[73] Assignee: **Lear Corporation**, Southfield, Mich.

### [57] ABSTRACT

[21] Appl. No.: **735,326**

[22] Filed: **Oct. 22, 1996**

[51] **Int. Cl.<sup>6</sup>** ..... **B60K 28/00**

[52] **U.S. Cl.** ..... **180/273; 280/735; 297/410**

[58] **Field of Search** ..... 280/735; 297/410, 297/391; 318/568.1, 567; 180/273

A vehicle seat assembly comprising occupant sensing systems for use in headrest adjusting and/or air bag actuation systems. One sensing system includes a passive transducer array in the form of pressure transducers such as force sensing resistors vertically spaced in a first embodiment in a headrest cushion of the vehicle seat. In a second embodiment, the pressure transducers are vertically spaced in a backrest cushion of the seat. The pressure transducers generate signals which are processed by a controller to generate a control signal to control a bidirectional headrest motor coupled to the headrest of the vehicle seat. In another sensing system, occupant sensors in the form of either force sensing resistors or mechanical switches are embedded in the seat back cushion and the seat bottom cushion to generate signals which are processed by the controller to generate a control signal for use by an air bag actuation circuit to prevent air bag deployment when the controller determines that the vehicle seat is either unoccupied or is occupied by a rear-facing child car seat. The controller includes control logic to distinguish between a properly seated occupant and the rear-facing infant seat based on the electrical output signals from the occupant sensors located in the seat back and bottom cushion.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
