# U.S. Patent No. 8,719,038

Title: Computerized Information and Display Apparatus

Filed: January 28, 2013

Issued: May 6, 2014

Named Inventor:  
Robert Gazdzinski

US008719038B1

(12) **United States Patent**  
**Gazdzinski**

(10) **Patent No.:** **US 8,719,038 B1**  
(45) **Date of Patent:** **May 6, 2014**

(54) **COMPUTERIZED INFORMATION AND DISPLAY APPARATUS**

(71) Applicant: **West View Research, LLC**, San Diego, CA (US)

(72) Inventor: **Robert F. Gazdzinski**, San Diego, CA (US)

(73) Assignee: **West View Research, LLC**, San Diego, CA (US)

(\* ) Notice: Subject to any disclaimer, the term of this patent is extended or adjusted under 35 U.S.C. 154(b) by 0 days.

(21) Appl. No.: **13/752,222**

(22) Filed: **Jan. 28, 2013**

(57) **ABSTRACT**

Computerized apparatus for obtaining and displaying information, such as for example directions to a desired entity or organization. In one embodiment, the computerized apparatus is configured to receive user speech input and enable performance of various tasks, such as obtaining desired information relating to indoor entities, maps or directions, or any number of other topics. The obtained data may also, in various variants, be displayed in various formats and relative to other entities nearby.

1

## U.S. Patent No. 8,719,038

The '038 patent describes an elevator information system that allows a user to verbally initiate a query of a database. Ex. 1001, 7:4-25; Andrews Decl. (Ex. 1002), ¶ 3.

With reference to Fig.1, signals captured by microphone 118 as part of speech recognition module 104 are digitized by analog to digital converter 141 and processed using a speech recognition algorithm. Ex. 1001 at 7:26-27, 7:57-60; Ex. 1002 at ¶ 3.

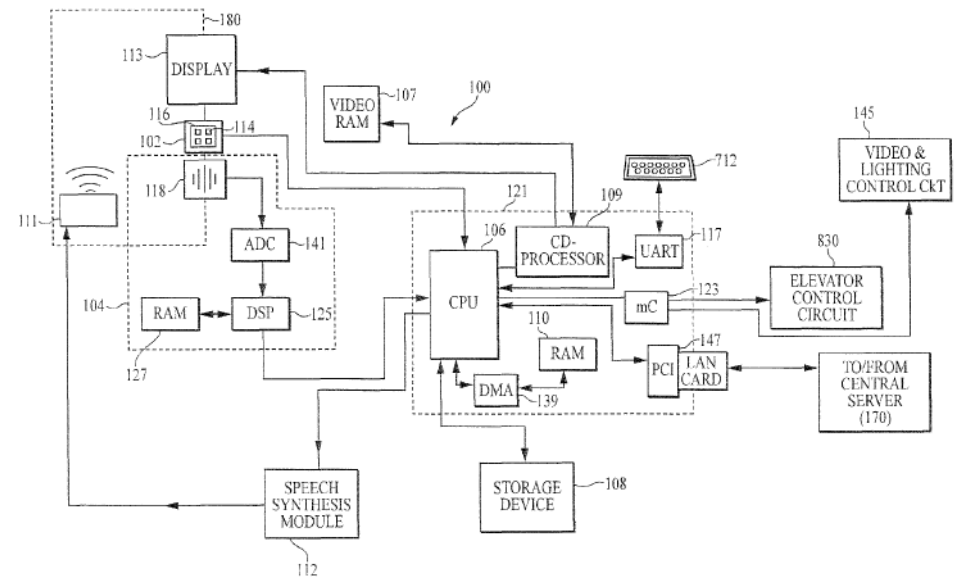

FIG. 1

## U.S. Patent No. 8,719,038

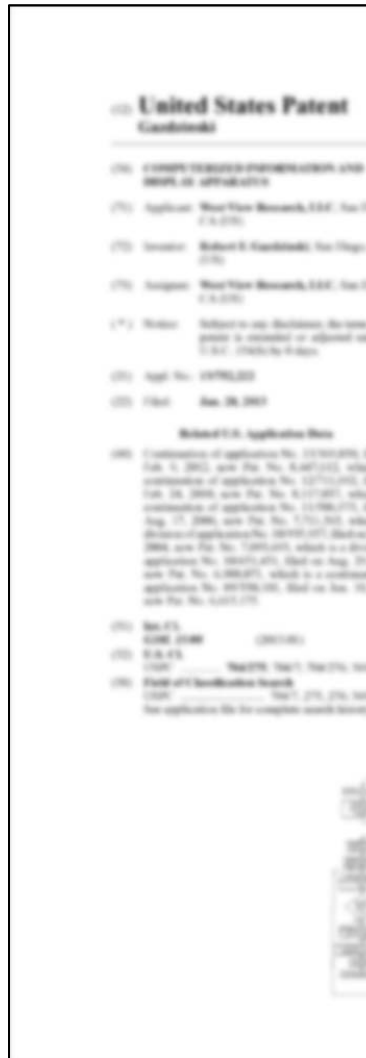

A touch screen display 113, as shown in Fig. 2, generates a variety of different messages or display formats based on the user's input and query. Ex. 1001, 8:43-45.

The user can speak the specific name of the party they wish to find, and the digitized speech is compared to the contents of a directory file to find any matches. *Id.* at 10:7-16.

Any matching fields within the entries of the directory file are provided to the user, either audibly via a speech synthesis module 112 and speaker 111, or visually via display 113. *Id.* at 10:16-19.

# Claim 1

1. Computer readable apparatus configured to aid a user in locating an organization or entity, the apparatus comprising a storage medium having a computer program configured to run on a processor, the program configured to, when executed on the processor:

- obtain a representation of a first speech input from the user, the first speech input relating to a name of a desired organization or entity;
- cause use of at least a speech recognition algorithm to process the representation to identify at least one word or phrase therein;
- use at least the identified at least one word or phrase to identify a plurality of possible matches for the name;
- cause the user to be prompted to enter a subsequent input in order to aid in identification of one of the plurality of possible matches which best correlates to the desired organization or entity;
- receive data relating to the subsequent user input;
- based at least in part on the data, determine which of the plurality of possible matches is the one that best correlates;
- determine a location associated with the one of the possible matches that best correlates; and
- select and cause presentation of a visual representation of the location, as well as at least an immediate surroundings thereof, on a display viewable by the user, the visual representation further comprising visual representations of one or more other organizations or entities proximate to the location.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
