Fifth Edition

- vector-based image from an entire bit-mapped black/white/gray scale, or color clip art, paint program, or scanned image file.
- core storage A form of storage device that uses magnetic cores usually strung through wires in the form of an ARRAY; used in older computers.
- **corrective maintenance** The activity of detecting, isolating, and correcting failures after they occur.
- corrupted file A FILE with distorted data.
- **cost analysis** A technique used to determine the overall costs of a given system and to compare them to cost factors estimated for a new design.
- cost/benefit analysis A quantitative form of evaluation in which benefits are assessed and costs associated with achieving the benefits are determined.
- **cost-effectiveness** The effectiveness of a system or an operation in terms of the relationship of the benefits received to the resources expended to attain them. A system in which the received benefits exceed the associated costs is considered to be cost-effective.
- costing A method of assigning costs to a project, job, or function.
- **cottage key people** People who work at home and transmit work to the company by telecommunications, diskettes, or other means.
- **count** The successive increase or decrease of a cumulative total of the number of times an event occurs.
- **counter** A device, such as a register or computer storage location, used to represent the number of occurrences of an event.
- counting loop A program loop used to perform an action a fixed number of times.
- $\boldsymbol{coupling}$ The interaction between systems or between properties of a system.
- **courier** A monospaced typeface that resembles typewriter text. Commonly a built-in font on laser printers.
