UNITED STATES PATENT AND TRADEMARK OFFICE

BEFORE THE PATENT TRIAL AND APPEAL BOARD

CISCO, INC.
Petitioner

v.

TQ DELTA, LLC
Patent Owner

Case No. IPR2016-01009
Patent No. 8,238,412

PATENT OWNER'S PRELIMINARY RESPONSE

TABLE OF CONTENTS

I. INTRODUCTION1

II. SUMMARY OF THE '412 PATENT10

III. CLAIM CONSTRUCTION11

IV. NO REVIEW SHOULD BE INSTITUTED WITH RESPECT TO THE SINGLE GROUND RAISED BY PETITIONER—ALLEGED OVIOUSNESS UNDER 35 U.S.C. §103 BY MILBRANDT IN VIEW OF CHANG, HWANG AND ANSI T1.41312

 A. Petitioner Have Not Established a Reasonable Likelihood That Claims 9, 11, or 21 Would Have Been Obvious.....14

 1. The Combination of Milbrandt, Hwang, and ANSI T1.413 Would Still Fail to Disclose a Test Message Comprising “*An Array Representing Power Level Per Subchannel Information*”14

 2. Petitioner Has Not Shown That a Test Message Comprising “*An Array Representing Power Level Per Subchannel Information*” Would Have Been Obvious From Milbrandt, Hwang, and ANSI T1.41317

 3. The Combination of Milbrandt, Hwang, and ANSI T1.413 Would Still Fail to Disclose a Test Message “*Wherein Bits in the Message Are Modulated Onto DMT Symbols Using Quadrature Amplitude Modulation (QAM) With More Than 1 bit Per Sub Channel*”19

 4. Petitioner Has Not Shown That a Test Message “*Wherein Bits in the Message Are Modulated Onto DMT Symbols Using Quadrature Amplitude Modulation (QAM) With More Than 1 bit Per Sub Channel*” Would Have Been Obvious From Milbrandt, Hwang, and ANSI T1.41322

 B. Petitioner Has Not Established a Reasonable Likelihood That Claims 10 or 12 Would Have Been Obvious.....26

1. The Combination of Milbrandt, Hwang, and ANSI T1.413 Fails to Satisfy the Claims for the Same Reasons As Independent Claims 9 and 11	26
2. The Combination of Milbrandt, Chang, Hwang, and ANSI T1.413 Would Also Still Fail to Disclose a Test Message Comprising “Power Level Per Subchannel Information . . . Based on a Reverb Signal”	26
3. Petitioner Has Not Shown That a Test Message Comprising “Power Level Per Subchannel Information . . . Based on a Reverb Signal” Would Have Been Obvious From Milbrandt, Hwang, and ANSI T1.413	29
C. Petitioner Has Not Established a Reasonable Likelihood That Claim 15 Would Have Been Obvious.....	33
1. The Combination of Milbrandt, Chang, Hwang, and ANSI T1.413 Would Still Fail to Disclose a Test Message Comprising “An Array Representing Signal to Noise Ratio Per Subchannel During Showtime Information”	33
2. Petitioner Has Not Shown That a Test Message Comprising “An Array Representing Signal to Noise Ratio Per Subchannel During Showtime Information” Would Have Been Obvious From Milbrandt, Hwang, and ANSI T1.413	37
3. The Combination of Milbrandt, Hwang, and ANSI T1.413 Would Still Fail to Disclose or Render Obvious a Test Message “Wherein Bits in the Message Are Modulated Onto DMT Symbols Using Quadrature Amplitude Modulation (QAM) With More Than 1 Bit Per Subchannel”	41
D. Petitioner Has Not Established a Reasonable Likelihood That Claims 16-18 Would Have Been Obvious.....	43
1. The Combination of Milbrandt, Chang, Hwang, and ANSI T1.413 Fails to Disclose All Limitations of Claims 16-18	43
2. Petitioner Does Not Provide Sufficient Articulated Reasons to Combine The Asserted References.....	47

a) Because Milbrandt Already Discloses How To Determine Noise and When to Adjust Power/Gain, Combining Chang's Teachings Would Have Been Redundant and Unneeded	48
b) Chang's Method of Measuring Background Noise With Additional Equipment and a Service Technician Visit Is Specifically Taught Away From by Milbrandt and Would Change the Fundamental Principle of Operation of Milbrandt	50
c) There is No Evidence of a Reasonable Expectation of Success In Incorporating Chang's Overall Concept of Measuring Background Noise Into Milbrandt, Without Using Chang's Additional Equipment and Service Technician Visit.....	50
d) Petitioner Provides Only Circular and Illogical Reasons For Combining Hwang with Milbrandt/Chang	57
V. CONCLUSION.....	60
CERTIFICATE OF WORD COUNT	61

I. INTRODUCTION

Patent Owner TQ Delta, LLC (“Patent Owner”) submits this preliminary response to the Petition filed by Cisco, Inc. (“Cisco” or “Petitioner”) requesting *inter partes* review of claims 9-12, 15-18, and 21 of U.S. Pat. No. 8,238,412 (“the ’412 patent”).

This is the third IPR Petition filed against the ’412 patent (and the second petition against the ’412 patent filed by Petitioner Cisco¹). The first petition, filed in IPR2016-00430 by Arris Group, Inc. (a party similarly situated with Cisco as a supplier of products accused of infringement in the related litigation identified in the Petition), was recently denied institution by the Board. (*See* IPR2016-00430 at Paper 9, Decision Denying Institution.) In that decision, the Board found that Arris had (1) failed to show that the asserted prior art disclosed all limitations of the claims of the ’412 patent (including the same claims challenged here), and/or (2) failed to provide sufficient rationale to support obviousness. (*See id.*)

Now, Cisco is attempting another bite at the apple of attacking the ’412 patent, but using different prior art references than those asserted by Arris. This Petition, however, is deficient for similar reasons. Here, Petitioner Cisco raises a

¹ Cisco also filed a petition in IPR2016-001008, challenging claims 1-8, 13-14, and 19 of the ’412 patent.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
