What Is PROVENGE Immunotherapy?

Share this page

PROVENGE is the first and only FDA-approved immunotherapy for advanced prostate cancer

PROVENGE is the only personalized immunotherapy treatment that is clinically proven to help extend life in certain men with advanced prostate cancer.

PROVENGE is an [immunotherapy](#) that takes your own immune cells and reprograms them to attack your advanced prostate cancer. This process delivers a treatment designed just for you.

PROVENGE has proven results as an advanced prostate cancer immunotherapy

In the clinical trial, which was known as IMPACT, that supported FDA approval, more men treated with PROVENGE lived longer than men not treated with PROVENGE.

- Median survival was 4.1 months longer for men who received PROVENGE (25.8 months) than for men who did not (21.7 months)*
 - PROVENGE reduced the risk of death by 22.5% for patients in the PROVENGE group*
- More men in the PROVENGE group (nearly 38% more) were alive 3 years after the start of the study than men not treated with PROVENGE*
- 1.5% of men discontinued treatment with PROVENGE due to side effects

*Individual results may vary.

Who Is PROVENGE For?

PROVENGE® (sipuleucel-T) is a prescription medicine that is used to treat certain patients with advanced prostate cancer. PROVENGE is made from your own immune cells.

INDICATION

PROVENGE® (sipuleucel-T) is a prescription medicine that is used to treat certain patients with advanced prostate cancer. PROVENGE is made from your own immune cells.

IMPORTANT SAFETY INFORMATION

- Before getting PROVENGE, tell your doctor about all your medical problems, including problems with your heart or lungs, or if you have had a stroke
- Tell your doctor about all the medicines you take, including prescription and nonprescription drugs, vitamins, and dietary supplements
- PROVENGE is made from your own immune cells, collected approximately 3 days before each scheduled infusion of PROVENGE. The collection is called "leukapheresis" (pronounced loo-kuh-fuh-REE-sis). You will get PROVENGE in 3 intravenous infusions (put into your veins), about 2 weeks apart. Each infusion takes about 60 minutes. You will then be monitored for at least 30 minutes. Your doctor will give you a schedule for your cell collection and infusion appointments. It is very important that you arrive on time for your appointments
- The most common side effects of PROVENGE include chills, fatigue, fever, back pain, nausea, joint ache, and headache. These are not all the possible side effects of PROVENGE treatment
- PROVENGE infusion can cause serious reactions. Tell your doctor right away if you:
 - Have breathing problems, chest pains, racing heart or irregular heartbeats, high or low blood pressure, dizziness, fainting, nausea, or other getting PROVENGE. Any of these may be signs of heart or lung problems
