APPEAL BRIEF

Sir:

Further to the Notice of Appeal under 37 C.F.R. § 41.31 filed in this merged reexamination proceeding on 22 August 2008, Owners file this appeal brief in compliance with § 41.37. On 17 October 2008, the Office granted a request to extend the time for filing a brief to 10 December 2008. Accordingly, this brief is timely filed.

Owners request that the Director debit the fee for filing an appeal brief, **\$540** (§ 41.20(b)(2)), as well as any other fees required to make this or any other paper submitted in support of this appeal timely or proper, from our **Deposit Account No. 18-1260**.

Sections (1) to (7) below correspond to the requirements of § 41.37(c)(1)(i)-(vii), respectively. The sections required under § 41.37(c)(1)(viii)-(x) appear as appendices to this brief.

APPEAL BRIEF

9 DECEMBER 2008 – PAGE 1

Sanofi/Regeneron Ex. 1024, pg 711

Table of Contents

(1) Real Party in Interest.....	10
(2) Related Appeals, Interferences, and Judicial Proceedings	11
(3) Status of Claims.....	13
(4) Status of Amendments.....	14
(5) Summary of Claimed Subject Matter	15
(6) Grounds of Rejection to be Reviewed on Appeal.....	18
(7) Argument	19
(a) The '415 Invention Was Made a Quarter Century Ago During the Infancy of the Biotechnology Industry.....	19
(b) The Separate and Very Different Cabilly Inventions.....	22
(i) The Cabilly I Patented Invention (the '567 Patent)	22
(ii) The Cabilly II Patented Invention (the '415 Patent)	22
(c) Four Distinct Reasons Mandate Reversal of the Rejections	24
(i) The Prior Art Does Not Disclose or Suggest All of the Elements Required by the '415 Claimed Invention	25
(ii) The Prior Art Leads Away from the '415 Claimed Approach of Producing a Multimeric Immunoglobulin Structure	26
(iii) The '567 Claims and the Cited References Do Not Show that the '415 Claimed Invention Could Have Been Predictably Achieved in April 1983	28
(iv) The Strong Evidence of Secondary Considerations Negates the Asserted Obviousness of the '415 Claims	29
(d) The Examiner's Rejection Must Be Reversed as Unsupported by the Evidence and the Controlling Law.....	29
(i) Applicable Law	29
(ii) The Final Rejection and the Underlying Record of Examination.....	31
(iii) The Patentably Distinct Inventions of the '415 and '567 Patents.....	32
A. Three Important Differences Between the Claimed Inventions	32
B. The Examiner Fails to Properly Identify and Appreciate the Differences Between the Host Cells Required by the '415 and '567 Claimed Inventions	34
C. The '415 Invention Requires a Substantially Different Product Made by a Substantially Different Process	37
D. The Examiner Mistakenly Relies on <u>Geneva Pharmaceuticals</u>	39
(iv) The Examiner Does Not Establish a <u>Prima Facie</u> Case of Obviousness- Type Double Patenting, But Instead Rests on a Hindsight Reconstruction	

of the '415 Claimed Invention Using a Scientifically Incorrect Portrayal of the Prior Art	40
A. The Examiner Improperly Employed a Hindsight-Driven, Rather than Objective, Analysis of the Claims and Prior Art Teachings	40
B. The Examiner Ignored the “Collective” Teachings of the Cited References and the General Knowledge in the Field of the Invention in April 1983	41
C. <u>Axel</u> Does Not Teach or Suggest the Type of Expression Required by the '415 Patent Claims	44
I. <u>Axel</u> Proposes the Same “One Polypeptide in a Host Cell” Strategy Shared by the '567 Claims	45
II. <u>Axel</u> Produced No “Functional” Desired Polypeptides	47
III. <u>Axel</u> Did Not Show Successful “Co-Expression” of Two Foreign DNA Sequences	49
IV. <u>Axel</u> Does Not Teach or Suggest Expressing Multiple DNA Sequences Encoding Different “Desired” Polypeptides in One Host Cell.....	51
V. <u>Axel</u> Does Not Show or Suggest Production of “Intact (Assembled)” Antibodies by Producing Heavy and Light Immunoglobulin Chains in One Host Cell.....	52
D. <u>Rice</u> Expressed a Single Recombinant Light Chain Gene and Reported Unpredictable Results	55
I. <u>Rice</u> Does Not Describe or Suggest the '415 Claimed Invention.....	55
II. The Examiner Improperly Equates the '415 Claimed Invention to the Actual <u>Rice</u> Experiments	58
III. The Examiner Improperly Dismissed the Relevant Testimony of Qualified Experts	59
IV. The Examiner Improperly Relies on a Third-Party Declaration About a Hypothetical Experiment Not Disclosed or Suggested in <u>Rice</u>	63
E. <u>Kaplan</u> and <u>Moore</u> Direct the Person of Ordinary Skill Down a Different Path Than What is Required by the '415 Invention.....	66
I. The “Road Map” in <u>Kaplan</u> Leads Away from the '415 Claimed Invention	67
II. <u>Moore</u> Also Leads Away from the '415 Claimed Approach of Producing an Immunoglobulin Multimer	68
F. <u>Dallas</u> Would Have Been Considered Irrelevant to Production and Recovery of Multimeric Eukaryotic Proteins in April 1983.....	69
I. The <u>Dallas</u> Method of Making a Whole-Cell <u>E. coli</u> Vaccine Would Not Have Made Producing a Multimeric Immunoglobulin Obvious.....	69

II. The Examiner Distorts the Relevance of <u>Dallas</u> with Hindsight	74
G. <u>Ochi</u> Demonstrates Unpredictability in a Far Simpler Experiment than What Is Required by the '415 Claims	76
H. Experimental Work in Frog Oocytes Would Not Have Set Expectations for Recombinant Host Cells	78
I. The Frog Oocyte Experiments Do Not Foretell Results in DNA Transformed Host Cells	79
II. The Examiner's View that Differences Between mRNA and DNA are "Not Substantive" is Incorrect	80
I. <u>Accolla</u> and <u>Builder</u> Add Nothing to the Examiner's Rationale.....	83
J. The Cited References Refute, Rather than Support, the Examiner's Essential Findings Allegedly Supporting his Conclusion of Obviousness	83
(v) Substantial Evidence of Secondary Considerations Supports the Conclusion that the '415 Patent Claims Are Not Obvious, and Must Be Accorded Proper Weight.....	84
(vi) The Examiner Either Ignored or Improperly Dismissed the Testimony of Qualified Experts in the § 1.132 Declarations	85
(vii) The Board Should Give Weight to the Numerous Past PTO Determinations, Including Those of the Board, Finding the Approach Required by the '415 Claims Patentably Distinct from that Required by the '567 Claims	87
(viii) The Examiner Erred as a Matter of Law in Repeatedly Treating the '567 Patent Disclosure as Prior Art.....	89

<u>In re Aldrich</u> , 398 F.2d 855, 158 U.S.P.Q. 311 (C.C.P.A. 1968)	90, 91

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
