Case IPR2016-00822

U.S. Patent No. 7,064,197

### I. INTRODUCTION

Patent Owner Enzo Life Sciences, Inc. ("Patent Owner" or "Enzo") moves to exclude certain paragraphs of and the Attachment to Petitioner's Exhibit 1037 a declaration submitted by Petitioner's back-up counsel (hereinafter also referred to as "declarant") in support of Petitioner's reply—under Federal Rule of Evidence ("FRE") 602 because the declarant lacks the requisite personal knowledge of the matters in those paragraphs and the Attachment. In that declaration, Petitioner's back-up counsel attempted to authenticate a laboratory protocol—mentioned but not described or detailed in the 2001 Diehl reference itself—that is supposedly currently available on a website. Petitioner's back-up counsel testified, among other things, that the laboratory protocol described in a website printout that she made on April 5, 2017 (attached as Attachment A to her declaration), is purportedly the same protocol identified in the 2001 Diehl reference. (Ex. 1037 ¶¶ 3, 5, Attachment A; see also Ex. 1032.) But Petitioner's back-up counsel fails to provide any testimony that would establish she has personal knowledge of the laboratory protocol or that it is the same protocol cited in the 2001 Diehl article. Based upon that lack of personal knowledge, paragraphs 3 and 5 and Attachment A of her declaration should be excluded under FRE 602.

Pursuant to 37 C.F.R. § 42.64(c), Enzo confirms that the bases for this motion to exclude were timely raised in Enzo's objections to evidence filed on April 12, 2017. (Paper 35.)

### II. BACKGROUND

Petitioner relies on the 2001 Diehl reference to argue that one of its primary anticipation references—the 1981 Fish reference—inherently discloses a nucleic acid strand in "hybridizable form" attached to a PLL coated support. (Petition, 23-25.) But Diehl does not disclose or detail the laboratory protocol used to prepare PLL coated slides in the purported hybridization experiments discussed in the reference. (Ex. 1021, 1) In comparing the disclosure in Fish to the laboratory protocol allegedly used in the Diehl reference, Petitioner and its expert, Dr. Norman Nelson, rely upon Exhibit 1032, a purported website printout of a laboratory protocol. (Petition, 23-24 (citing Ex. 1002 ¶¶ 58, 59 (citing Ex. 1032 and Ex. 1033)); Petitioner Reply, 7 n. 1 ("See Ex. 1037 addressing Enzo's concern about Ex.1032.").) Petitioner's expert, Dr. Nelson, alleges that the printout marked as Exhibit 1032 is the laboratory protocol cited in the 2001 Diehl reference and lists the web address where it purportedly accessed was as http://cmgm.stanford.edu/pbrown/protocols/1 slides.html. (Ex. 1002 ¶ 58 (citing Ex. 1021, 1).) However, Diehl cites a different web address for the laboratory

## Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## **Real-Time Litigation Alerts**

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## **Advanced Docket Research**

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## **Analytics At Your Fingertips**

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

#### API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

#### **LAW FIRMS**

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

#### **FINANCIAL INSTITUTIONS**

Litigation and bankruptcy checks for companies and debtors.

## **E-DISCOVERY AND LEGAL VENDORS**

Sync your system to PACER to automate legal marketing.
