(54) Title: NOVEL 3,3-DIPHENYLPROPYLAMINES, THEIR USE AND PREPARATION

(57) Abstract

The invention relates to 3,3-diphenylpropylamines of formula (I), wherein R¹ signifies hydrogen or methyl, R² and R³ independently signify hydrogen, methyl, methoxy, hydroxy, carbamoyl, sulphamoyl or halogen, and X represents a tertiary amino group of formula (II), wherein R⁴ and R⁵ signify non-aromatic hydrocarbyl groups, which may be the same or different and which together contain at least three carbon atoms, and wherein R⁴ and R⁵ may form a ring together with the amine nitrogen, their salts with physiologically acceptable acids and, when the compounds can be in the form of optical isomers, the racemic mixture and the individual enantiomers. The invention also relates to methods for their preparation, pharma-

NOVEL 3,3-DIPHENYLPROPYLAMINES, THEIR USE AND PREPARATION

The present invention relates to novel therapeutically active compounds, methods for their preparation, pharmaceutical compositions containing the novel compounds, and the use of the compounds for preparing drugs.

WO 89/06644 discloses 3,3-diphenylpropylamines having anticholinergic activity. In accordance with the present invention novel therapeutically active compounds have now been found, some of which are formed as metabolites in mammals when treated with the 3,3-diphenylpropylamines disclosed in the above-mentioned WO publication. These metabolites have at least as favourable anti-cholinergic properties as the parent compounds and can thus be used for the control of events mediated by acetylcholine, like urination.

The novel compounds of the present invention are represented by the general formula I

wherein R^1 signifies hydrogen or methyl, R^2 and R^3 independently signify hydrogen, methyl, methoxy, hydroxy, carbamoyl, sulphamoyl or halogen, and X represents a tertiary amino group of formula II

wherein R^4 and R^5 signify non-aromatic hydrocarbyl groups, which may be the same or different and which together contain at least three carbon atoms, preferably at least

four carbon atoms, especially at least five carbon atoms, and wherein R⁴ and R⁵ may form a ring together with the amine nitrogen, said ring preferably having no other heteroatom than the amine nitrogen.

5 The compounds of formula I can form salts with physiologically acceptable acids, organic and inorganic, and the invention comprises the free bases as well as the salts thereof. Examples of such acid addition salts include the hydrochloride, hydrobromide, hydrogen
10 fumarate, and the like.

When the novel compounds are in the form of optical isomers, the invention comprises the racemic mixture as well as the individual isomers as such.

In the compounds of formula I, R² is preferably
15 hydrogen, and R³ is preferably hydrogen or hydroxy.

R² is preferably in 3-, 4- or 5-position.

R³ is preferably in 2-position with respect to the propylamine group.

The HOCH₂-group is preferably in 5-position.

20 Preferably, each of R⁴ and R⁵ independently signifies C₁₋₈-alkyl, especially C₁₋₆-alkyl, or adamantyl, R⁴ and R⁵ together comprising at least three, preferably at least four carbon atoms. R⁴ and R⁵ may carry one or more hydroxy groups, and they may be joined to form a ring together
25 with the amine nitrogen atom.

Presently preferred tertiary amino groups X in formula I include the following groups a) - h):

5

Preferably, R^4 and R^5 are both isopropyl.

A presently preferred specific compound of formula I is N,N-diisopropyl-3-(2-hydroxy-5-hydroxymethylphenyl)-3-phenylpropylamine.

10

The compounds of formula I may, in accordance with the present invention, be prepared by per se conventional methods, and especially by

a) reducing the group R^6CO in a 3,3-diphenylpropylamine of formula III

15

20

wherein R^1 to R^3 and X are as defined above, R^6 is hydrogen or R^7O , where R^7 is hydrogen, (preferably lower) alkyl, alkenyl, alkynyl or aryl (such as phenyl) and any hydroxy groups may be protected, such as by methylation or benzylation, or

25

b) reacting a reactively esterified 3,3-diphenylpropanol of formula IV

30

35

wherein R^1 to R^3 are as defined above and any hydroxy

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
