Dedication

To my husband, grandparents,
parents, sister, and brothers.

Acknowledgments

This was the most difficult and at the same time the most enjoyable section to write. As I write it, I realize that it could well be the longest section in the dissertation, since I would like to acknowledge all the wonderful people I have met and interacted throughout my life. Unfortunately, for lack of space, I do not explicitly mention all their names.

First and foremost, I would like to express my sincere thanks to my advisor, Dr. Peter Danzig, for his guidance, encouragement, support, and friendship. I was very fortunate to have had the opportunity to work with him during the past 4 years. He has contributed greatly to this dissertation and my maturity as a researcher. I cannot imagine how a professor could be more dedicated to his students. He will always serve as a model to me.

I wish to thank the members of my qualifying and dissertation committees: Deborah Estrin, Clifford Neumann, Shahram Ghandeharizadeh, and John Silvester. I would especially like to thank Professors Estrin and Silvester for their helpful comments and discussions.

Several people have assisted in this research. I would like to acknowledge Dante DeLucia for his implementation of *flood-d* and *mirror-d*. Kitinon Wangpattana-mongkol has implemented the logical topology calculation algorithm, and Steve Miller has developed the simulation package I used to build my simulators.

I sincerely thank all the members, old and new, faculty and students, of the Network and Distributed Systems Laboratory at USC. I was fortunate enough to be a member of this friendly, enjoying, and stimulating research community. They

DOCKET ALARM

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS
Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS
Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS
Sync your system to PACER to automate legal marketing.
