I, Dr. Glen Stevick, declare and state as follows:

I. INTRODUCTION

1. I have been retained by Ironburg Inventions Ltd. (“Ironburg” or “Petitioner”) to consider the merits of Valve Corporation’s (“Valve”) unpatentability claims set forth in the above-captioned Petition with regard to United States Patent No. 8,641,525 (“the ‘525 patent”). I have personal knowledge of the facts and opinions stated in this Declaration, and am competent to testify thereto.

2. My company, Berkeley Engineering And Research, Inc. (BEAR) is being compensated for my time at my standard consulting rate of \$450.00 per hour. My compensation is not contingent upon the substance of my declaration, any statements or opinions made, or the outcome of this matter.

II. QUALIFICATIONS

3. I understand that a true and accurate copy of my current curriculum vitae has been identified and will be filed by Ironburg as Exhibit 2003. Several of the details concerning my educational background, work experience, academic appointments, honors, awards, and publications are further discussed below.

4. I have over 25 years experience in the general field of mechanical engineering and related engineering disciplines. My expertise includes years of experience in failure analysis and design of structures, consumer products, industrial equipment and medical devices, including specifically mechanical-electrical systems, aortic, hip and knee implants, turbines and reciprocating engines, automotive and aircraft components; structural dynamics, electronic control systems, material behavior, heat transfer and structure/fluid interaction.

5. I received a Bachelors of Science degree in Mechanical Engineering from Michigan Technological University in 1980 and a Masters of Science degree in Mechanical Engineering from the University of California, Berkeley in 1981.

6. I worked for Chevron Corporation during and after my time at Michigan Technological University and U.C. Berkeley while working toward my Master's degree.

7. In 1989, I returned to the University of California, Berkeley and started Berkeley Engineering And Research, Inc. ("BEAR"). BEAR provides mechanical and electrical engineering services ranging from project analysis and consultation to accident investigations and expert testimony.

8. I completed my Ph.D. in Mechanical Engineering from the University of California, Berkeley in 1993 majoring in material behavior and design, and minoring in structural analysis and dynamics and controls (electronic controls).
9. I have more than 30 years of experience as a mechanical engineer, which began with nearly a decade working for Chevron as a project engineer and engineering mechanics specialist.
10. I am a registered Mechanical Engineer in California, Texas, Louisiana and Nevada and a member of the American Society of Mechanical Engineers.
11. My experience with Chevron related to many mechanical and electrical engineering methods and technologies used to control downstream process equipment, upstream oil and gas equipment, surface processing equipment and well-control equipment such as blowout preventers. I also provided advice and guidance concerning off-shore platforms in the Gulf of Mexico and the North Sea, including the avoidance of structural vibrations, the calculation of crack growth rates in platform structures, and the determination of remaining life for the platforms when operating in offshore

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
