Attorncy Docket:

927/3

Declaration of Inventors

We, Isaac Levanon and Yoni Lavi, being first duly sworn, depose and say:

- 1. We hereby declare that we believe we are the original, first and co-inventors of the subject matter which is claimed herein for which a utility patent is sought on the invention described and claimed in the above-identified application; that we have reviewed and understand the contents of the application, including the claims; and, that we acknowledge our duty to disclose to the PTO information of which we are aware which is material to patentability of this invention as defined in 37 C.F.R. 1.56.
- 2. Our invention was made prior to 29 November 2000 the date of filing by Robotham of the application which matured into US Patent 6,704,024. Our original Provisional applications 60/258,488; 60/258,489; 60/258,465; 60/258,468; 60/258,466; and 60/258,467 were all filed 27 December 2000. Since it is not possible to instantaneously create an invention and file an application the same day, it is self apparent that the invention was made some time prior to 27

10/035,987

December 2000. Our invention also dates back prior to Robotham's provisional application, which was filed August 7, 2000.

- 3. The herein invention was first defined in October 1999, we had a working model in December 1999 and we can establish that we had the first working product on about 24 January 2000.
- 4. Our company was originally known as Flyover Technologies, Inc. and only changed to 3DVU, Inc. relatively recently, so the original materials bear the company name Flyover Technologies.
- 5. Attached hereto is a copy of the Zip drive directory which shows the files with the program constituting the invention. It can be seen that the dates of these files go all the way back into 1999. We have the source code and the images of the application dated in 1999 and, if requested by the PTO, copies can be made and provided. It may be appreciated that they are exceptional voluminous, so we do not want to burden the PTO with so much paper unless it is really required. An old HDD from 1999 was located and it shows files pertaining to this invention, bearing dates 29 November 1999, 1 December 1999, 8 December 1999 and 30 November 1999
- Also attached hereto is the June 2000 4 -page description of the design that was distributed to selected people.
- 7. In September and October 2000, we initially consulted with the Israeli patent attorney Avner Korman at the patent firm Reinhold Cohn & Associates in Tel Aviv, Israel. Thereafter, we met with the patent anomey Gerald B. Rosenberg, NewTechLaw, Suite 520, 285 Hamilton Avenue, Palo Alto, California 94301, to discuss this invention, companion inventions and preparation of patent applications. Over the succeeding months, Mr. Rosenberg prepared the provisional applications, which was filed by his office on 27 December 2000.

8. We hereby declare that all statements made herein of our own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

DOCKET

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
