Introduction

General Instructions on the Operation Manual

This operation manual belongs to the machine. The operation manual includes:

Introduction

With general instructions on the operation manual, the list of accessories, technical data and service addresses.

Safety Devices

With important references for a safe operation of the machine.

Transport and Installation of the Machine

With descriptions of the electrical equipment of the machine.

Preparation for Startup and Lubrication

With the respective information for the cleaning of the machine.

Construction and Adjustment

There you will find also descriptions of the operation panel and how to use switches and buttons.

Startup of the Machine

With the information: "Loosening a Machine which has jammed under pressure".

Special Designs

There you will find special equipment for the machine.

☞ It is necessary to read *Chapter "Introduction"* and *Chapter "Transport and Installation of the Machine"*, before transporting the machine into your house or unpacking the machine. Take the machine into operation after you are acquainted with the operating instructions.

Fixtures in the Text

Please observe the following agreements:

- Significance of the Handwheels and switches of the machine are written in **bold BLOCK LETTERS**.
- Texts in *italics* are cross references.
see *The Feeder*
- Names of KORSCH products such as PHARMAPRESS MESWERT ANALYSE are mentioned in BLOCK LETTERS.

In case of texts with this warning symbol to their left refer to this being an instruction for safety.

For the damages caused on the part of the user due to negligence and non observing of this safety instructions no responsibility is assured from us not matter whatever the circumstances and however big the damage might be.

☞ This is a reference.

Proper Employment of the Machine

The EK 0 is a eccentric machine for manufacturing tablets, dragées and mouldings made of powdery molding compound and granulated materials.

The operator and/or user has to make sure that the waste-products are cleared away according to the regulations.

Forbidden Employment of the Machine

The machine must not be used for processing explosive or combustible materials.

☞ The operator and/or user must not press any materials which might cause deflagrations or explosions.

The operator of the installation is responsible for these regulations being kept.

After prior consultation, the electrical components can be employed in explosion-proof execution.

Toxic or aggressive materials must not be processed when there is no sufficient protection against them for the service personnel.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
