DECISION
Institution of *Inter Partes* Review
37 C.F.R. § 42.108

I. BACKGROUND

Sony Mobile Communications (USA) Inc., Sony Mobile
Communications AB, Sony Mobile Communications, Inc., Sony Electronics,

Inc., Sony Corp. of America, and Sony Corp. (collectively, “Petitioner”) filed a request for an *inter partes* review of claims 1, 8–13, 15, 16, 18–21, and 23–30 of U.S. Patent No. 7,454,212 B2 (Ex. 1001, “the ’212 patent”) under 35 U.S.C. §§ 311–319. *See* Paper 5 (“Petition” or “Pet.”). Patent Owner Adaptix, Inc. filed a preliminary response. *See* Paper 11 (“Prelim. Resp.”). We have jurisdiction under 35 U.S.C. § 314. Section 314 provides that an *inter partes* review may not be instituted unless “the information presented in the petition . . . shows that there is a reasonable likelihood that the petitioner would prevail with respect to at least 1 of the claims challenged in the petition.”

For the reasons that follow, we institute an *inter partes* review as to claims 1, 8–13, 15, 16, 18–21, and 23–30 of the ’212 patent.

B. The '212 Patent

The '212 patent relates to subcarrier selection for each of multiple subscribers (e.g., mobile phones) that includes measuring channel and interference information for subcarriers based on pilot symbols received from a base station. Ex. 1001, Abstract. Orthogonal frequency division multiplexing (OFDM) is an efficient modulation scheme for signal transmission over frequency-selective channels. *Id.* at col. 1, ll. 23–25. The invention employs orthogonal frequency division multiple access (OFDMA), which is a method for multiple access using the basic format of the OFDM modulation scheme. *Id.* at col. 1, ll. 36–51; *see generally id.* at col. 1, l. 14 col. 2, l. 30, col. 3, ll. 4–11.

C. Illustrative Claim

Claim 1, reproduced below, is illustrative.

1. A method for subcarrier selection for a system employing orthogonal frequency division multiple access (OFDMA) comprising:

a subscriber unit measuring channel and interference information for a plurality of subcarriers based on pilot symbols received from a base station;

the subscriber unit selecting a set of candidate subcarriers;

the subscriber unit providing feedback information on the set of candidate subcarriers to the base station;

the subscriber unit receiving an indication of subcarriers of the set of subcarriers selected by the base station for use by the subscriber unit; and

the subscriber unit submitting updated feedback information, after being allocated the set of subcarriers to be allocated an updated set of subcarriers, and thereafter the subscriber unit receiving another indication of the updated set of subcarriers.

II. ANALYSIS

A. Claim Interpretation

In an *inter partes* review, the Board construes claim terms in an unexpired patent using their broadest reasonable construction in light of the specification of the patent in which they appear. 37 C.F.R. § 42.100(b); Office Patent Trial Practice Guide, 77 Fed. Reg. 48,756, 48,764 (Aug. 14, 2012).

Although Petitioner submits constructions for several terms (Pet. 7–13), for purposes of this Decision we do not find construction of any terms necessary at this stage in the proceeding. Further, Patent Owner in its
