

AFFIDAVIT OF Pamela Stansbury

STATE OF NEW YORK)
)ss.
COUNTY OF TOMPKINS)

Pamela Stansbury being of full age and duly sworn, deposes and says as follows:

1. I am an employee of the Cornell University Library, and specifically Library Technical Services, located at Cornell University, Ithaca, New York 14853. I have personal knowledge of the facts set forth below.
2. I am the Administrative Supervisor in Library Technical Services, which maintains bibliographical and processing information for many historical documents. I have held such position since 1996.
3. Included in the Library's historical collection are various publications. As part of that collection, the Library maintains custody of an original issue of the periodical *Science*, vol. 255 (24 January 1992) in which is the article, *Optically transparent, electrically conductive composite medium* / by S. Jin, T.H. Tiefel, R. Wolfe, R.C. Sherwood, J.J. Mottine, Jr.
4. Mr. Richard F. Moncrief requested information regarding an issue of the periodical *Science*, vol. 255 (24 January 1992) in which is the article, *Optically transparent, electrically conductive composite medium* / by S. Jin, T.H. Tiefel, R. Wolfe, R.C. Sherwood, J.J. Mottine, Jr. a publication that we maintain in our collection – specifically when this item was first made publicly available by the Library. As best I can determine, the publication was publicly available at the Cornell University Library as of March 15, 1993, based the date stamp on the circulation slip.

Pamela J. Stansbury (signature)
Pamela J. Stansbury (name printed)

Sworn to before me this
29th day of January, 2016

434 Widespread Dispersion of Neuronal Clones Across Functional Regions of the Cerebral Cortex: C. WALSH AND C. L. CEPKO

■ SCIENCE (ISSN 0036-8075) is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1333 H Street, NW, Washington, DC 20005. Second-class postage (publication No. 484460) paid at Washington, DC, and additional mailing offices. Copyright © 1992 by the American Association for the Advancement of Science. The title SCIENCE is a registered trademark of the AAAS. Domestic individual membership and subscription (51 issues): \$87 (\$47 allocated to subscription). Domestic institutional subscription (51 issues): \$195. Foreign postage extra: Mexico, Caribbean (surface mail) \$50; Other countries (air assist delivery) \$95. First class, airmail, student and emeritus rates on request. Canadian rates with GST available upon request, GST #1254 88122. Change of address: allow 6 weeks, giving old and new addresses and 11-digit account number. Postmaster: Send change of address to *Science*, P.O. Box 2033, Marion, OH 43305-2033. Single copy sales: \$6.00 per issue prepaid includes surface postage; Guide to Biotechnology Products and Instruments, \$20. Bulk rates on request. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$1 per copy plus \$0.10 per page is paid directly to CCC, 27 Congress Street, Salem, Massachusetts 01970. The identification code for *Science* is 0036-8075/92 \$1 + .10. *Science* is indexed in the *Reader's Guide to Periodical Literature* and in several specialized indexes.

■ The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objectives are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, to advance education in science, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.

COVER Three-dimensional reconstructions of the cerebral cortex of a rat, viewed from behind. Colored symbols indicate retrovirally labeled neurons that form five clones. The three orange cells and the three green cells represent two widely dispersed neuronal clones, both extending over large cortical distances. See page 434. [Photograph by C. Walsh]

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
