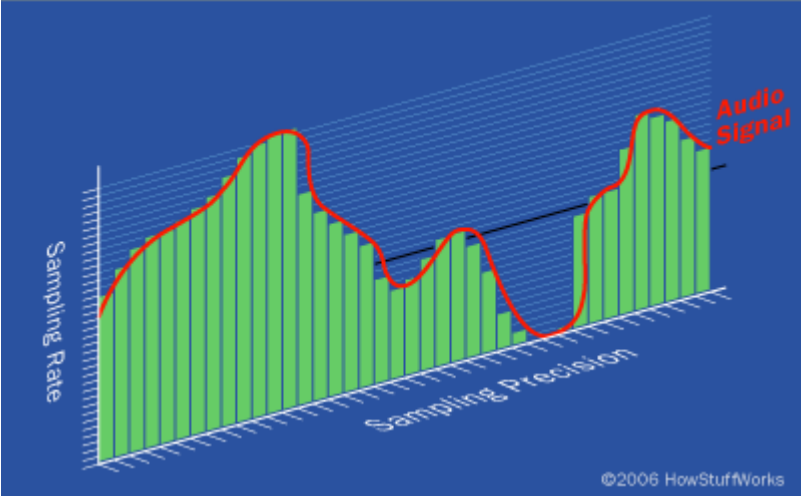

**Audi/Volkswagen Vehicles and Services vs. U.S. Patent No. 8,682,673

Thanks to its very high contrast and resolution of 800 x 480 pixels, it delivers brilliant, very sharp 3D graphics; highly efficient LEDs supply its backlighting.”[http://www.audiworld.com/articles/audi-connect-the-car-in-the-cloud/]</p>	<p>L, DOE</p>	
<p>a speech digitization apparatus in data communication with the</p>	<p>THE AUDI A3 UTILIZES VOICE DIGITIZATION FUNCTIONS IN AT LEAST THREE AREAS; (I) GOOGLE LOCAL SEARCH; (II) VEHICLE (LOCAL) COMMANDS, AND (III) MESSAGING</p>	<p>L, DOE</p>	

**Audi/Volkswagen Vehicles and Services vs. U.S. Patent No. 8,682,673
“Computerized Information and Display Apparatus”**

Claim Language	IMPLEMENTATION	Literal / DOE ¹	Direct / Indirect ²
processing apparatus;	<p>“Another new Audi connect service is the POI (Point Of Interest) search, which can be operated via the voice control system. The driver simply chooses a destination and specifies their interest – the name of a restaurant, for instance. The voice command, or “voice tag,” is converted to a small data packet that is sent to the Google search engine.” [http://www.audiworld.com/articles/audi-connect-the-car-in-the-cloud/]</p> <p>“October 11, 2012 08:00 AM Eastern Daylight Time</p> <p>BURLINGTON, Mass.--(BUSINESS WIRE)--Nuance Communications Inc. (NASDAQ: NUAN) today announced that its automotive-grade Dragon Drive! Messaging service for the connected car is powering the text message dictation in the new Audi A3, creating a hands-free messaging experience. With Audi connect Messaging, drivers can simply use their voice to dictate and send text messages while driving, as well as hear incoming text or e-mail messages.’</p> <p>...</p> <p>“Dragon Drive! Messaging’s flexible and customizable architecture enables world-leading automotive brands like Audi to deeply integrate powerful voice capabilities as part of their unique in-car experience, without compromising quality or adding dangerous distractions.”</p> <p>The Audi A3 deeply integrates Dragon Drive! Messaging as part of the in-car user interface. Drivers simply connect their phone via Bluetooth or insert their SIM card into the MMI Navigation plus to quickly and easily dictate and send text messages without having to take their hands off of the wheel. For example, just say “Dictate text message to John Smith” to quickly access the contact from a mobile address book, and then speak the message, “I am stuck in traffic and will be late for the meeting. Start without me.” The message is read to the driver, and from there they can continue dictating, edit or send the message using simple voice commands. Nuance’s natural, humanlike text-to-speech capabilities also read out incoming text and email messages, keeping Audi drivers connected to friends and family from anywhere.</p> <p>...</p> <p>Audi also integrates Nuance’s voice command and control as part of Audi’s voice user interface, letting drivers speak voice commands to search and access contacts and make calls on their phone, select Audi connect services and one-shot voice commands to input navigation address information.”</p> <p>[http://www.businesswire.com/news/home/20121011005696/en/Nuance%E2%80%99s-Dragon-Drive!-Messaging-Powers-Text-Message#.U_PAdMVdXN8]</p>

and a storage apparatus comprising at least one computer program,	<p>Figure 1. Tegra 2 Series Block Diagram</p> <p>The diagram illustrates the internal architecture of a Tegra 2 processor. At the top, two Cortex-A9 CPUs (CPU 0 and CPU 1) are connected via SCU (Snoop Control) and SEU (Bus Interface) to a PL310 L2 Cache. The cache is connected to an AXI/ARM7 Bridge and VCP2. The AXI/ARM7 Bridge connects to the AXI clif, which in turn connects to the AHB Multi-master Bus (32-bit). The AHB Multi-master Bus is connected to the MEMORY Controller, which is connected to External DRAM via the EMC. The AHB Multi-master Bus also connects to the Graphics HOST, which includes components like VI, EPP, MPE Video Encoder, OGL (3D core), 3D, ISP, and Display. The Graphics HOST is connected to the Graphics Memory Interface. The AHB Multi-master Bus also connects to the APB Bridge, which connects to the APB Peripheral Bus (32-bit). The APB Peripheral Bus connects to various peripheral controllers, including the NAND Flash Controller and NOR Flash/GMI Controller. A yellow box highlights the 'FLASH AND RAM/DRAM MEMORY INTERFACES ON TEGRA 2' and a red box highlights 'External DRAM'. Another red box highlights the 'NAND Flash Controller' and 'NOR Flash/GMI Controller'.</p> <p>[http://www.chiark.greenend.org.uk/~theom/riscos/docs/Tegra2_TRM_DP04508001v01p.pdf][http://www.pcmag.com/article2/0,2817,2455739,00.asp]</p>	L, DOE

“Computerized Information and Display Apparatus”**

Claim Language	IMPLEMENTATION	Literal / DOE ¹	Direct / Indirect ²
	<p><i>“How Voice Search works</i></p> <p>Voice Search allows you to provide a voice query to a Google search client application on a device instead of typing that query. It uses pattern recognition to transcribe spoken words to written text. For each voice query made to Voice Search, we store the language, the country, the utterance and our system’s guess of what was said. The stored audio data does not contain your Google Account ID unless you have selected otherwise. We do not send any utterances to Google unless you have indicated an intent to use the Voice Search function (for example, pressing the microphone icon in the quick search bar or in the virtual keyboard or saying “Google” when the quick search bar indicates that the Voice Search function is available). We send the utterances to Google servers in order to recognize what was said by you. We keep utterances to improve our services, including to train the system to better recognize the correct search query.”</p> <p>[https://www.google.com/policies/technologies/pattern-recognition/]</p> <p><u>“Information We Transmit or Collect</u></p> <p>When you request an Audi connect service, your Audi vehicle transmits information to us so that we can process your request. These transmissions include information about the requests you make, information that serves to identify whether your Audi vehicle is authorized to receive Audi connect services, and, as appropriate, information that identifies your personalized services such as Facebook, Twitter, and RSS feeds.</p> <p>We store information about your service requests in log files. Those records include your myAudi user ID, the services you requested, the types of requests you made, the times you requested the services, and the vehicle identification number (VIN) associated with the requests.</p> <p>You may request information (including directions, parking information, or weather) about a location, including your current location. When you do so, we transmit your Audi vehicle’s location to the appropriate content provider to process your request. We do not transmit to content providers information that directly identifies whether the location is your current location or a location distinct from where you are unless it is revealed by the nature of your request.</p> <p>...</p>		

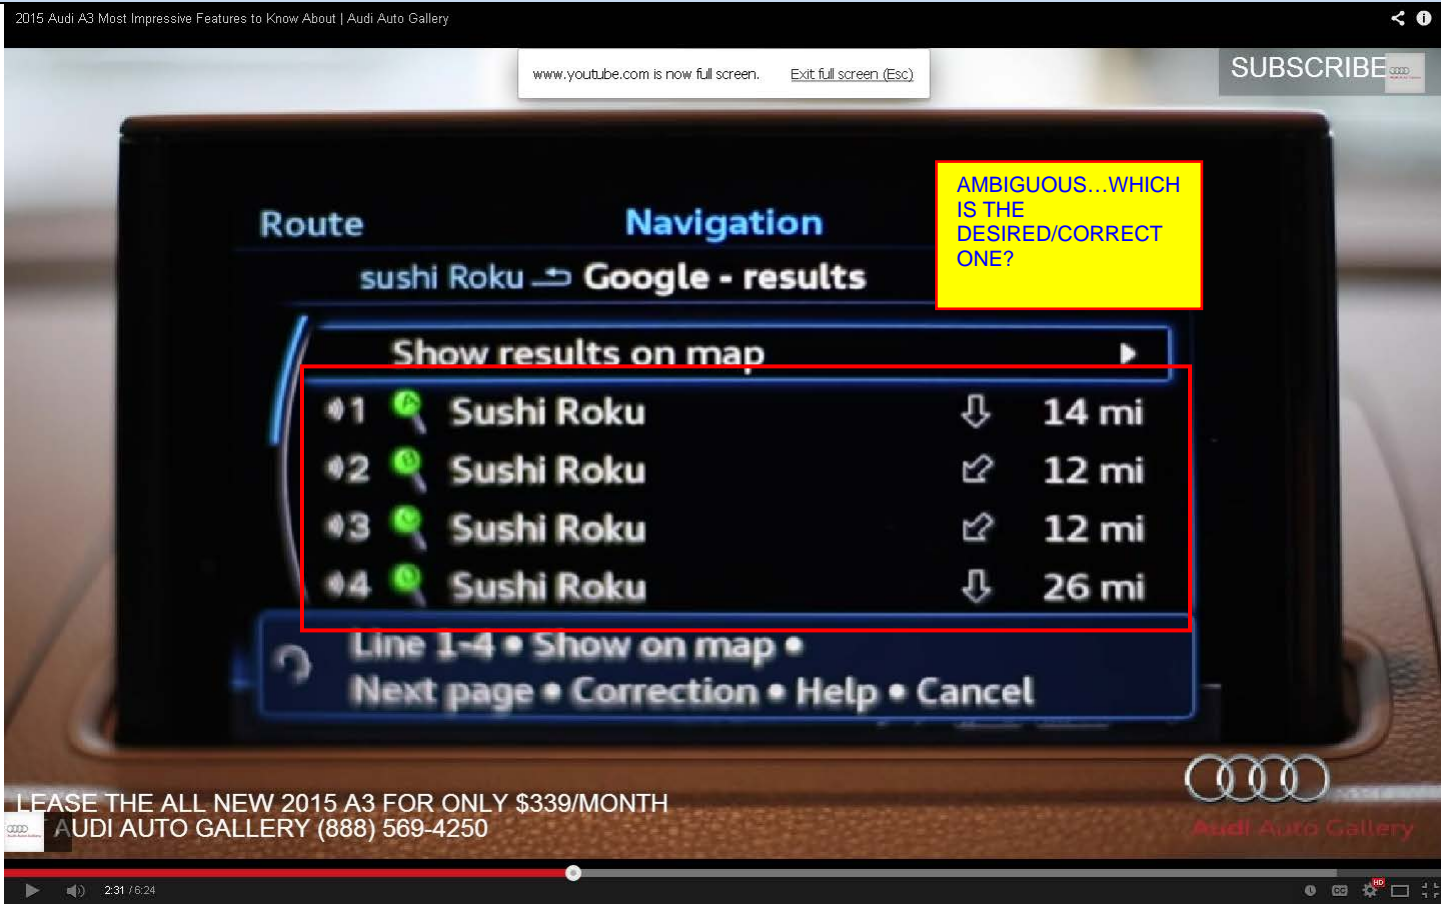

**Audi/Volkswagen Vehicles and Services vs. U.S. Patent No. 8,682,673
“Computerized Information and Display Apparatus”**

Claim Language	IMPLEMENTATION	Literal / DOE ¹	Direct / Indirect ²
	<p>After you register certain personalized services in your myAudi account (such as Facebook and Twitter), we store an access token (not your username and password) on our servers so that you need not separately log into the personalized services when you use them.</p> <p style="color: red;">We transmit information you send when using the service (such as social media messages) and information you request from Audi connect services (such as information feeds, information about parking, travel information, etc.). We do not store the content of any messages you send or access or the locations associated with any information requests that you submit.” [http://www.audiusa.com/technology/intelligence/audi-connect/connect-privacy.html]</p> <p style="color: blue;">REQUESTS FOR GOOGLE LOCAL SEARCH (“ONLINE DESTINATIONS”), WEATHER, NEWS, ETC. ARE ALL HANDLED BY AUDI CONNECT SERVERS, AT LEAST INITIALLY. TRAFFIC IS PROVIDED BY SIRIUSXM WITH SEPARATE SUBSCRIPTION, PRESUMABLY VIA SATELLITE LINK.</p> <p style="color: red;">“Audi’s IT department is also on the job whenever an Audi driver requests certain Audi connect services such as weather information or the news. Such requests are transmitted via the mobile communications network to back-end servers in Ingolstadt, which identify the vehicle in question. Requests are then forwarded to content providers, which in turn deliver data directly to the customer’s vehicle. Audi has already begun managing Audi connect data with cutting-edge precision. This is particularly intriguing in terms of the wireless use of media data via cloud computing, which Audi refers to as “seamless media.” “ [http://www.audiworld.com/articles/audi-connect-the-car-in-the-cloud/]</p> <p style="color: blue;">LTE INTERFACE ENABLES SUFFICIENT BANDWIDTH FOR E.G., GOOGLE EARTH IMAGE/STREET VIEW DOWNLOADS:</p> <p>“It was important during the development process to not only provide a high-speed Internet connection mobile devices, but also to provide high-speed Internet access for the car’s internal systems. This enables Audi connect services such as navigation with Google Earth and Google Street View to load and display much, much faster. Full integration of LTE and the associated fast transfer of data will enable the targeted expansion of the Audi connect range in the years ahead, from cloud-based music services to car-to-X services such as wireless payment or communication with traffic signals. LTE makes it possible to provide these services everywhere, even in rural areas.” [http://fourtitude.com/news/Audi_News_1/ces-2014-infotainment-audi-connect/]</p> <p style="color: blue;">NOTE THAT CLAIM 1 DOES <u>NOT</u> REQUIRE THAT THE EVALUATION AND ACCESS OCCUR AT THE SAME LOCATION (I.E., REMOTE NETWORK SERVER); HENCE, THE CLAIM LIMITATIONS WOULD BE MET BY EITHER (I) RECOGNITION IN THE VEHICLE, AND ACCESS OF THE INFORMATION REMOTELY; OR (II) REMOTE</p>

Claim Language	IMPLEMENTATION	Literal / DOE ¹	Direct / Indirect ²
	<p>“PROCESSING CPU: Qualcomm Snapdragon™ 800, 2.26GHz processor GPU: Adreno 330, 450MHz” [https://support.google.com/nexus/answer/3467463?hl=en]</p> <p>“Snapdragon 800</p> <p>Beyond its cellular connectivity, the Nexus 5 is meaningful for sporting the fastest Android-compatible SoC in 2013, Qualcomm's Snapdragon 800. At almost 2.3 GHz, its Krait 400 cores represent a significant speed-up compared to the APQ8064's 1.5 GHz Krait 200 architecture.</p> <p>The fact that Google's sub-\$400 Nexus 5 has this SoC comes as somewhat of a surprise considering that quite a few premium Snapdragon 600-based phones were released only a few months prior. When the Nexus 5 launched in late October, it became one of the first widely available Snapdragon 800-based devices in the U.S. market. Putting such a premium SoC in this phone means no performance compromises were made. Apparently, Google wants its customers to experience the very best that Android has to offer on the company's own branded line of devices.</p>

	<div style="display: flex; justify-content: space-between;"> <div style="width: 45%;"> <p>Krait 400 CPU features 28HPm process technology superior 2GHz+ performance</p> <p>Adreno 330 for advanced graphics</p> <p>Hexagon QDSP6 for ultra low power applications and custom programmability</p> <p>Integrated Gobi 4G LTE World Mode¹, 802.11ac¹, USB 3.0 and BT 4.0 offers broad array of high speed connectivity</p> </div> <div style="width: 45%; text-align: center;"> </div> <div style="width: 45%;"> <p>Ultra HD Capture and Playback DTS-HD and Dolby Digital Plus audio Expanded Gestures</p> <p>Low-power Snapdragon Sensor Core increases sensor accuracy and efficiency</p> <p>21MP with dual ISP</p> <p>Support for up to 2560x2048 display Miracast 1080p HD support</p> <p>IZat GNSS with support for three GPS constellations</p> </div> </div> <p>On paper, the Snapdragon 800 SoC offers a lot potential performance. Some of this is related to hardware accelerators, but the Adreno 330 graphics core is largely responsible for its alacrity in games. Nvidia's Tegra K1 has us talking about a future with console-quality games on smartphones, but at least today, titles written for Android run very smoothly at maxed out quality settings on the Adreno engine. Recent releases like <i>Asphalt 8: Airborne</i>, <i>Riptide GP 2</i>, and <i>Grand Theft Auto: San Andrea</i> run exceedingly well at maxed out settings, while slightly older games like <i>Real Racing 3</i>, <i>Shadowgun</i>, and <i>Riptide GP</i> appear smoother than ever. I was frankly quite surprised at the improvement, having previously come from a Xiaomi MI-2 with its Snapdragon S4 Pro/Adreno 320 SoC.” [http://www.tomshardware.com/reviews/google-nexus-5-smartphone,3720.html]</p>

Claim Language	IMPLEMENTATION	Literal / DOE ¹	Direct / Indirect ²
	<p style="text-align: center;">DIRECTIONS OR DIRECTIONSSERVICE API PROVIDES DIRECTIONS.</p> <p>Overview</p> <p>You can calculate directions (using a variety of methods of transportation) by using the <code>DirectionsService</code> object. This object communicates with the Google Maps API Directions Service which receives direction requests and returns computed results. You may either handle these directions results yourself or use the <code>DirectionsRenderer</code> object to render these results.</p> <p>Directions may specify origins and destinations either as text strings (e.g. "Chicago, IL" or "Darwin, NSW, Australia") or as <code>LatLng</code> values. The Directions service can return multi-part directions using a series of waypoints. Directions are displayed as a polyline drawing the route on a map, or additionally as a series of textual description within a <code><div></code> element (e.g. "Turn right onto the Williamsburg Bridge ramp").</p> <p>Directions Requests</p> <p>Accessing the Directions service is asynchronous, since the Google Maps API needs to make a call to an external server. For that reason, you need to pass a <code>callback</code> method to execute upon completion of the request. This callback method should process the result(s). Note that the Directions service may return more than one possible itinerary as an array of separate <code>routes []</code>.</p> <p>https://developers.google.com/maps/documentation/javascript/directions</p>

Claim Language	IMPLEMENTATION	Literal / DOE ¹	Direct / Indirect ²
	<p>“Discover Media”, the radio-navigation system with 6.5-inch display: Compared to the first generation, performance of the CPU (main processor) was more than doubled from 950 MIPS (million instructions per second) to 2,500 MIPS. ...</p> <p>4. MirrorLink™. For the first time in the Passat, MirrorLink™ is available – from the “Composition Media” it is optional, in the “Discover Pro” it is standard. MirrorLink™ makes it possible to integrate numerous apps or functions of Android smart phones into the infotainment system. Related apps will be offered directly from Volkswagen and from third party suppliers. The Volkswagen apps: “Mobile Office”, “audioMOTION”, “ThinkBlue. Trainer”, “Shared Audio”, “Drive&Track” and “My Guide”. Third party apps include “Audioteka” (audio books), “Glympse” (social media), “Aupeo!” (Internet radio), “Life360” (family locator) and “Kaliki” (news).”</p> <p>http://www.vwvortex.com/news/volkswagen-news/detail-new-passat-generation-8-2/</p> <p>HENCE, MIB-II SYSTEM HAS CPU, GPU, ETC. IN COMMUNICATION WITH EXEMPLARY ANDROID SMARTPHONE VIA USB.</p> <p>EXEMPLARY NEXUS 5 ANDROID SMARTPHONE (USED FOR PURPOSES OF ILLUSTRATION – OTHER ANDROID PHONES ARE EQUALLY APPLICABLE) HAS NUMEROUS PROCESSING APPARATUS WHICH, INTER ALIA, SUPPORT THE FUNCTIONS OF THE MIRRORLINK SYSTEM:</p> <p>“PROCESSING CPU: Qualcomm Snapdragon™ 800, 2.26GHz processor GPU: Adreno 330, 450MHz” [https://support.google.com/nexus/answer/3467463?hl=en]</p> <p>“Snapdragon 800</p> <p>Beyond its cellular connectivity, the Nexus 5 is meaningful for sporting the fastest Android-compatible SoC in 2013, Qualcomm's Snapdragon 800. At almost 2.3 GHz, its Krait 400 cores represent a significant speed-up compared to the APQ8064's 1.5 GHz Krait 200 architecture.</p> <p>The fact that Google's sub-\$400 Nexus 5 has this SoC comes as somewhat of a surprise considering that quite a few premium Snapdragon 600-based phones were released only a few months prior. When the Nexus 5 launched in late October, it became one of the first widely available Snapdragon 800-based devices in the U.S. market. Putting such a premium SoC in this phone means no performance compromises were made. Apparently, Google wants its customers to experience the very best that Android has to offer on the company's own branded line of devices.</p>

**Audi/Volkswagen Vehicles and Services vs. U.S. Patent No. 8,682,673
"Computerized Information and Display Apparatus"**

Claim Language	IMPLEMENTATION	Literal / DOE ¹	Direct / Indirect ²
	<p>7) Service is available soon</p> <p>The mobile online service (Car-Net) can only be used with the optional Discover Media and Discover Pro equipment. A mobile terminal (e.g. smartphone) with the ability to act as a mobile WLAN hotspot is also required. Alternatively, a mobile phone with a remote SIM Access Profile (rSAP) or a SIM card with call and data options can be used with the "Premium mobile phone interface" option. The Car-Net service is available only with an existing mobile phone contract or one which must be separately established between you and your mobile service provider, and only within the coverage of the individual mobile phone network. Additional fees (e.g. roaming charges) may arise when receiving data from the internet, depending on your particular mobile phone tariff and especially when using the service abroad. Due to the accumulation of data when using the Car-Net service, it is strongly recommended that you organise an unlimited data plan with your mobile service provider.</p> <p>A separate contract with Volkswagen AG must be set up online in order to use Car-Net. After the vehicle handover, the customer has 90 days to register the vehicle at [http://volkswagen-carnet.com/uk/en/start/online-devices.html#tab/open/app-connect]</p> <p>NOTE THAT CAR-NET SERVICE IS STANDARD ON GOLF GTI, BUT REQUIRES PRESENCE OF WIRELESS CONNECTION (E.G., CELLULAR SMARTPHONE WITH WI-FI HOTSPOT CAPABILITY, WHICH IMPLIES THAT CAR DOES NOT HAVE ITS OWN INDIGENOUS CELLULAR MODEM.</p>		
<p>receive a digitized speech input from the speech digitization apparatus, the input relating to desired information which a user wishes to locate;</p>	<p>SEE FOLLOWING EXEMPLARY HTC-BASED ILLUSTRATION OF THE MIRRORLINK-ENABLED MIB-II IN 2015 GOLF GTI (OUTSIDE U.S.):</p> <p>https://www.youtube.com/watch?v=6J5KNaaVRoQ</p>  <p>The image shows the infotainment screen of a 2015 VW Golf GTI. The screen displays a MirrorLink interface with several icons. A yellow box highlights the 'VW MIRRORLINK POI APP' icon, and a red box highlights the VW logo icon. The screen also shows 'People', 'Internet Radio', and 'Settings' icons. The time is 2:46 AM.</p>	<p>L, DOE</p>	

Audi/Volkswagen Vehicles and Services vs. U.S. Patent No. 8,682,673
 "Computerized Information and Display Apparatus"

Claim Language	IMPLEMENTATION	Literal / DOE ¹	Direct / Indirect ²
	 <p data-bbox="1260 646 1608 906"> USER SELECTS VW MIRRORLINK POI APP, THEN "BARS AND RESTAURANTS" SUB-FUNCTION. NOTE THAT EACH OF THE FOREGOING CAN BE ACCOMPLISHED VIA VOICE COMMAND, AS NOTED ABOVE </p>		

**Audi/Volkswagen Vehicles and Services vs. U.S. Patent No. 8,682,673
“Computerized Information and Display Apparatus”**

Claim Language	IMPLEMENTATION	Literal / DOE ¹	Direct / Indirect ²
<p>cause evaluation of the digitized speech input to identify one or more words or word strings within the digitized input, and access of a remote networked entity to obtain the desired information,</p>	<p>THE MIB-II SYSTEM CONTAINS INDIGENOUS VOICE RECOGNITION CAPABILITY (SEE ABOVE REGARDING DISCUSSION OF EXTRA-U.S. PREDECESSOR), AS DO GOOGLE REMOTE SERVERS. HENCE, THE USER’S VOICE INPUT IS, DEPENDING ON CONFIGURATION, EITHER:</p> <p>(I) LOCALLY DIGITIZED AND SENT TO A REMOTE GOOGLE SERVER FOR RECOGNITION AND FURTHER SEARCH AND PROCESSING; OR</p> <p>(II) LOCALLY RECOGNIZED AND THE RESULTS OF THE RECOGNITION SENT TO A REMOTE GOOGLE SERVER (E.G., AS DIGITAL REPRESENTATION OF TEXT) FOR FURTHER SEARCH AND PROCESSING.</p> 	L, DOE	
<p>the obtainment of the desired information further comprising: causing identification of a plurality of possible matches to said input;</p>		L, DOE	

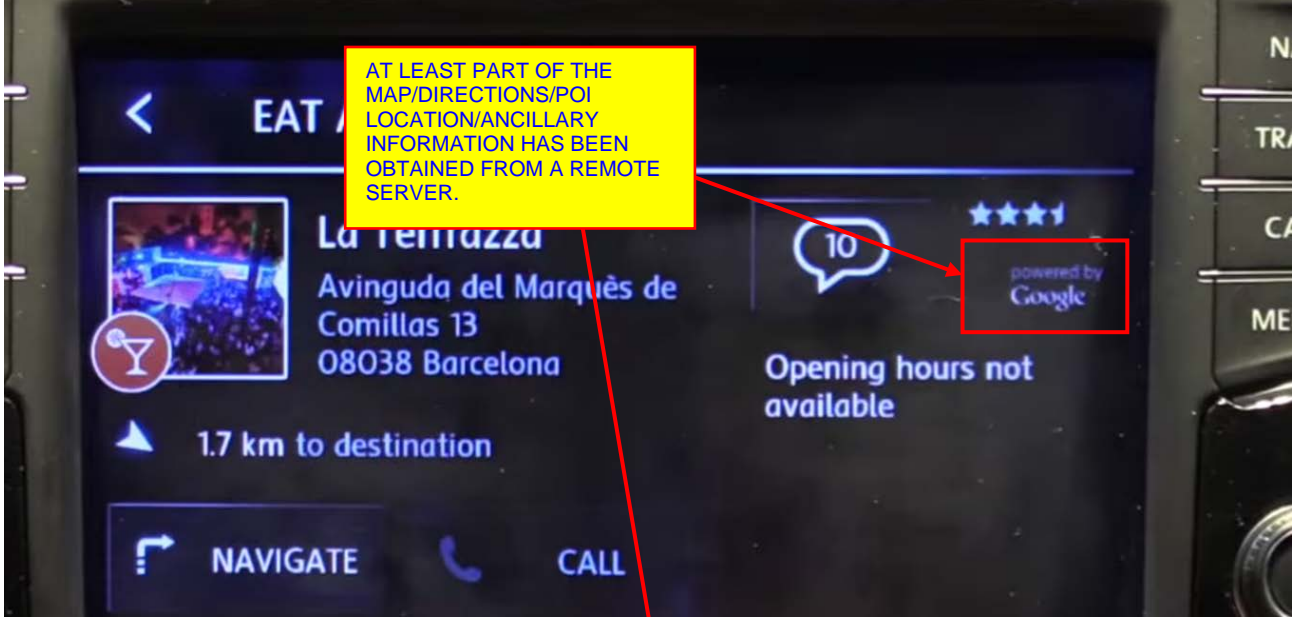

**Audi/Volkswagen Vehicles and Services vs. U.S. Patent No. 8,682,673
“Computerized Information and Display Apparatus”**

Claim Language	IMPLEMENTATION	Literal / DOE ¹	Direct / Indirect ²
<p>and receipt of further user input regarding at least one of the plurality of possible matches to identify at least one of the matches that is of interest to the user;</p>		L, DOE

a speech digitization apparatus in data communication with the processing apparatus;	<p data-bbox="367 868 1764 933">2016 Q7 HAS EMBEDDED MICROPHONE AND SPEECH PROCESING HARDWARE/SOFTWARE RUNNING ON THE MMI FOR E.G., VOICE CONTROL AND NAVIGATION FUNCTIONS, AS SHOWN BELOW:</p> 		

**Audi/Volkswagen Vehicles and Services vs. U.S. Patent No. 8,682,673
“Computerized Information and Display Apparatus”**

Claim Language	IMPLEMENTATION	Literal / DOE ¹	Direct / Indirect ²
	<p>“The voice recognition system is said to be much simpler. Drivers no longer have to stick to predefined commands. The system understands phrasings from everyday language, meaning that hundreds of command variations are possible for each function. In the telephone menu, calling a contact is as easy as saying “I want to talk to Peter” or “Connect me to Peter.” But the navigation system also reacts to simple commands such as “Where can I get gas?” or “I want to eat something.””</p> <p>http://www.motorauthority.com/news/1088667_2016-audi-q7-revealed-at-2015-detroit-auto-show-live-photos-video</p>		
<p>and a storage apparatus comprising at least one computer program, said at least one program being configured to, when executed on a processing apparatus:</p>	<p>SEE DISCUSSION BELOW REGARDING DETAILS ON 2015 AUDI A3 (MIB-BASED MMI SYSTEM BELIEVED TO BE FUNCTIONALLY SIMILAR TO WHAT WILL BE INSTALLED IN 2016 Q7 WHEN SOLD IN LATER 2015).</p> <p>“The Audi Q7 also sets standards with respect to the operating concept, infotainment, connectivity and driver assistance systems. The second-generation modular infotainment platform is on board, as is the Audi virtual cockpit. The new MMI all-in-touch control unit with large touchpad makes operation child's play.”</p> <p>http://www.audiusa.com/newsroom/news/press-releases/2014/12/the-new-audi-q7-sportiness-efficiency-premium-comfort</p> <p>AS DISCUSSED BELOW, MIB/MMI WITH CONNECT ARCHITECTURE IS MODULAR, AND INCLUDES AN NVIDIA TEGRA (2 OR 3) PROCESSOR AND VARIOUS STORAGE DEVICES SUCH AS HDD, RAM, CACHES, ETC. BOTH SUPPORTING TEGRA CHIP AND OTHER COMPONENTS. THE NAVIGATION AND INFORMATION-PROVIDING ALGORITHMS, AS WELL AS RELEVANT DATA, ETC., ARE RESIDENT ON THESE STORAGE DEVICES (“STORAGE APPARATUS COMPRISING AT LEAST ONE COMPUTER PROGRAM...” REFERENCED BELOW).</p>		

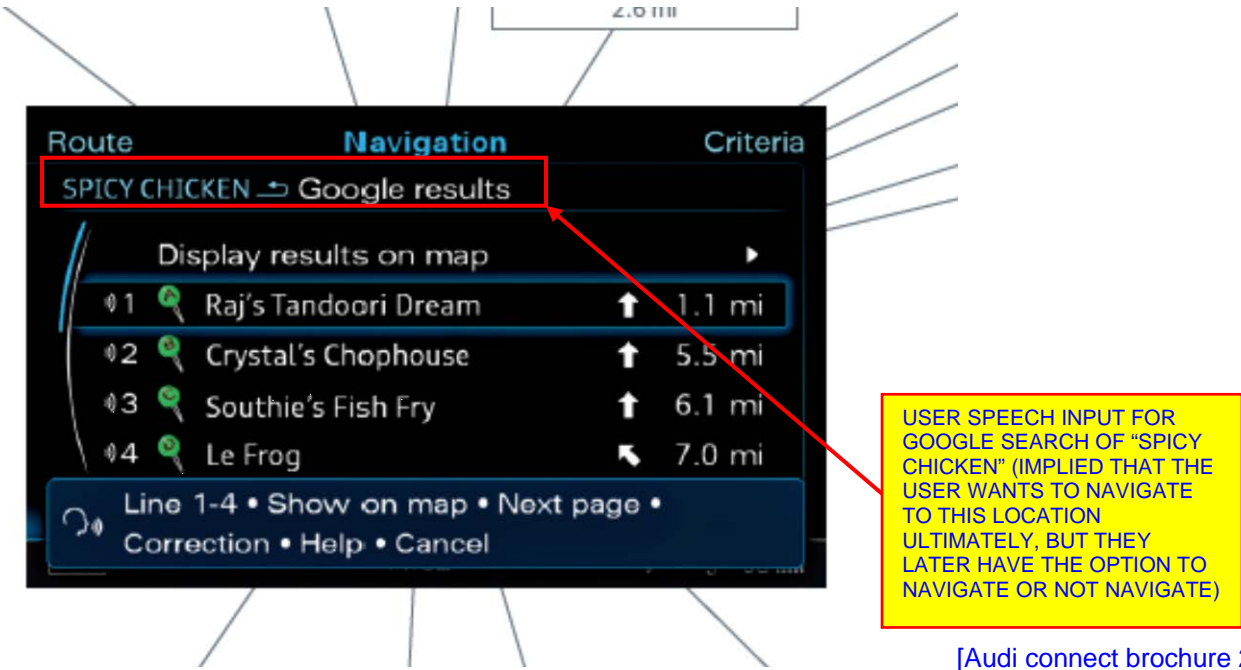

**Audi/Volkswagen Vehicles and Services vs. U.S. Patent No. 8,682,673
“Computerized Information and Display Apparatus”**

Claim Language	IMPLEMENTATION	Literal / DOE ¹	Direct / Indirect ²
<p>receive a digitized speech input from the speech digitization apparatus, the input relating to desired information which a user wishes to locate;</p>	 <p>AS BUT ONE EXAMPLE, CONSIDER THE CLAIMED “DESIRED FUNCTION” TO BE FINDING THE LOCATION/DIRECTIONS TO A RESTAURANT VIA THE “GOOGLE SEARCH” FUNCTION OF THE CONNECT SYSTEM (E.G., USER SAYS A SEARCH TERM UNDER THE “NAVIGATION/ONLINE DESTINATIONS” FUNCTION TO FIND A DESIRED RESTAURANT) – DEMONSTRATED ON 2015 A3 WITH MMI/CONNECT BELOW, WHICH IS BELIEVED TO HAVE SIMILAR/IDENTICAL FUNCTIONALITY TO INCIPIENT 2016 Q7:</p>

“Computerized Information and Display Apparatus”**

Claim Language	IMPLEMENTATION	Literal / DOE ¹	Direct / Indirect ²
	<p style="text-align: center;">Your destiny is on the tip of your tongue.</p> <div style="border: 1px solid red; padding: 5px;"> <p>Google Voice™ Local Search allows you to easily search via voice commands for restaurants, historical landmarks and places of interest, both near and far.³ Imagine entering a destination address by just speaking the words—Audi connect® makes that possible. With the power of Google™ on the tip of your tongue, Audi connect brings a vast Internet database to you with the advanced engineering and style of Audi. The same ease of use and thorough location search capability you’ve come to expect from Google™ rolled into your every commute.</p> <p>Search nearby and faraway points of interest with the power of Google Voice™ Local Search. Need to take the client out for nine holes? Just tell Audi connect “golf course.” Looking for a meal with a little kick? Just ask for “spicy chicken”—Google™ will populate your navigation display with restaurants or descriptions that match the phrase you speak. Select the destination that best suits your appetite, and style, and your Audi MMI® navigation system will guide you there in clear and accurate detail. More than just a companion on the road, Audi connect, once you use it, will become an integral part of the family.</p> </div>

<p>said at least one program being configured to:</p>	<p>THE A3 INFORMATION SYSTEM IS SOFTWARE/FIRMWARE CONTROLLED, AND HENCE ITS COMPUTER PROGRAMS ARE EXECUTED ON THE PROCESSOR(S) TO, <i>INTER ALIA</i>, RENDER DISPLAYS/GRAPHICS, GENERATE MENUS, ETC.</p>	<p>L, DOE</p>	

**Audi/Volkswagen Products vs. U.S. Patent No. 8,296,146
“COMPUTERIZED INFORMATION PRESENTATION APPARATUS”**

Claim Language	Audi/Volkswagen Implementation	Literal / DOE ¹	Direct / Indirect ²
	<p>“The central computer in the modular infotainment platform, such as the one Audi currently uses, comprises two units: the Radio Car Control Unit and what is known as the MMX board (MMX: Multi-Media eXtension). The latter is a high-performance plug-in module which integrates – in addition to the RAM and flash-memory modules – the latest Tegra processor from Nvidia. It handles all voice control, online, media, navigation and telephone functions. The new modular layout makes it easy to update the hardware; the fact that the MMX board can be replaced keeps the system at the cutting edge of technology.” http://www.audiworld.com/articles/audi-connect-the-car-in-the-cloud/</p>		
<p>receive a digitized representation of a speech input of the user of the transport apparatus via a speech recognition apparatus in communication with the computerized information system,</p>	<p>THE AUDI A3 UTILIZES VOICE DIGITIZATION APPARATUS/FUNCTIONS IN AT LEAST THREE AREAS; (I) GOOGLE LOCAL SEARCH; (II) VEHICLE (LOCAL) COMMANDS, AND (III) MESSAGING; THESE INPUTS ARE RECEIVED VIA A MICROPHONE BUILT INTO THE VEHICLE:</p> <p>“Another new Audi connect service is the POI (Point Of Interest) search, which can be operated via the voice control system. The driver simply chooses a destination and specifies their interest – the name of a restaurant, for instance. The voice command, or “voice tag,” is converted to a small data packet that is sent to the Google search engine.” [http://www.audiworld.com/articles/audi-connect-the-car-in-the-cloud/]</p> <p>“October 11, 2012 08:00 AM Eastern Daylight Time</p> <p>BURLINGTON, Mass.--(BUSINESS WIRE)--Nuance Communications Inc. (NASDAQ: NUAN) today announced that its automotive-grade Dragon Drive! Messaging service for the connected car is powering the text message dictation in the new Audi A3, creating a hands-free messaging experience. With Audi connect Messaging, drivers can simply use their voice to dictate and send text messages while driving, as well as hear incoming text or e-mail messages.’</p> <p>...</p> <p>“Dragon Drive! Messaging’s flexible and customizable architecture enables world-leading automotive brands like Audi to deeply integrate powerful voice capabilities as part of their unique in-car experience, without compromising quality or adding dangerous distractions.”</p> <p>The Audi A3 deeply integrates Dragon Drive! Messaging as part of the in-car user interface. Drivers simply connect their phone via Bluetooth or insert their SIM card into the MMI Navigation plus to quickly and easily dictate and send text messages without having to take their hands off of the wheel. For example, just say “Dictate text message to John Smith” to quickly access the contact from a mobile address book, and then speak the message, “I am stuck in</p>	<p>L, DOE</p>

It uses pattern recognition to transcribe spoken words to written text. For each voice query made to Voice Search, we store the language, the country, the utterance and our system’s guess of what was said. The stored audio data does not contain your Google Account ID unless you have selected otherwise. We do not send any utterances to Google unless you have indicated an intent to use the Voice Search function (for example, pressing the microphone icon in the quick search bar or in the virtual keyboard or saying “Google” when the quick search bar indicates that the Voice Search function is available). We send the utterances to Google servers in order to recognize what was said by you. We keep utterances to improve our services, including to train the system to better recognize the correct search query.” https://www.google.com/policies/technologies/pattern-recognition/</p>		A4	A5	A6	A7	A8	Q5	Q7	A3	Navigation & mobility									SiriusXM® Traffic ¹	■	■	■	■	■	■	■	■	Navigation with Google Earth™	■	■	■	■	■	■	■	■	Google Maps Street View ²	■	■	■	■	■	■	■	■	Picture navigation								■	myAudi Destinations	■	■	■	■	■	■	■	■	Google Voice™ Local Search ³	■	■	■	■	■	■	■	■	Map update via SD card								■

Claim Language	Audi/Volkswagen Implementation	Literal / DOE ¹	Direct / Indirect ²
	<p>2. Faster processors. The new generation of devices is characterised by better system performance. Consider the “Discover Media”, the radio-navigation system with 6.5-inch display: Compared to the first generation, performance of the CPU (main processor) was more than doubled from 950 MIPS (million instructions per second) to 2,500 MIPS. ...</p> <p>4. MirrorLink™. For the first time in the Passat, MirrorLink™ is available – from the “Composition Media” it is optional, in the “Discover Pro” it is standard. MirrorLink™ makes it possible to integrate numerous apps or functions of Android smart phones into the infotainment system. Related apps will be offered directly from Volkswagen and from third party suppliers. The Volkswagen apps: “Mobile Office”, “audioMOTION”, “ThinkBlue. Trainer”, “Shared Audio”, “Drive&Track” and “My Guide”. Third party apps include “Audioteka” (audio books), “Glympse” (social media), “Aupeo!” (Internet radio), “Life360” (family locator) and “Kaliki” (news).”</p> <p>http://www.vwvortex.com/news/volkswagen-news/detail-new-passat-generation-8-2/</p> <p>HENCE, MIB-II SYSTEM HAS CPU, GPU, ETC. IN COMMUNICATION WITH EXEMPLARY ANDROID SMARTPHONE VIA USB.</p> <p>EXEMPLARY NEXUS 5 ANDROID SMARTPHONE (USED FOR PURPOSES OF ILLUSTRATION – OTHER ANDROID PHONES ARE EQUALLY APPLICABLE) HAS NUMEROUS PROCESSING AND STORAGE APPARATUS WHICH, INTER ALIA, SUPPORT THE FUNCTIONS OF THE MIRRORLINK SYSTEM:</p> <p>“PROCESSING CPU: Qualcomm Snapdragon™ 800, 2.26GHz processor GPU: Adreno 330, 450MHz” [https://support.google.com/nexus/answer/3467463?hl=en]</p> <p>“Snapdragon 800</p> <p>Beyond its cellular connectivity, the Nexus 5 is meaningful for sporting the fastest Android-compatible SoC in 2013, Qualcomm's Snapdragon 800. At almost 2.3 GHz, its Krait 400 cores represent a significant speed-up compared to the APQ8064's 1.5 GHz Krait 200 architecture.</p> <p>The fact that Google's sub-\$400 Nexus 5 has this SoC comes as somewhat of a surprise considering that quite a few premium Snapdragon 600-based phones were released only a few months prior. When the Nexus 5 launched in late October, it became one of the first widely available Snapdragon 800-based devices in the U.S. market. Putting such a premium SoC in this phone means no performance compromises were made. Apparently, Google wants its customers to experience the very best that Android has to offer on the company's own branded line of devices.</p>

	<div style="display: flex; justify-content: space-between;"> <div style="width: 45%;"> <p>Krait 400 CPU features 28HPm process technology superior 2GHz+ performance</p> <p>Adreno 330 for advanced graphics</p> <p>Hexagon QDSP6 for ultra low power applications and custom programmability</p> <p>Integrated Gobi 4G LTE World Mode¹, 802.11ac¹, USB 3.0 and BT 4.0 offers broad array of high speed connectivity</p> </div> <div style="width: 45%; text-align: center;"> </div> <div style="width: 45%;"> <p>Ultra HD Capture and Playback DTS-HD and Dolby Digital Plus audio Expanded Gestures</p> <p>Low-power Snapdragon Sensor Core increases sensor accuracy and efficiency</p> <p>21MP with dual ISP</p> <p>Support for up to 2560x2048 display Miracast 1080p HD support</p> <p>IZat GNSS with support for three GPS constellations</p> </div> </div> <p>On paper, the Snapdragon 800 SoC offers a lot potential performance. Some of this is related to hardware accelerators, but the Adreno 330 graphics core is largely responsible for its alacrity in games. Nvidia's Tegra K1 has us talking about a future with console-quality games on smartphones, but at least today, titles written for Android run very smoothly at maxed out quality settings on the Adreno engine. Recent releases like <i>Asphalt 8: Airborne</i>, <i>Riptide GP 2</i>, and <i>Grand Theft Auto: San Andrea</i> run exceedingly well at maxed out settings, while slightly older games like <i>Real Racing 3</i>, <i>Shadowgun</i>, and <i>Riptide GP</i> appear smoother than ever. I was frankly quite surprised at the improvement, having previously come from a Xiaomi MI-2 with its Snapdragon S4 Pro/Adreno 320 SoC.” [http://www.tomshardware.com/reviews/google-nexus-5-smartphone,3720.html]</p> <p>THE CPU/GPU OF THE MIB-II SYSTEM AND EXEMPLARY SMARTPHONE COORDINATE VIA THE USB CABLE (USING INTERNET PROTOCOL OVER TOP OF THE USB PROTOCOL) TO PROVIDE, AMONG OTHER THINGS, THE EMULATION OF THE PHONE’S DISPLAY AND FUNCTIONS ON THE VEHICLE TOUCHSCREEN DISPLAY.</p> <p>SEE ABOVE; THE MIB-II SYSTEM AND EXEMPLARY SMARTPHONE, WHEN CONNECTED, COMPRISE NUMEROUS PROCESSORS, MEMORY (E.G., RAM, ROM, FLASH), SOFTWARE, FIRMWARE, ETC. 	<p>7) Service is available soon</p> <p>The mobile online service (Car-Net) can only be used with the optional Discover Media and Discover Pro equipment. A mobile terminal (e.g. smartphone) with the ability to act as a mobile WLAN hotspot is also required. Alternatively, a mobile phone with a remote SIM Access Profile (rSAP) or a SIM card with call and data options can be used with the "Premium mobile phone interface" option. The Car-Net service is available only with an existing mobile phone contract or one which must be separately established between you and your mobile service provider, and only within the coverage of the individual mobile phone network. Additional fees (e.g. roaming charges) may arise when receiving data from the internet, depending on your particular mobile phone tariff and especially when using the service abroad. Due to the accumulation of data when using the Car-Net service, it is strongly recommended that you organise an unlimited data plan with your mobile service provider.</p> <p>A separate contract with Volkswagen AG must be set up online in order to use Car-Net. After the vehicle handover, the customer has 90 days to register the vehicle at http://volkswagen-carnet.com/int/en/start/online-devices.html#tab/open/mirror-link</p> <p>NOTE THAT CAR-NET SERVICE IS STANDARD ON GOLF GTI, BUT REQUIRES PRESENCE OF WIRELESS CONNECTION (E.G., CELLULAR SMARTPHONE WITH WI-FI HOTSPOT CAPABILITY, WHICH IMPLIES THAT CAR DOES NOT HAVE ITS OWN INDIGENOUS CELLULAR MODEM.</p>

**Audi/Volkswagen Products vs. U.S. Patent No. 8,296,146
“COMPUTERIZED INFORMATION PRESENTATION APPARATUS”**

Claim Language	Audi/Volkswagen Implementation	Literal / DOE ¹	Direct / Indirect ²
	 <p>http://volkswagen-carnet.com/int/en/start/online-devices.html#130411dc-254f-4d9e-b8d6-e61f322d0417</p>		
<p>the speech input relating to a desired function to be performed by the computerized information system;</p>	<p>SEE FOLLOWING EXEMPLARY HTC-BASED ILLUSTRATION OF THE MIRRORLINK-ENABLED MIB-II IN 2015 GOLF GTI (OUTSIDE U.S.), WHEREIN EXAMPLE OF “DESIRED FUNCTION” (E.G., LOCATING A BAR/RESTAURANT) IS DEMONSTRATED – NOTE THAT THE SEARCH CAN BE CONDUCTED USING VOICE AS WELL:</p> <p>https://www.youtube.com/watch?v=6J5KNaaVRoQ</p>	<p>L, DOE</p>	

**Audi/Volkswagen Products vs. U.S. Patent No. 8,296,146
 “COMPUTERIZED INFORMATION PRESENTATION APPARATUS”**

Claim Language	Audi/Volkswagen Implementation	Literal / DOE ¹	Direct / Indirect ²
	<p>The top screenshot displays a home screen with a digital clock (2:46 AM), weather, and music information. Below these are four large touchable icons: Navigation (a location pin with a fork and knife), Dialer (a telephone handset), Music (a pair of headphones), and Speak (a microphone icon). A yellow callout box with red arrows points to the Navigation and Speak icons, containing the text: "NATIVE VOICE AND NAVIGATION FUNCTIONS WITHIN SMARTPHONE APPLICATION ENVIRONMENT".</p> <p>The bottom screenshot shows a screen with three large icons: People (a person silhouette), Internet Radio (a radio tower), and Settings (a gear). Below these are four smaller icons, the first of which is the Volkswagen logo. A yellow callout box with a red arrow points to the VW logo icon, containing the text: "VW MIRRORLINK POI APP".</p>		

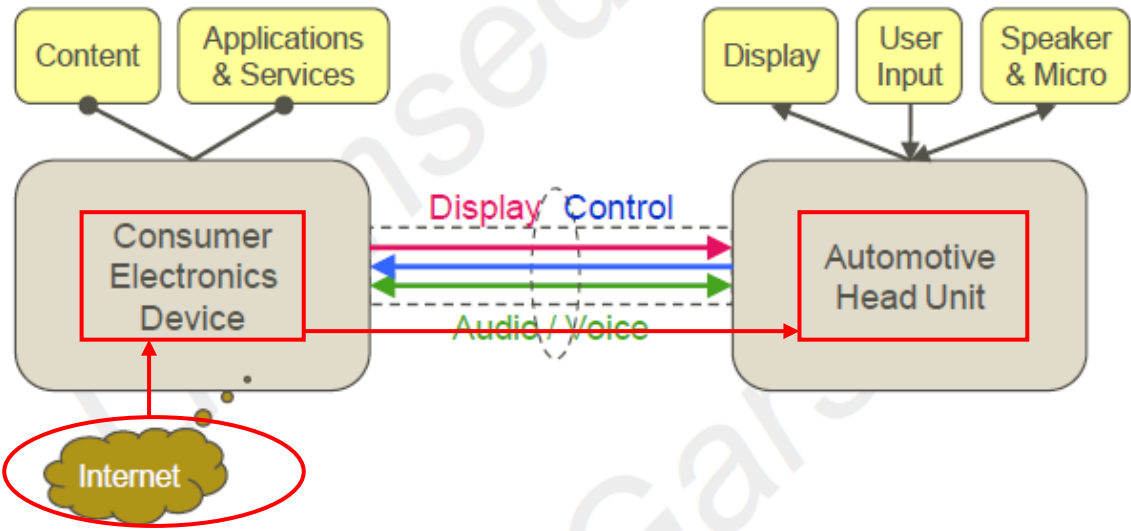

**Audi/Volkswagen Products vs. U.S. Patent No. 8,296,146
 “COMPUTERIZED INFORMATION PRESENTATION APPARATUS”**

Claim Language	Audi/Volkswagen Implementation	Literal / DOE ¹	Direct / Indirect ²
	 <p data-bbox="1297 717 1644 979" style="background-color: yellow; border: 1px solid red; padding: 5px;">USER SELECTS VW MIRRORLINK POI APP, THEN “BARS AND RESTAURANTS” SUB-FUNCTION. NOTE THAT EACH OF THE FOREGOING CAN BE ACCOMPLISHED VIA VOICE COMMAND, AS NOTED ABOVE</p>		

**Audi/Volkswagen Products vs. U.S. Patent No. 8,296,146
 “COMPUTERIZED INFORMATION PRESENTATION APPARATUS”**

Claim Language	Audi/Volkswagen Implementation	Literal / DOE ¹	Direct / Indirect ²
	 <p style="text-align: right; background-color: yellow; border: 1px solid black; padding: 5px;">USER SELECTS FIRST LISTED BAR/RESTAURANT (LA TERRAZZA), WHICH AS NOTED, WAS OBTAINED BY GOOGLE SEARCH (I.E., ACCESS TO REMOTE SERVER VIA WIRELESS INTERFACE OF SMARTPHONE)</p>		

**Audi/Volkswagen Products vs. U.S. Patent No. 8,296,146
 “COMPUTERIZED INFORMATION PRESENTATION APPARATUS”**

Claim Language	Audi/Volkswagen Implementation	Literal / DOE ¹	Direct / Indirect ²
<p>cause wireless access of a network in order to access information stored on a remote server and necessary to perform the desired function;</p>	<p>THE VW MIB-II RECEIVES THE INFORMATION FROM THE REMOTE SERVER VIA THE WIRELESS INTERFACE OF THE SMARTPHONE, AND THEN VIA USB CONNECTION BETWEEN PHONE AND VEHICLE:</p>  <p>8 ["Car Connectivity Consortium," April 28, 2015]</p>	<p>L, DOE</p>	

**Audi/Volkswagen Products vs. U.S. Patent No. 8,296,146
 “COMPUTERIZED INFORMATION PRESENTATION APPARATUS”**

Claim Language	Audi/Volkswagen Implementation	Literal / DOE ¹	Direct / Indirect ²
<p>receive accessed information obtained from the remote server via the wireless interface;</p>	 <p>The implementation consists of two screenshots from a car's infotainment system. The top screenshot shows a search results page titled 'EAT AND DRINK Bars' with a list of four bars: La Terrazza (1.7 km), Koitton Club (1.9 km), Bartol (2.5 km), and Las Torres (2.6 km). A red box highlights the first bar, and a red circle highlights the 'powered by Google' logo. The bottom screenshot shows a detailed view of 'La Terrazza' with its address, a 10-point rating, and a 'powered by Google' logo circled in red. A yellow callout box with a red border contains the text: 'RESULTS CLEARLY BASED ON NETWORK-OBTAINED DATA'. A red arrow points from the top screenshot to the bottom one.</p>	<p>L, DOE</p>	

**Audi/Volkswagen Products vs. U.S. Patent No. 8,296,146
“COMPUTERIZED INFORMATION PRESENTATION APPARATUS”**

Claim Language	Audi/Volkswagen Implementation	Literal / DOE ¹	Direct / Indirect ²
and implement the desired function on the computerized information system using at least a portion of the received information and at least one of (i) a touch-screen display and input device of the computerized information system; and/or (ii) a speech synthesis apparatus of the computerized information system;	SEE ABOVE; TOUCH SCREEN DISPLAY AND INPUT DEVICE USED TO IMPLEMENT DISPLAY OF THE DESIRED FUNCTION, INCLUDING GENERATION OF MAP (SHOWN BELOW)	L, DOE	
wherein: said input relating to a desired function comprises an input to obtain information relating to a particular destination or entity;	SEE ABOVE EXAMPLE; SEARCHED-FOR BAR/RESTAURANT IS A DESTINATION/ENTITY DESIRED BY USER.	L, DOE	
said computerized information system is further configured to generate a synthesized speech output via the speech synthesis apparatus,	TO BE VERIFIED IN DISCOVERY; PRIOR GENERATIONS OF VW MIB AND OTHER SYSTEMS INCLUDE SPEECH SYNTHESIS CAPABILITY (E.G., FOR TURN-BY-TURN DIRECTIONS, VOICE PROMPT/RESPONSE, ETC.)	L, DOE	
and iteratively receive digitized representations of subsequent user speech inputs via the speech recognition apparatus, the subsequent inputs being used to traverse a menu structure comprising a plurality of possible	TO BE VERIFIED IN DISCOVERY; PRIOR GENERATIONS OF VW MIB AND OTHER SYSTEMS INCLUDE ITERATIVE SPEECH ENTRY CAPABILITY (E.G., FOR ENTRY OF INITIAL QUERY, SELECTION OF OPTIONS, ETC.)	L, DOE

	<p>games, movies, music, eBooks and much more. At the end of the trip, the Audi tablet can be removed from its mount and used offline or on any external WiFi network. The Audi tablet features a full HD camera, 32 GB of internal storage and an additional Bluetooth and NFC interface for connecting headphones, for example.”</p> <p>http://www.audiusa.com/newsroom/news/press-releases/2014/12/the-new-audi-q7-sportiness-efficiency-premium-comfort</p> <p>WI-FI LINKS CAN BE AD HOC:</p> <p>“A wireless ad hoc network is a decentralized type of wireless network. [1][2] The network is ad hoc because it does not rely on a pre existing infrastructure, such as routers in wired networks or access points in managed (infrastructure) wireless networks. Instead, each node participates in routing by forwarding data for other nodes, so the determination of which nodes forward data is made dynamically on the basis of network connectivity. In addition to the classic routing, ad hoc networks can use flooding for forwarding data.</p> <p>...</p> <p>An ad hoc network typically refers to any set of networks where all devices have equal status on a network and are free to associate with any other ad hoc network device in link range. Ad hoc network often refers to a mode of operation of IEEE 802.11 wireless networks.” http://en.wikipedia.org/wiki/Wireless_ad_hoc_network [22]</p> <p>SMART DISPLAY TABLET(S) INCLUDES A WI-FI INTERFACE FOR COMMUNICATION WITH, E.G., EXTERNAL NETWORKS OR OTHER WI-FI ENABLED PORTABLE DEVICES (E.G., A USER’S CELLULAR PHONE ACTING AS A “HOTSPOT”)</p> <p>BLUETOOTH LINKS CAN BE AD HOC:</p> <p>“Ad hoc network is often local area network or other small area network formed by wireless devices. In Latin, ad hoc literally means "for this," further meaning "for this purpose only," and thus usually temporary. The area of ad hoc networking has gathered much research interests in the past years. Bluetooth is one of the technologies that can be used for ad hoc networking. The original idea of Bluetooth concept was that of cable replacement between portable and/or fixed electronic device. According to the specification, when two Bluetooth devices come into each other's communication range, one of them assumes the role of master of the communication and the other becomes the slave. This simple "one hop" network is called a piconet, and may include up to seven active slaves connected to one</p>

“COMPUTERIZED INFORMATION PRESENTATION APPARATUS”**

Claim Language	Audi/Volkswagen Implementation	Literal / DOE ¹	Direct / Indirect ²
	<p>the APQ8064's 1.5 GHz Krait 200 architecture.</p> <p>The fact that Google's sub-\$400 Nexus 5 has this SoC comes as somewhat of a surprise considering that quite a few premium Snapdragon 600-based phones were released only a few months prior. When the Nexus 5 launched in late October, it became one of the first widely available Snapdragon 800-based devices in the U.S. market. Putting such a premium SoC in this phone means no performance compromises were made. Apparently, Google wants its customers to experience the very best that Android has to offer on the company's own branded line of devices.</p> <div style="text-align: center;"> </div> <p>On paper, the Snapdragon 800 SoC offers a lot potential performance. Some of this is related to hardware accelerators, but the Adreno 330 graphics core is largely responsible for its alacrity in games. Nvidia's Tegra K1 has us talking about a future with console-quality games on smartphones, but at least today, titles written for Android run very smoothly at maxed out quality settings on the Adreno engine. Recent releases like <i>Asphalt 8: Airborne</i>, <i>Riptide GP 2</i>, and <i>Grand Theft Auto: San Andrea</i> run exceedingly well at maxed out settings, while slightly older games like <i>Real Racing 3</i>, <i>Shadowgun</i>, and <i>Riptide GP</i> appear smoother than ever. I was frankly quite surprised at the improvement, having previously come from a Xiaomi MI-2 with its Snapdragon S4 Pro/Adreno 320 SoC.”</p>

	 <p>“Server types</p> <p>Google’s server infrastructure is divided into several types, each assigned to a different purpose:</p> <ul style="list-style-type: none"> • Web servers coordinate the execution of queries sent by users, then format the result into an HTML page. The execution consists of sending queries to index servers, merging the results, computing their rank, retrieving a summary for each hit (using the document server), asking for suggestions from the spelling servers, and finally getting a list of advertisements from the ad server. • Data-gathering servers are permanently dedicated to <u>spidering</u> the Web. Google's web crawler is known as GoogleBot. They update the index and document databases and apply Google's algorithms to assign ranks to pages. • Each index server contains a set of index shards. They return a list of document IDs ("docid"), such that documents corresponding to a certain docid contain the query word. These servers need less disk space, but suffer the greatest CPU workload. • Document servers store documents. Each document is stored on dozens of document servers. When performing a search, a document server returns a summary for the document based on query words. They can also fetch the complete document when asked. These servers need more disk space. <ul style="list-style-type: none"> • Ad servers manage advertisements offered by services like AdWords and AdSense.” <p>“When you talk to Android's voice recognition software, the spectrogram of what you've said is chopped up and sent</p>

<p>cause utilization of a wireless interface and a network to access information disposed on a remote server, the information relating to the directions to the business or entity;</p>	<p>“How Voice Search works</p> <p>Voice Search allows you to provide a voice query to a Google search client application on a device instead of typing that query. It uses pattern recognition to transcribe spoken words to written text. For each voice query made to Voice Search, we store the language, the country, the utterance and our system’s guess of what was said. The stored audio data does not contain your Google Account ID unless you have selected otherwise. We do not send any utterances to Google unless you have indicated an intent to use the Voice Search function (for example, pressing the microphone icon in the quick search bar or in the virtual keyboard or saying “Google” when the quick search bar indicates that the Voice Search function is available). We send the utterances to Google servers in order to recognize what was said by you. We keep utterances to improve our services, including to train the system to better recognize the correct search query.” https://www.google.com/policies/technologies/pattern-recognition/</p> <div style="text-align: center;">  <p>©2006 HowStuffWorks</p> </div> <p>“An ADC translates the analog waves of your voice into digital data by sampling the sound. <p>and enable an ad hoc communication link with a portable electronic device of a user of the transport apparatus,</p>	<p>WI-FI LINKS CAN BE AD HOC:</p> <p>“A wireless ad hoc network is a decentralized type of wireless network. [1][2] The network is ad hoc because it does not rely on a pre existing infrastructure, such as routers in wired networks or access points in managed (infrastructure) wireless networks. Instead, each node participates in routing by forwarding data for other nodes, so the determination of which nodes forward data is made dynamically on the basis of network connectivity. In addition to the classic routing, ad hoc networks can use flooding for forwarding data.</p> <p>...</p> <p>An ad hoc network typically refers to any set of networks where all devices have equal status on a network and are free to associate with any other ad hoc network device in link range. Ad hoc network often refers to a mode of operation of IEEE 802.11 wireless networks.” http://en.wikipedia.org/wiki/Wireless_ad_hoc_network</p> <p>2016 Q7 MMI SYSTEM INCLUDES A WI-FI INTERFACE SPECIFICALLY FOR COMMUNICATION WITH THE SMART DISPLAY TABLET(S):</p> <p>“A rear seat passenger can, for instance, send a navigation destination to the MMI navigation via the Audi tablet. The passenger can also surf the Internet via the WiFi connection. The use of the Android operating system in the Audi tablet and the availability of the Google Play store give the customer access to a huge number of applications, games, movies, music, eBooks and much more. At the end of the trip, the Audi tablet can be removed from its mount and used offline or on any external WiFi network. The Audi tablet features a full HD camera, 32 GB of internal storage and an additional Bluetooth and NFC interface for connecting headphones, for example.”</p> <p>http://www.audiusa.com/newsroom/news/press-releases/2014/12/the-new-audi-q7-sportiness-efficiency-</p>	L, DOE

 “COMPUTERIZED INFORMATION PRESENTATION APPARATUS”**

Claim Language	Audi/Volkswagen Implementation	Literal / DOE ¹	Direct / Indirect ²
	<p>premium-comfort</p> <p>BLUETOOTH LINKS CAN BE AD HOC:</p> <p>“Ad hoc network is often local area network or other small area network formed by wireless devices. In Latin, ad hoc literally means "for this," further meaning "for this purpose only," and thus usually temporary. The area of ad hoc networking has gathered much research interests in the past years. Bluetooth is one of the technologies that can be used for ad hoc networking. The original idea of Bluetooth concept was that of cable replacement between portable and/or fixed electronic device. According to the specification, when two Bluetooth devices come into each other's communication range, one of them assumes the role of master of the communication and the other becomes the slave. This simple "one hop" network is called a piconet, and may include up to seven active slaves connected to one master.”</p> <p>http://ieeexplore.ieee.org/xpl/login.jsp?tp=&arnumber=4147524&url=http%3A%2F%2Fieeexplore.ieee.org%2Fxppls%2Fabs_all.jsp%3Farnumber%3D4147524</p> <p>SEE BELOW; BOTH THE VEHICLE AND THE TABLET HAVE BLUETOOTH INTERFACES, AND THE TABLET CAN PRESUMABLY BE PAIRED TO THE VEHICLE (MMI SYSTEM) AND EXCHANGE DATA SUCH AS CONTACT LISTS/ADDRESS BOOKS, DIGITAL MEDIA (E.G., MP3), ETC.</p> <p>FOR SIMILAR REASONS, USB LINKS CAN BE AD HOC, WHETHER WIRED (E.G., USB 2.0/3.0 CONNECTOR) OR WIRELESS (E.G., WLAN USB DONGLE).</p> <p>“Internet with LTE speed:</p> <p>Audi connect MMI navigation plus also includes the module Audi connect, which connects the new Audi Q7 to the Internet via the LTE standard. Passengers can surf via the WiFi hotspot with download speeds of up to 100 Mbit/s and send and receive e-mail while using a variety of applications. The driver can use the tailored Audi connect services ranging from online traffic information to navigation with Google Earth and Google Street View to online media streaming. The new app provides access to Aupeo! personal web radio and the large Napster music library.</p> <p>The Q7 also has a new, top-of-the-line element of the Audi connect portfolio: The Audi smartphone interface brings ...“Google Android Auto” on board. If an ...Android cellular phone is connected to the USB port (...Android from Version 5.0 Lollipop), the ... environment opens in the Audi smartphone interface. Both are tailored for use in the car. The heart of this feature is online music. In addition, both platforms offer navigation functions, missed call/appointment reminders and messaging functions. Over time, these will be joined by numerous third-party</p>

Claim Language	2016 Audi Q7 Implementation	Literal / DOE ¹	Direct / Indirect ²
	 <p>The screenshot shows the navigation interface with the following elements: <ul style="list-style-type: none"> Top tabs: Route, Navigation, Traffic Search results: Sushi Roku Address: Santa Monica Blvd, Santa Monica, CA (highlighted in a red box) Buttons: Start route guidance, Calculate alternative routes, Add as stopover Bottom bar: Start route guidance • Show on map • Call • Correction • Help • Cancel Audio prompt: Please say start route guidance, call, or show on map. </p>		

**2016 Audi Q7 with Smart Display Integration vs. U.S. Patent No. 8,065,156
"Adaptive Information Presentation Apparatus and Methods"**

Claim Language	2016 Audi Q7 Implementation	Literal / DOE ¹	Direct / Indirect ²
	 		

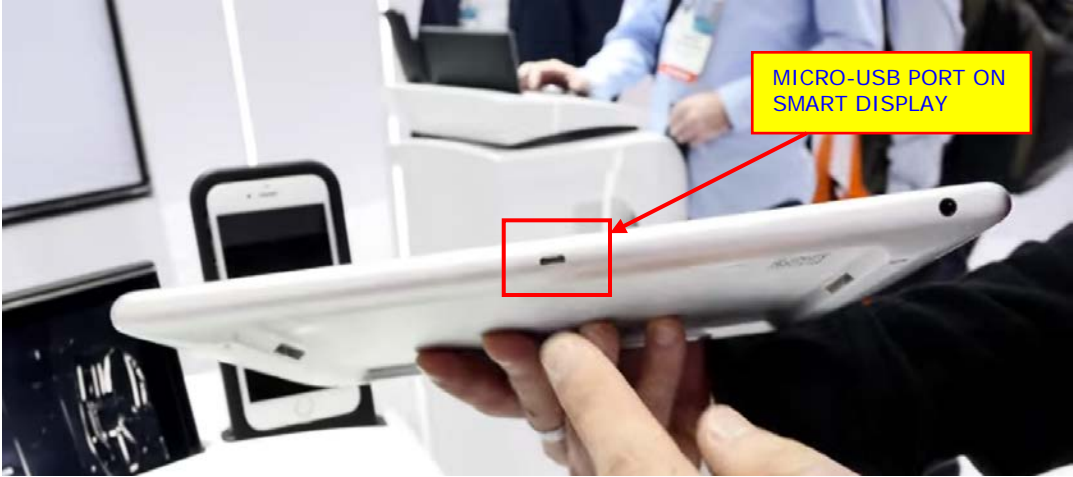

**2016 Audi Q7 with Smart Display Integration vs. U.S. Patent No. 8,065,156
 “Adaptive Information Presentation Apparatus and Methods”**

Claim Language	2016 Audi Q7 Implementation	Literal / DOE ¹	Direct / Indirect ²
<p>wherein said at least one program is further configured to: establish an ad hoc communication link with a portable computerized device of a user of the transport apparatus;</p>	 <p data-bbox="394 1068 1732 1166">“It works as a fully-fledged Android tablet powered by a 4.4 KitKat, and has a familiar user interface as Audi UI.” http://www.cartrade.com/blog/2015/car-automobile-technology/audi-and-the-android-tablet-for-cars-1226.html</p> <p data-bbox="394 1235 779 1263">WI-FI LINKS CAN BE AD HOC:</p> <p data-bbox="394 1289 1780 1469">“A wireless ad hoc network is a decentralized type of wireless network. [1][2] The network is ad hoc because it does not rely on a pre existing infrastructure, such as routers in wired networks or access points in managed (infrastructure) wireless networks. Instead, each node participates in routing by forwarding data for other nodes, so the determination of which nodes forward data is made dynamically on the basis of network connectivity. In addition to the classic routing, ad hoc networks can use flooding for forwarding data.</p>	L, DOE	

**2016 Audi Q7 with Smart Display Integration vs. U.S. Patent No. 8,065,156
 “Adaptive Information Presentation Apparatus and Methods”**

Claim Language	2016 Audi Q7 Implementation	Literal / DOE ¹	Direct / Indirect ²
	<p>...</p> <p>An ad hoc network typically refers to any set of networks where all devices have equal status on a network and are free to associate with any other ad hoc network device in link range. Ad hoc network often refers to a mode of operation of IEEE 802.11 wireless networks. http://en.wikipedia.org/wiki/Wireless_ad_hoc_network</p> <p>2016 Q7 MMI SYSTEM INCLUDES A WI-FI INTERFACE SPECIFICALLY FOR COMMUNICATION WITH THE SMART DISPLAY TABLET(S):</p> <p>“A rear seat passenger can, for instance, send a navigation destination to the MMI navigation via the Audi tablet. The passenger can also surf the Internet via the WiFi connection. The use of the Android operating system in the Audi tablet and the availability of the Google Play store give the customer access to a huge number of applications, games, movies, music, eBooks and much more. At the end of the trip, the Audi tablet can be removed from its mount and used offline or on any external WiFi network. The Audi tablet features a full HD camera, 32 GB of internal storage and an additional Bluetooth and NFC interface for connecting headphones, for example.”</p> <p>http://www.audiusa.com/newsroom/news/press-releases/2014/12/the-new-audi-q7-sportiness-efficiency-premium-comfort</p> <p>BLUETOOTH LINKS CAN BE AD HOC:</p> <p>“Ad hoc network is often local area network or other small area network formed by wireless devices. In Latin, ad hoc literally means "for this," further meaning "for this purpose only," and thus usually temporary. The area of ad hoc networking has gathered much research interests in the past years. Bluetooth is one of the technologies that can be used for ad hoc networking. The original idea of Bluetooth concept was that of cable replacement between portable and/or fixed electronic device. According to the specification, when two Bluetooth devices come into each other's communication range, one of them assumes the role of master of the communication and the other becomes the slave. This simple "one hop" network is called a piconet, and may include up to seven active slaves connected to one master.”</p> <p>http://ieeexplore.ieee.org/xpl/login.jsp?tp=&arnumber=4147524&url=http%3A%2F%2Fieeexplore.ieee.org%2Fxppls%2Fabs_all.jsp%3Farnumber%3D4147524</p> <p>SEE BELOW; BOTH THE VEHICLE AND THE TABLET HAVE BLUETOOTH INTERFACES, AND THE TABLET CAN PRESUMABLY BE PAIRED TO THE VEHICLE (MMI SYSTEM) AND EXCHANGE DATA SUCH AS CONTACT LISTS/ADDRESS BOOKS, DIGITAL MEDIA (E.G., MP3), ETC.</p>

	<p>SMART DISPLAY TABLET(S) INCLUDES A WI-FI INTERFACE FOR COMMUNICATION WITH, E.G., EXTERNAL NETWORKS OR OTHER WI-FI ENABLED PORTABLE DEVICES (E.G., A USER’S CELLULAR PHONE ACTING AS A “HOTSPOT”)</p> <p>BLUETOOTH LINKS CAN BE AD HOC:</p> <p>“Ad hoc network is often local area network or other small area network formed by wireless devices. In Latin, ad hoc literally means "for this," further meaning "for this purpose only," and thus usually temporary. The area of ad hoc networking has gathered much research interests in the past years. Bluetooth is one of the technologies that can be used for ad hoc networking. The original idea of Bluetooth concept was that of cable replacement between portable and/or fixed electronic device. According to the specification, when two Bluetooth devices come into each other's communication range, one of them assumes the role of master of the communication and the other becomes the slave. This simple "one hop" network is called a piconet, and may include up to seven active slaves connected to one master.”</p> <p>http://ieeexplore.ieee.org/xpl/login.jsp?tp=&arnumber=4147524&url=http%3A%2F%2Fieeexplore.ieee.org%2Fxppls%2Fabs_all.jsp%3Farnumber%3D4147524</p> <p>SEE BELOW; THE TABLET HAS A BLUETOOTH INTERFACE, AND THE TABLET CAN PRESUMABLY BE PAIRED TO ANOTHER DEVICE (SUCH AS AS THE AFOREMENTIONED USER’S SMARTPHONE) AND EXCHANGE DATA SUCH AS CONTACT LISTS/ADDRESS BOOKS, DIGITAL MEDIA (E.G., MP3), ETC.</p> <p>FOR SIMILAR REASONS, USB LINKS CAN BE AD HOC, WHETHER WIRED (E.G., USB 2.0/3.0 CONNECTOR) OR WIRELESS (E.G., WLAN USB DONGLE).</p>

“Computerized Information And Display Apparatus”**

Claim Language	Exemplary Accused Instrumentalities	Literal / DOE ¹	Direct / Indirect ²
	<p>“Server types</p> <p>Google's server infrastructure is divided into several types, each assigned to a different purpose:</p> <ul style="list-style-type: none"> • Web servers coordinate the execution of queries sent by users, then format the result into an HTML page. The execution consists of sending queries to index servers, merging the results, computing their rank, retrieving a summary for each hit (using the document server), asking for suggestions from the spelling servers, and finally getting a list of advertisements from the ad server. • Data-gathering servers are permanently dedicated to spidering the Web. Google's web crawler is known as GoogleBot. They update the index and document databases and apply Google's algorithms to assign ranks to pages. • Each index server contains a set of index shards. They return a list of document IDs ("docid"), such that documents corresponding to a certain docid contain the query word. These servers need less disk space, but suffer the greatest CPU workload. • Document servers store documents. Each document is stored on dozens of document servers. When performing a search, a document server returns a summary for the document based on query words. They can also fetch the complete document when asked. These servers need more disk space. • Ad servers manage advertisements offered by services like AdWords and AdSense..” <p>http://en.wikipedia.org/wiki/Google_platform</p> <p>“When you talk to Android's voice recognition software, the spectrogram of what you've said is chopped up and sent to eight different computers housed in Google's vast worldwide army of servers. It's then processed, using the neural network models built by Vanhoucke and his team. Google happens to be very good at breaking up big computing jobs like this and processing them very quickly, and to figure out how to do this, Google turned to Jeff Dean and his team of engineers, a group that's better known for reinventing the way the modern data center works.” http://www.wired.com/2013/02/android-neural-network/</p>

	<p>The new Passat is launching with Generation II of Volkswagen infotainment systems. The latest generation of this modular information toolkit (MIB) enables a maximum degree of connectivity in terms of coupling external devices. Its diverse interfaces include interfacing to smart phones and their apps via MirrorLink™. In addition, the systems were given much faster processors (optimised booting, quicker route calculation, smoother touchscreen performance, perfected language dialogues) and new higher-resolution displays (in the 6.5-inch systems).</p> <p>...</p> <p>2. Faster processors. The new generation of devices is characterised by better system performance. Consider the “Discover Media”, the radio-navigation system with 6.5-inch display: Compared to the first generation, performance of the CPU (main processor) was more than doubled from 950 MIPS (million instructions per second) to 2,500 MIPS. ...</p> <p>4. MirrorLink™. For the first time in the Passat, MirrorLink™ is available – from the “Composition Media” it is optional, in the “Discover Pro” it is standard. MirrorLink™ makes it possible to integrate numerous apps or functions of Android smart phones into the infotainment system. Related apps will be offered directly from Volkswagen and from third party suppliers. The Volkswagen apps: “Mobile Office”, “audioMOTION”, “ThinkBlue. Trainer”, “Shared Audio”, “Drive&Track” and “My Guide”. Third party apps include “Audioteka” (audio books), “Glympse” (social media), “Aupeo!” (Internet radio), “Life360” (family locator) and “Kaliki” (news).”</p> <p>http://www.vwvortex.com/news/volkswagen-news/detail-new-passat-generation-8-2/</p> <p>HENCE, MIB-II SYSTEM HAS CPU, GPU, ETC. IN COMMUNICATION WITH EXEMPLARY ANDROID SMARTPHONE VIA USB.</p> <p>EXEMPLARY NEXUS 5 ANDROID SMARTPHONE (USED FOR PURPOSES OF ILLUSTRATION – OTHER ANDROID PHONES ARE EQUALLY APPLICABLE) HAS NUMEROUS PROCESSING APPARATUS WHICH, <i>INTER ALIA</i>, SUPPORT THE FUNCTIONS OF THE MIRRORLINK SYSTEM:</p> <p>“PROCESSING CPU: Qualcomm Snapdragon™ 800, 2.26GHz processor GPU: Adreno 330, 450MHz” [http://perudalia.com/videos/maUvJ6moowc/nexus-5-gaming-demonstration.html] “Snapdragon 800</p> <p>Beyond its cellular connectivity, the Nexus 5 is meaningful for sporting the fastest Android-compatible SoC in 2013,</p>

	<p>Qualcomm's Snapdragon 800. At almost 2.3 GHz, its Krait 400 cores represent a significant speed-up compared to the APQ8064's 1.5 GHz Krait 200 architecture.</p> <p>The fact that Google's sub-\$400 Nexus 5 has this SoC comes as somewhat of a surprise considering that quite a few premium Snapdragon 600-based phones were released only a few months prior. When the Nexus 5 launched in late October, it became one of the first widely available Snapdragon 800-based devices in the U.S. market. Putting such a premium SoC in this phone means no performance compromises were made. Apparently, Google wants its customers to experience the very best that Android has to offer on the company's own branded line of devices.</p> <div style="text-align: center;"> </div> <p>On paper, the Snapdragon 800 SoC offers a lot potential performance. Some of this is related to hardware accelerators, but the Adreno 330 graphics core is largely responsible for its alacrity in games. Nvidia's Tegra K1 has us talking about a future with console-quality games on smartphones, but at least today, titles written for Android run very smoothly at maxed out quality settings on the Adreno engine. Recent releases like <i>Asphalt 8: Airborne</i>, <i>Riptide GP 2</i>, and <i>Grand Theft Auto: San Andrea</i> run exceedingly well at maxed out settings, while slightly older games like <i>Real Racing 3</i>, <i>Shadowgun</i>, and <i>Riptide GP</i> appear smoother than ever. I was frankly quite surprised at the improvement, having previously come from a Xiaomi MI-2 with its Snapdragon S4 Pro/Adreno 320 SoC." CASE NO. 14-CV-2668 CAB WVG

PROOF OF SERVICE

Judge: Hon. Cathy Ann Bencivengo
Ctrm: 4C

1 **PROOF OF SERVICE**

2 I am a citizen of the United States and a resident of or employed in the
3 County of San Diego, State of California. I am over the age of 18 and not a party to
4 the within action. My business address is 16644 West Bernardo Dr., Suite 201, San
5 Diego, California 92127. On June 26, 2015, I served the following document(s)
6 described as:

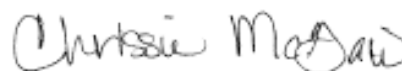

- 7 **1) WEST VIEW RESEARCH, LLC'S REVISED DISCLOSURE OF
8 ASSERTED CLAIMS AND INFRINGEMENT CONTENTIONS,
9 PURSUANT TO PATENT L.R. 3.1 AND JUNE 10, 2015 COURT
10 ORDER**
- 11 **2) WEST VIEW RESEARCH, LLC'S DOCUMENT PRODUCTION
12 ACCOMPANYING ITS REVISED DISCLOSURE OF ASSERTED
13 CLAIMS AND INFRINGEMENT CONTENTIONS, PURSUANT TO
14 PATENT L.R. 3.2, AND THE JUNE 10, 2015 ORDER**

15 on the parties or attorneys for parties in this action who are identified on the
16 attached service list, using the following means of service. (If more than one means
17 of service is checked, the means of service used for each party is indicated on the
18 attached service list.)

- 19 **BY REGULAR MAIL.** I caused such envelopes to be deposited in the
20 United States mail, at San Diego, California with postage thereon fully
21 prepaid, individually addressed to the parties as indicated on the attached
22 service list. I am readily familiar with the firm's practice of collection and
23 processing correspondence in mailing. It is deposited with the United States
24 postal service each day and that practice was followed in the ordinary course
25 of business for the service herein attested to. (C.C.P. § 1013(a)(3))
- 26 **BY CM/ECF.** I caused a true copy of the foregoing document(s) to be
27 transmitted to each of the parties on the attached service list by transmitting
28 via e-filing the document(s) listed above to the Case Management/Electronic
Filing System.
- BY PERSONAL SERVICE.** I caused such envelope(s) to be delivered by
hand to the addressees.
- BY ELECTRONIC MAIL.** I caused a true copy of the foregoing document
to be sent via electronic mail in .pdf format, to the individual(s) listed on the
attached service list.

I declare that I am employed in the office of a member of the bar of this court
at whose direction the service was made. I declare under penalty of perjury under
the laws of the State of California that the foregoing is true and correct.

Executed on June 26, 2015, at San Diego, California.
