1	A. Yes, sir.	1
2	Q. And triangulation, are you familiar with	2
3	triangulation?	3
4	A. Yes, sir.	4
5	Q. Are you familiar with cell tower	5
6	triangulation?	6
7	A. Yes, sir.	7
8	Q. That was a prior art technique available	8
9	before the TracBeam patents, correct?	9
10	A. Yes, sir.	10
11	Q. Is GPS dependent on cell tower	11
12	triangulation?	12
13	A. No, sir, it's not oh, I don't think so.	13
14	Q. Is cell tower triangulation dependent on	14
15	GPS?	15
<mark>16</mark>	A. That's a difficult that's a difficult	16
17	question to answer.	17
<mark>18</mark>	Q. Why?	18
<mark>19</mark>	A. Because it may or may not be in certain	19
20	circumstances.	20
21	Q. So cell tower triangulation doesn't have to	21
22	be dependent on GPS, correct?	22
<mark>23</mark>	A. There may be a version.	23
24	Q. There was a version of cell tower	24
25	triangulation prior to TracBeam's invention that did	25

	Page 334	
1	performed.	1
2	Q. Is it your understanding that prior to	2
3	TracBeam's invention, there were no TDOA techniques	3
4	other than TDOA techniques that relied on GPS?	4
<mark>5</mark>	A. My understanding is that there is that	5
-		

6	there probably is such a system. I was just
7	answering your specific question, sir, before that.
8	Q. So then prior art techniques did exist prior
9	to your invention that were not dependent on each
10	other, correct?
11	MR. EICHMANN: Objection to form.
12	THE WITNESS. I believe so

BY MR. CULPEPPER: Q. If a system today operated in line with the Loomis prior art patent, would you agree that that

DOCKET

Α

system would not infringe your patents?	1
MR. EICHMANN: Objection to form.	1
THE WITNESS: No, sir.	1
BY MR. CULPEPPER:	1
Q. Why not?	2
MR. EICHMANN: Objection to form.	2
THE WITNESS: TracBeam probably has over a	2
thousand claims perhaps in this general area, and I'm	2
not prepared to go through those claims, and I'm	2
thinking of something that's like Loomis but probably	2

	Page 333
1	not involve GPS, correct?
2	MR. EICHMANN: Objection to form.
3	THE WITNESS: I don't have any in mind right
4	at this time. My belief is there probably was.
5	BY MR. CULPEPPER:
6	Q. Sir, didn't you and Mr. LeBlanc start your
7	investigation with terrestrial techniques that
8	existed like TDOA and TOA?
9	MR. EICHMANN: Objection; form.
10	THE WITNESS: We investigated those, yes,
11	sir.
12	BY MR. CULPEPPER:
13	Q. And you did not invent those techniques,
14	correct?
15	A. No, sir.
16	Q. Did TDOA at the time, or the TDOA variations
17	that you investigated, involve GPS?
18	A. Actually, they probably those particular
19	techniques probably do.
20	Q. Why?
21	A. Because it's my understanding that in that
22	particular case, GPS signals may be required for the
23	cell towers in order for the timing issues for CDMA
24	to synchronize the base stations so that accurate
25	locations, or even any reasonable location can be

Page 335

1	not Loomis because Loomis is prior art, but if there
2	is something like Loomis, I'm not prepared to go
3	through those one way or the other.
4	As for Loomis specifically and what is
5	disclosed in the in the Loomis patent, my
6	assumption would be that that system would not
7	infringe claims because then those claims would be
8	invalid.
9	BY MR. CULPEPPER:
10	Q. So a system that operated as described in
11	the Loomis patent either wouldn't infringe TracBeam's
12	claims or TracBeam's claims would be invalid,
13	correct?
14	MR. EICHMANN: Objection to form.
15	THE WITNESS: No, sir.
16	BY MR. CULPEPPER:
17	Q. Why?
18	A. In any system like this, the systems are
19	extremely complicated, and there could be all kinds
20	of other additional features in such a system that
21	could infringe claims. It is not as simple, I
22	believe, as you're or at least I interpret that
23	you're either perceiving or indicating.
24	Q. Sir, if a system operates the way Loomis
25	describes, how is it possible for that system to

	Page 336	Page 337
1	infringe your patents, yet those same patents not be	¹ correct?
2	invalidated by Loomis?	2 A. Yes, sir.
3	MR. EICHMANN: Objection to form.	³ Q. Loomis describes a wireless location system
4	THE WITNESS: Any system okay. Let me	⁴ that uses two location techniques, correct?
5	let me back up, sir.	⁵ A. Yes, sir.
6	Suppose an imple implementation of Loomis	⁶ Q. You testified today that at least some of
7	were currently available, that implementation would	⁷ your claims are not invalidated by Loomis, correct?
8	have additional features beyond what is disclosed in	⁸ A. I believe that's the case.
9	Loomis. What I'm saying is there those additional	⁹ Q. If a system was implemented as described in
