AFFIDAVIT OF NANCY CHAFFIN HUNTER

1.   My name is Nancy Chaffin Hunter. I am currently the Coordinator of

Acquisitions and Metadata Services at Colorado State University Libraries ("CSU

Libraries") in Fort Collins, Colorado. I have served in this position since

December 2012, and am responsible for overseeing acquisitions and cataloguing. I

previously served as a Metadata Librarian for CSU Libraries from February 2001

to November 2012. Based on my job duties and experience in these positions, I

have personal knowledge of the below statements.

2.   CSU Libraries maintains records of the dates on which books are received

and catalogued through its Integrated Library System ("ILS") software, which has

been in use since before February 8, 2000. These records are maintained in the

ordinary course of business of CSU Libraries, and I am personally familiar with

these records in the ordinary course of my job duties for CSU Libraries.

3.   I have been asked to confirm when the following book was catalogued and

publicly available at CSU Libraries: Proceedings: Production Operations

Symposium, 2-4 April 1995, Oklahoma City, BAKER HUGHES INCORPORATED AND BAKER HUGHES OILFIELD OPERATIONS, INC.

of Petroleum Engineers, Inc. ("the Book"). I h

AFFIDAVIT OF NANCY CHAFFIN HUNTER

1.   My name is Nancy Chaffin Hunter. I am currently the Coordinator of

Acquisitions and Metadata Services at Colorado State University Libraries ("CSU

Libraries") in Fort Collins, Colorado. I have served in this position since

December 2012, and am responsible for overseeing acquisitions and cataloguing. I

previously served as a Metadata Librarian for CSU Libraries from February 2001

to November 2012. Based on my job duties and experience in these positions, I

have personal knowledge of the below statements.

2.   CSU Libraries maintains records of the dates on which books are received

and catalogued through its Integrated Library System ("ILS") software, which has

been in use since before February 8, 2000. These records are maintained in the

ordinary course of business of CSU Libraries, and I am personally familiar with

these records in the ordinary course of my job duties for CSU Libraries.

3.   I have been asked to confirm when the following book was catalogued and

publicly available at CSU Libraries: Proceedings: Production Operations

Symposium, 2-4 April 1995, Oklahoma City, Oklahoma, published by the Society

of Petroleum Engineers, Inc. ("the Book"). I have reviewed CSU Libraries'

records relating to the Book. Attached as Appendix A is a true and correct copy of

certain pages of the Book. Attached as Appendix B is a true and correct copy of a

portion of a publicly accessible CSU Libraries webpage showing the bibliographic

record for the Book as of July 22, 2016 under the "Librarian View" tab at the following web address: http://discovery.library.colostate.edu/Record/.b22793069/Details. Attached as Exhibit C is a true and correct copy of a screenshot that I generated of the bibliographic entry for the Book in CSU Libraries' ILS software. Attached as Exhibit D is a true and correct copy of a screenshot that I generated of the item record for the Book in CSU Libraries' ILS software.

4. The title listed in Appendices B, C, and D has a minor typographical error that refers to "Operations" instead of "Operation" within the phrase "Production Operation Symposium." However, other information confirms that the records shown in Appendices B, C, and D refer to the Book. The remainder of the title (including "2-4 April 1995" and "Oklahoma City, OK" shown in Appendices B, C, and D matches what is shown on the cover page in Appendix A, and the 1995 copyright date in Appendices B, C, and D matches the 1995 date shown on the copyright page in Appendix A. Also, the unique identifier "S-A-23B-11-08-013" listed alongside field 945 in Appendix B and near the bottom of Appendix D corresponds to the number shown on the title page in Appendix A.

5. CSU Libraries' records confirm that the Book was catalogued, and therefore made available to the public, at CSU Libraries on February 8, 2000. Appendix B shows this date as "02-08-00" in part "|b" alongside the first field 998, and as

"000208" in part "|c" alongside the second field 998. The first of these date fields is user-entered on the day on which a book is catalogued and made available to the public. The second of these date fields is system-generated on the day on which the bibliographic record for the Book was created in CSU Libraries' ILS System software records, and this date field is not editable. Appendix C also shows these dates as "CAT DATE 02-08-2000" and "Created: 02-08-2000," respectively. Appendix D also shows the second date as "Created: 02-08-2000."

6.   Books are made available to the public as soon as they are catalogued, which often occurs on the same day that they are entered into the CSU Libraries ILS software, as CSU Libraries' records show was the case for the Book.

7.   I declare under penalty of perjury that the foregoing is true and correct.

DOCKET ALARM

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.

fastcase®
Smarter legal research.
