ZTE (USA) INC, HTC CORPORATION, AND HTC AMERICA, INC.

Petitioners

v.

EVOLVED WIRELESS, LLC

Patent Owner

---

Case IPR2016-00757

Patent 7,881,236

---

**PATENT OWNER'S PRELIMINARY RESPONSE TO  
PETITIONERS' PETITION FOR INTER PARTES REVIEW OF  
UNITED STATES PATENT NO. 7,881,236**

## TABLE OF CONTENTS

I.	Introduction .....	1
II.	The State of the art .....	2
	A. Mobile telephony and LTE .....	2
	B. Identifying radio resources .....	4
	C. Base station communicates the radio resources it has allocated to a UE with uplink grants .....	6
	D. A UE having new data to upload, but lacking radio resources sufficient for the upload, used the random access procedure to obtain the resources.....	7
III.	The claims .....	11
	A. Independent claim 1 .....	11
	B. Independent claim 7 .....	13
IV.	Claim Construction .....	15
	A. Claim 1 .....	16
	1. The claim language, properly read, excludes the possibility of transmitting new data along with the Msg3 buffer data .....	16
	2. Petitioners’ claim construction is highly suspect because it claims an inoperative method.....	19
	3. ZTE’s arguments all fail .....	20
	a. Petitioners improperly dissect differences in meaning between “only if” and “if” .....	20
	b. Petitioners’ other arguments fail, too .....	21
	4. Patent Owner’s proposed construction for claim 1.....	24
	B. Claim 7 .....	24
V.	Petitioner’s argument that the 321 reference teaches limitation 1(e) is wrong, even using Petitioners’ unreasonable claim construction .....	28
VI.	The claims, using the broadest reasonable construction, are not obvious .....	29
	A. Petitioners’ argument that the 320 reference teaches not transmitting the Msg3 buffer data along with the new data fails because it is based on a logical error .....	30

B. Petitioners failed to address the proper construction of limitation 1(e), and then failed to find that limitation in the prior art, so Ground 1 fails for this additional reason.....33

C. Petitioners address neither the proper construction of limitation 7(e) nor 7(g), and then failed to find those limitations in the prior art, so Ground 2 fails .....34

D. Petitioners’ simultaneous development argument is irrelevant and wrong .....35

VII. Conclusion.....35

<i>PPC Broadband, Inc. v. Corning Optical Communs. RF, LLC</i> , 815 F.3d 747 (Fed. Cir. 2016) .....	20, 21
<i>Pods, Inc. v. Porta Stor, Inc.</i> , 484 F.3d 1359 (Fed. Cir. 2007) .....	22
<i>Shenyang Yuanda Aluminum Industry Eng'g. v. United States</i> , 776 F.3d 1351 (Fed. Cir. 2015) .....	17

Pursuant to 37 C.F.R. § 42.107, Patent Owner Evolved Wireless, LLC submits this Preliminary Response to the above-captioned Petition for *Inter Partes* Review of U.S. Patent No. 7,811,236 (“Pet.,” Paper 1).

## **I. Introduction**

The Petition fails to establish a reasonable likelihood that Petitioners would prevail with respect to any claim challenged in the Petition. The failure is manifold. First, the Petition offers unreasonably broad constructions for one limitation of the independent claims of U.S. Patent No. 7,811,236 (the “’236 patent”). Second, the Petition fails to apply the reasoning it used to come up with the first limitation’s construction to a second limitation. Then, the Petition fails to show how this second limitation is rendered obvious. For this reason alone, after construing the claims, the Board should deny the Petition.

Perhaps recognizing the unreasonableness of its proposed construction, the Petition also offers a narrower construction, but the Board should deny the Petition under this construction too. This is because Petitioners’ argument that Exhibit 1002 (“the 320 reference”) fills the gap in its primary reference (“the 321 reference”) is incorrect. The 320 reference shows only a simple case in the random access procedure that is at issue, and because the reference does not consider more complex cases (cases that the ’236 patent inventors did consider), the conclusion Petitioners drew from it is unsupported.

Finally, even using Petitioners’ unreasonably broad construction, the Petition fails to demonstrate that the 321 reference teaches a claim element present in all grounds. Indeed, that reference, which allegedly discloses the two conditions

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
