

XYREM® Titration Schedule

For optional use by the prescribing physician to organize the titration dosage of XYREM for patients.

Call the SDS Pharmacy with any titration questions at 1-866-997-3688.

Fax completed Titration Schedule, along with the Patient Enrollment/ Prescription Form, to the SDS Pharmacy (toll-free) at 1-866-470-1744.

Patient Name _____ Date of Birth _____

Physician Name _____ Date _____

Titration and Dosage for XYREM

Starting dose First dose: _____ grams; Second dose: _____ grams for _____ days

1st Titration First dose: _____ grams; Second dose: _____ grams for _____ days

2nd Titration First dose: _____ grams; Second dose: _____ grams for _____ days

3rd Titration First dose: _____ grams; Second dose: _____ grams for _____ days

1 to 2 weeks are recommended between dosage increases to evaluate clinical response and minimize adverse effects.

Dosing and Titration Calculator

	1 st Dose	+	2 nd Dose	=	Total Nightly Dose
Recommended starting dose	2.25 grams		2.25 grams		4.5 grams
	3 grams		3 grams		6 grams
	3.75 grams		3.75 grams		7.5 grams
Maximum dose	4.5 grams		4.5 grams		9 grams

Effective dose range

Due to its short half-life, XYREM is taken in 2 equal doses at night.

Recommended starting dose is 4.5 g/night. Dosage should be titrated to effect in increments of 1.5 g/night (0.75 g per dose) to a maximum dose of 9 g/night.

Please see enclosed full Prescribing Information, including boxed warning.
