Mayo v. Prometheus. 132 S. Ct. 1289, 1294, 1297-98 (2012)25

Tronzo v. Biomet, Inc., 236 F.3d 1342 (Fed. Cir. 2001).....1

I. Introduction

In its February 5, 2019 opinion, the Federal Circuit vacated the Board’s denial of Patent Owner’s motion to amend in light of *Aqua Products* and the Board’s construction of the proposed claims, instructing the Board on remand to treat the preamble as an additional limitation of proposed claim 31. However, the Federal Circuit left undisturbed the Board’s conclusion that claims 1-5 and 7-30 of the ’592 patent (the “original claims”) are all unpatentable. As a result, the underlying issues the Board decided in reaching its unpatentability conclusion are now settled and preclusive. Further, the evidentiary record—identical to that which was before the Board when it entered its final written decision (“FWD,” Paper 99)—establishes that the proposed claims are unpatentable even in light of *Aqua Products* and applying the Federal Circuit’s claim construction.

II. Decided Issues Supporting the Board’s Original Unpatentability Determination Are Now Preclusive and Support Denial of the Motion.

Issues decided in a trial proceeding and thus “within the scope of the judgment appealed from” are only open to reconsideration on remand if “explicitly reserved or remanded by the [appellate] court,” all other issues “are foreclosed from further consideration.” *Engel Indus., Inc. v. Lockformer Co.*, 166 F.3d 1379, 1383 (Fed. Cir. 1999); *see also Tronzo v. Biomet, Inc.*, 236 F.3d 1342, 1349 (Fed. Cir. 2001) (“Because Biomet failed to [appeal punitive damages], clearly implicated in the initial decision of the district court, our mandate in *Tronzo I* acted

to prevent Biomet from raising this issue on remand or in any future proceedings in this litigation.”). This doctrine is part of the mandate rule. As a result of this doctrine, the Board’s conclusion that claims 1-5 and 7-30 are unpatentable and every issue the Board decided in reaching that conclusion are final and preclusive.

In deciding that the original claims were unpatentable, the Board decided issues of fact and law that support a finding that the proposed claims are likewise unpatentable. In light of the Federal Circuit’s mandate, the Board should consider them to be conclusively settled. The settled issues of fact and law include the following:

A. Settled Issues 1-4: The Example 1 Protocol Is In the Prior Art

1. As of the priority date¹, the prior art references Winquist and the TROPIC Listing together disclosed the same treatment protocol being used in the same clinical trial for treating the same patient population as that described in Example 1 of the ’592 patent. FWD, 16-19, 42.
2. In 2008, a POSA would have known that Winquist and the TROPIC Listing disclosed the same treatment regimen being used in the same ongoing phase III trial—the TROPIC Study—and would have read them together. FWD, 23-24.

¹ The priority date asserted by Patent Owner for the proposed claims is January 11, 2010. Paper 22 at 2.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
