ABSTRACT:

PROBLEM TO BE SOLVED: To provide a bepotastine-including pharmaceutical preparation that includes bepotastine [(S)-4-[4-[4-chlorophenyl] (2-pyridyl)-methoxy]piperidino] butyric acid] of S-configuration in high optical purity and has markedly improved storage stability because of no occurrence of racemization.

SOLUTION: The objective oral solid pharmaceutical preparation is obtained by formulating an excipient selected from mannitol, sucrose, lactose and a mixture thereof and polyethylene glycol to bepotastine a pharmaceutically acceptable salt thereof.
