UNITED STATES PATENT AND TRADEMARK OFFICE

BEFORE THE PATENT TRIAL AND APPEAL BOARD

CISCO SYSTEMS, INC. and ARRIS GROUP, INC.,
Petitioner,

v.

TQ DELTA, LLC,
Patent Owner.

Case IPR2016-01007¹
Patent No. 8,432,956 B2

**PATENT OWNER'S OBJECTIONS TO PETITIONERS'
DEMONSTRATIVES**

¹ ARRIS Group, Inc., who filed a Petition in IPR2017-00422, has been joined in this proceeding.

Patent Owner TQ Delta, LLC (“Patent Owner”) submits the below objections to Petitioners’ demonstrative exhibits. A copy of the objected-to portions of the demonstratives is attached hereto as Exhibit A.

- **Slide 5** – The statement “PO Expert, Dr. Short” is a mischaracterization of the record, or at the very least misleading, because Dr. Short is not Patent Owner’s expert in any of IPR2016-01006, -1007, -1008, or -1009 which are the subject of this hearing; he is an expert in an unrelated proceeding and his cited hearsay testimony is a subject of Patent Owner’s Motion to Exclude.

- **Slide 12** – The statement in the heading that “Patent Owner’s expert admits that ‘power spectral density’ represents ‘power level’” is not supported by the quoted testimony (i.e., Dr. Chrissan’s testimony that “if you integrated the power spectral density” then “you would have a measure of power”), because Dr. Chrissan was not specifically asked, nor did he answer, that power spectral density “represents” power level.

- **Slide 41** – The statement highlighted by Petitioners that “Another motivation provided in the Petition—also ignored by TQ Delta—was to ‘make Milbrandt’s system compliant with the ANSI T1.413 standard’” misrepresents the record, because Patent Owner did not ignore that alleged motivation, addressing it at pages 6 and 30-31 of its Preliminary Response and pages 20-21 of its Response.

- **Slide 5** – Patent Owner maintains its objection to the improper new Reply argument and evidence cited in this slide (the entirety of the slide), which was identified in Patent Owner's Listing of Improper Reply / New Argument and Evidence (Paper 21).

- **Slide 21** – Patent Owner maintains its objection to the improper new Reply argument and evidence cited in this slide (new expert testimony that “an array of SNR margin test parameters would in fact represent SNR per subchannel”), which was identified in Patent Owner's Listing of Improper Reply / New Argument and Evidence (Paper 21).

- **Slide 33** - Patent Owner maintains its objection to the improper new Reply argument and evidence cited in this slide (the entire slide regarding Milbrandt's alleged inability to “allow for readily assessing system interactions” by distinguishing different noise sources) which was identified in Patent Owner's Listing of Improper Reply / New Argument and Evidence (Paper 21).

- **Slide 38** - Patent Owner maintains its objection to the improper new Reply argument and evidence cited in this slide (new expert testimony that “[a] POSITA would have understood that the aggregate includes individual values for each of sub-carriers” and a new figure from new Exhibit 1009), which were identified in Patent Owner's Listing of Improper Reply / New Argument and

IPR2016-01007
Patent No. 8,432,956

Evidence (Paper 21).

- **Slide 42** - Patent Owner maintains its objection to the improper new Reply argument and evidence cited in this slide (new expert testimony that “a POSITA would have measured the PSD based on Reverb to understand the changes over the frequency spectrum (i.e., per subchannel)”, and a new figure from new Exhibit 1009), which was identified in Patent Owner’s Listing of Improper Reply / New Argument and Evidence (Paper 21).

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
