Patent Owner.
```

TRANSCRIPT OF PROCEEDINGS had of the telephonic conference call of the above-entitled matter on the 6th of July, 2017, at the hour of 1:00 o'clock p.m. CST.

BEFORE: HONORABLE TREVOR JEFFERSON HONORABLE KALYAN DESHPANDE HONORABLE SALLY MEDLEY

	Page 2		Page 4
1	APPEARANCES:	1	themselves?
2	HAYNES & BOONE, LLP. BY: MR. DAVID L. McCOMBS	2	Okay. We'll get started. We
3	David.mccombs.ipr@haynesboone.com	3	received this because Patent Owner requested a
4	and MP, THEODORE M, EOSTER	4	call seeking routine, and in the alternative,
4	MR. THEODORE M. FOSTER Ipr.theo.foster@haynesboone.com	5	additional discovery related to, I believe, the
5	2323 Victory Avenue - Suite 700	6	cross-examination of Petitioner's expert.
6	Dallas, Texas 75219 214.651.5533.	7	So we'll start with the Patent
7	On behalf of the Petitioner Cisco	8	Owner and hoping the Patent Owner will
8	Systems, Inc.;	9	specifically address what type of discovery
0	McANDREWS, HELD & MALLOY, LTD.	10	they are seeking and the basis for that
9	BY: MR PETER McANDREWS	11	discovery as succinctly as possible. Thank
10	Pmcandrews@mcandrews-ip.com MR. ANDREW KARP	12	you.
	Akarp@mcandrews-ip.com	13	MR. McANDREWS: Yes, your Honor, this is
11	MR. THOMAS WIMBISCUS Twimbiscus@mcandrews-ip.com	14	Peter McAndrews for Patent Owner.
12	MR. RAGENDRA A. CHÎPLUNKAR	15	As we briefly summarized in the
1 2	Rchiplunkar@mcandrews-ip.com 500 West Madison Street - Suite 3400	16	email, Petitioner's expert, Dr. Tellado,
13	Chicago, Illinois 60661	17	prepared a MATLAB program to simulate the
14	312.775.8000,	18	purported operation of the primary prior art
15 16	On behalf of the Patent Owner.	19	reference. We'll call it Shively, prior art
17		20	reference. We'll call it Shivery, prior art
18 19		21	
20		22	He performed two simulations.
21 22		23	One was for an 18,000-foot DSL line. The
23			second simulation was for a 12,000-foot DSL
24		24	line.
	Page 3		Page 5
1	JUDGE JEFFERSON: Good afternoon. Let's	1	The MATLAB script that he had
2	start with appearances from Patent Owner	2	written and the results for the 12,000-foot
3	counsel today.	3	line were provided to the Patent Owner, along
4	MR. McANDREWS: This is Peter McAndrews for	4	with the Petitioner's reply declaration.
5	Patent Owner Delta.	5	The MATLAB script and the results
6	MR. KARP: This is Andrew Karp from Patent	6	for the 18,000-foot line, however, were not
7	Owner, along with Tom Wimbiscus and Ragendra	7	provided.
8	Chiplunkar.	8	When asked during
9	JUDGE JEFFERSON: Thank you. And for	9	cross-examination
10	Petitioner.	10	JUDGE JEFFERSON: Okay. Just to clarify,
11	MR. McCOMBS: This is David McCombs and	11	this is cross you discovered the 18,000-foot
12	Theo Foster for Petitioner Cisco.	12	line simulations from a deposition of Dr.
13	JUDGE JEFFERSON: Are there any other	13	Tellado
14	parties on the line?	14	MR. McANDREWS: I'm sorry. I'm sorry. So
1 -	Which party requested the court	15	the 12,000 the MATLAB script and the results
15	reporter?	16	for the 12,000-foot line had been provided with
15 16		1	
	MR. McANDREWS: Patent Owner.	17	the reply declaration.
16	MR. McANDREWS: Patent Owner.	17 18	the reply declaration.  On cross-examination, however, we
16 17	MR. McANDREWS: Patent Owner.  JUDGE JEFFERSON: Thank you, Patent Owner.	18	On cross-examination, however, we
16 17 18 19	MR. McANDREWS: Patent Owner.  JUDGE JEFFERSON: Thank you, Patent Owner.  For the court reporter's aid, we will try to	18 19	On cross-examination, however, we learned that he had performed had written a
16 17 18 19 20	MR. McANDREWS: Patent Owner.  JUDGE JEFFERSON: Thank you, Patent Owner.  For the court reporter's aid, we will try to identify ourselves before speaking.	18 19 20	On cross-examination, however, we learned that he had performed had written a MATLAB script and performed what he described
16 17 18 19 20 21	MR. McANDREWS: Patent Owner.  JUDGE JEFFERSON: Thank you, Patent Owner.  For the court reporter's aid, we will try to identify ourselves before speaking.  We're here today for IPRs	18 19 20 21	On cross-examination, however, we learned that he had performed had written a MATLAB script and performed what he described as a preliminary simulation for an 18,000-foot
16 17 18 19 20 21 22	MR. McANDREWS: Patent Owner.  JUDGE JEFFERSON: Thank you, Patent Owner.  For the court reporter's aid, we will try to identify ourselves before speaking.  We're here today for IPRs 2016-1020 and 2016-1021.	18 19 20 21 22	On cross-examination, however, we learned that he had performed had written a MATLAB script and performed what he described as a preliminary simulation for an 18,000-foot line; however, on cross-examination, he was
16 17 18 19 20 21	MR. McANDREWS: Patent Owner.  JUDGE JEFFERSON: Thank you, Patent Owner.  For the court reporter's aid, we will try to identify ourselves before speaking.  We're here today for IPRs	18 19 20 21	On cross-examination, however, we learned that he had performed had written a MATLAB script and performed what he described as a preliminary simulation for an 18,000-foot

2 (Pages 2 to 5)

Page 8 Page 6 1 1 And the reason why we believe correspondence. And Petitioner's counsel has 2 2 that his memory is a bit foggy on that so far refused to provide any record or to, in fact, indicate whether or not records still 3 simulation is because that simulation would, in 3 4 fact, support Patent Owner's expert's opinion 4 5 5 about the 18,000-foot line. JUDGE JEFFERSON: Understood. That was 6 6 Dr. Tellado was unable to recall going to be my next question. Was there some 7 7 the extent to which he had maintained records meeting or conferring between the counsel with 8 8 of that simulation. respect to providing those records at the time? 9 9 He was unable to recall the Were there any representations made by counsel 10 10 extent to which records were kept initially. that you recall? 11 He was unable to recall whether 11 MR. McANDREWS: Yes. So during the 12 that script and the results -- and the results 12 deposition, Petitioner's counsel refused to 13 13 will typically be -- generate an array of confirm that those records will be provided and numbers and then some graphs would be the 14 14 denied that they were -- that those records result of the MATLAB simulation. 15 15 were in any event discoverable under any rule 16 16 of the Board. He wasn't able to recall whether 17 those were shared with anyone, including 17 Subsequently, there was 18 Petitioner's counsel. 18 correspondence on the topic, and Petitioner 19 The reason why Patent Owner 19 maintained that same position. 20 believes that this routine discovery is -- as a 20 JUDGE JEFFERSON: Okay. 21 21 starting point, as I mentioned, we believe that Secondly, is it your position that 22 22 script and the results would be contrary to Dr. Tellado's reply declaration relied on the 23 positions taken by Petitioner and their expert. 23 18,000-foot line simulation as part of its 24 24 Additionally, Dr. Tellado analysis? Page 7 Page 9 1 1 testified in his reply declaration that it is MR. McANDREWS: Yes, yes. It's both -- I'm 2 only a line simulation using a script like -- a 2 sorry. Yes, so it's both his reply 3 3 simulation like his MATLAB script that will testimony -- so the reason why the 12,000-foot 4 4 provide an accurate and useful estimation of line comes up is Patent Owner's expert had 5 5 the behavior of the 18,000-foot cell line. provided testimony about the behavior of a 6 6 And therefore we believe that it is routine Shively reference on an 18,000-foot line, 7 7 because an 18,000-foot line or longer is discovery. 8 8 We also believe in the referenced as the problem that Shively is 9 9 alternative, it would satisfy the Interest of attempting to solve. 10 Justice standard for additional discovery. 10 Petitioner came back and said two 11 JUDGE JEFFERSON: Thank you. One 11 things. One, they said that why not do a 12 clarifying question. So the 18,000-foot line 12 12,000-foot loop, so they took the 12,000-foot 13 13 issue was uncovered during cross-examination, loop to task. But at the same time, they take 14 14 correct? the position in their reply, and also their 15 15 MR. McANDREWS: Yes, your Honor. And, in expert in the reply declaration takes the 16 fact -- I'm sorry. 16 position, that Patent Owner's expert's analysis 17 17 JUDGE JEFFERSON: No, go ahead. I'll let is flawed, and they use some other superlatives 18 18 to describe how wrong it is, in fact, the you finish. 19 MR. McANDREWS: I'm sorry. I was just 19 Patent Owner's simulation -- that the Patent 20 20 Owner's analysis of the 18,000-foot line. going to say, and when it came up, you know, 21 the witness was asked questions about where the 21 We believe that the 18,000-foot 22 22 records were, and during the deposition, a simulation performed by Dr. Tellado will be 23 23 request was made of Petitioner's counsel to very much in line with the conclusions of Dr. 24 24 Short. However -- well, let me add one other provide a copy. We followed up with

	Page 10		Page 12
1	thing. And this is actually something the	1	Patent Owner's expert is faulty and not
2	Petitioner has raised with us.	2	reliable.
3	So the MATLAB script was provided	3	In that analysis in his
4	to us. And, of course, we can take that script	4	declaration, he does not use or reference any
5	and plug in the right numbers ourselves. Have	5	simulation.
6	our own expert plug in the numbers and run that	6	His analysis is purely based on a
7	18,000-foot simulation, and we would get the	7	math and logic, for example.
8	results that we believe you know, and we	8	And so we don't believe there's
9	have done it by the way, and we've gotten	9	and then turning to the cross-examination
10	results that show that, in fact, Dr. Short's	10	testimony, nowhere in that did Dr. Tellado
11	analysis was correct, and, in fact, the prior	11	state that he relied on an 18,000-foot
12	art doesn't have this problem that Petitioner	12	simulation to come to any of the conclusions
13	claims.	13	that he reached in this case, either expressed
14	But in any event, we don't have	14	in his declaration or otherwise.
15	the ability to get that into evidence now.	15	And so because Dr. Tellado's not
16	So instead what we were hoping to	16	been shown to rely on what he termed a quick
17	show from discovery from Petitioner is that	17	estimate that he ran, we don't believe that
18	their own expert has, in fact, confirmed our	18	there's any need for discovery into that.
19	expert's conclusions.	19	And then picking up on the second
20	JUDGE JEFFERSON: Understood.	20	point that Patent Owner
21	Let's turn to the Petitioner's	21	JUDGE JEFFERSON: Before we move on, let me
22	counsel, Mr. McCombs, I believe.	22	ask some clarifying questions.
23	MR. McCOMBS: I'm going to turn this over	23	When was the MATLAB simulation of
24	to Mr. Foster.	24	the 12,000-foot line provided to Patent Owner's
	Page 11		Page 13
1	JUDGE JEFFERSON: Mr. Foster, my first	1	counsel? Was it part of the reply declaration?
1 2	JUDGE JEFFERSON: Mr. Foster, my first question is, same to you, which is, why isn't	1 2	counsel? Was it part of the reply declaration? I'm confused.
	*		
2	question is, same to you, which is, why isn't	2	I'm confused.
2	question is, same to you, which is, why isn't this, in your opinion, routine or additional	2	I'm confused.  You're making it sound like there
2 3 4	question is, same to you, which is, why isn't this, in your opinion, routine or additional discovery? And more importantly, why what	2 3 4	I'm confused.  You're making it sound like there is no simulation basis at all, yet clearly some
2 3 4 5	question is, same to you, which is, why isn't this, in your opinion, routine or additional discovery? And more importantly, why what is the basis for determining that you would not	2 3 4 5	I'm confused. You're making it sound like there is no simulation basis at all, yet clearly some information has been exchanged between the
2 3 4 5 6	question is, same to you, which is, why isn't this, in your opinion, routine or additional discovery? And more importantly, why what is the basis for determining that you would not provide the 18,000-foot simulation information?	2 3 4 5 6	I'm confused.  You're making it sound like there is no simulation basis at all, yet clearly some information has been exchanged between the parties.
2 3 4 5 6 7	question is, same to you, which is, why isn't this, in your opinion, routine or additional discovery? And more importantly, why what is the basis for determining that you would not provide the 18,000-foot simulation information?  MR. FOSTER: Thank you, Judge Jefferson.	2 3 4 5 6 7	I'm confused. You're making it sound like there is no simulation basis at all, yet clearly some information has been exchanged between the parties. MR. FOSTER: Yes, Judge. Let me clarify
2 3 4 5 6 7 8	question is, same to you, which is, why isn't this, in your opinion, routine or additional discovery? And more importantly, why what is the basis for determining that you would not provide the 18,000-foot simulation information?  MR. FOSTER: Thank you, Judge Jefferson. This is Mr. Foster.	2 3 4 5 6 7 8	I'm confused. You're making it sound like there is no simulation basis at all, yet clearly some information has been exchanged between the parties. MR. FOSTER: Yes, Judge. Let me clarify that.
2 3 4 5 6 7 8	question is, same to you, which is, why isn't this, in your opinion, routine or additional discovery? And more importantly, why what is the basis for determining that you would not provide the 18,000-foot simulation information?  MR. FOSTER: Thank you, Judge Jefferson. This is Mr. Foster.  The Petitioner believes this is	2 3 4 5 6 7 8	I'm confused. You're making it sound like there is no simulation basis at all, yet clearly some information has been exchanged between the parties. MR. FOSTER: Yes, Judge. Let me clarify that. With Petitioner's reply, Dr.
2 3 4 5 6 7 8 9	question is, same to you, which is, why isn't this, in your opinion, routine or additional discovery? And more importantly, why what is the basis for determining that you would not provide the 18,000-foot simulation information?  MR. FOSTER: Thank you, Judge Jefferson.  This is Mr. Foster.  The Petitioner believes this is not an appropriate discovery request first and	2 3 4 5 6 7 8 9	I'm confused. You're making it sound like there is no simulation basis at all, yet clearly some information has been exchanged between the parties. MR. FOSTER: Yes, Judge. Let me clarify that. With Petitioner's reply, Dr. Tellado did provide a simulation for a 12,000-foot scenario. The source code for that
2 3 4 5 6 7 8 9 10	question is, same to you, which is, why isn't this, in your opinion, routine or additional discovery? And more importantly, why what is the basis for determining that you would not provide the 18,000-foot simulation information?  MR. FOSTER: Thank you, Judge Jefferson.  This is Mr. Foster.  The Petitioner believes this is not an appropriate discovery request first and foremost because it's clear from Dr. Tellado's	2 3 4 5 6 7 8 9 10	I'm confused. You're making it sound like there is no simulation basis at all, yet clearly some information has been exchanged between the parties. MR. FOSTER: Yes, Judge. Let me clarify that. With Petitioner's reply, Dr. Tellado did provide a simulation for a 12,000-foot scenario.
2 3 4 5 6 7 8 9 10 11	question is, same to you, which is, why isn't this, in your opinion, routine or additional discovery? And more importantly, why what is the basis for determining that you would not provide the 18,000-foot simulation information?  MR. FOSTER: Thank you, Judge Jefferson. This is Mr. Foster.  The Petitioner believes this is not an appropriate discovery request first and foremost because it's clear from Dr. Tellado's second declaration that was filed with	2 3 4 5 6 7 8 9 10 11	I'm confused. You're making it sound like there is no simulation basis at all, yet clearly some information has been exchanged between the parties. MR. FOSTER: Yes, Judge. Let me clarify that. With Petitioner's reply, Dr. Tellado did provide a simulation for a 12,000-foot scenario. The source code for that
2 3 4 5 6 7 8 9 10 11 12	question is, same to you, which is, why isn't this, in your opinion, routine or additional discovery? And more importantly, why what is the basis for determining that you would not provide the 18,000-foot simulation information?  MR. FOSTER: Thank you, Judge Jefferson. This is Mr. Foster.  The Petitioner believes this is not an appropriate discovery request first and foremost because it's clear from Dr. Tellado's second declaration that was filed with Petitioner's reply that he did not rely on a	2 3 4 5 6 7 8 9 10 11 12	I'm confused. You're making it sound like there is no simulation basis at all, yet clearly some information has been exchanged between the parties. MR. FOSTER: Yes, Judge. Let me clarify that. With Petitioner's reply, Dr. Tellado did provide a simulation for a 12,000-foot scenario. The source code for that simulation was provided in Exhibit 1034 to
2 3 4 5 6 7 8 9 10 11 12 13 14	question is, same to you, which is, why isn't this, in your opinion, routine or additional discovery? And more importantly, why what is the basis for determining that you would not provide the 18,000-foot simulation information? MR. FOSTER: Thank you, Judge Jefferson. This is Mr. Foster.  The Petitioner believes this is not an appropriate discovery request first and foremost because it's clear from Dr. Tellado's second declaration that was filed with Petitioner's reply that he did not rely on a simulation of an 18,000-foot scenario in	2 3 4 5 6 7 8 9 10 11 12 13	I'm confused. You're making it sound like there is no simulation basis at all, yet clearly some information has been exchanged between the parties. MR. FOSTER: Yes, Judge. Let me clarify that. With Petitioner's reply, Dr. Tellado did provide a simulation for a 12,000-foot scenario. The source code for that simulation was provided in Exhibit 1034 to Patent Owner's counsel.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	question is, same to you, which is, why isn't this, in your opinion, routine or additional discovery? And more importantly, why what is the basis for determining that you would not provide the 18,000-foot simulation information?  MR. FOSTER: Thank you, Judge Jefferson.  This is Mr. Foster.  The Petitioner believes this is not an appropriate discovery request first and foremost because it's clear from Dr. Tellado's second declaration that was filed with Petitioner's reply that he did not rely on a simulation of an 18,000-foot scenario in expressing any of the opinions in his declaration.  Regarding his analysis for why	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	I'm confused. You're making it sound like there is no simulation basis at all, yet clearly some information has been exchanged between the parties. MR. FOSTER: Yes, Judge. Let me clarify that. With Petitioner's reply, Dr. Tellado did provide a simulation for a 12,000-foot scenario. The source code for that simulation was provided in Exhibit 1034 to Patent Owner's counsel. And the graph resulting from
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	question is, same to you, which is, why isn't this, in your opinion, routine or additional discovery? And more importantly, why what is the basis for determining that you would not provide the 18,000-foot simulation information?  MR. FOSTER: Thank you, Judge Jefferson. This is Mr. Foster.  The Petitioner believes this is not an appropriate discovery request first and foremost because it's clear from Dr. Tellado's second declaration that was filed with Petitioner's reply that he did not rely on a simulation of an 18,000-foot scenario in expressing any of the opinions in his declaration.  Regarding his analysis for why Patent Owner's expert used a an analysis of	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	I'm confused. You're making it sound like there is no simulation basis at all, yet clearly some information has been exchanged between the parties. MR. FOSTER: Yes, Judge. Let me clarify that. With Petitioner's reply, Dr. Tellado did provide a simulation for a 12,000-foot scenario. The source code for that simulation was provided in Exhibit 1034 to Patent Owner's counsel. And the graph resulting from running Exhibit 1034 was included in Dr.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	question is, same to you, which is, why isn't this, in your opinion, routine or additional discovery? And more importantly, why what is the basis for determining that you would not provide the 18,000-foot simulation information? MR. FOSTER: Thank you, Judge Jefferson. This is Mr. Foster.  The Petitioner believes this is not an appropriate discovery request first and foremost because it's clear from Dr. Tellado's second declaration that was filed with Petitioner's reply that he did not rely on a simulation of an 18,000-foot scenario in expressing any of the opinions in his declaration.  Regarding his analysis for why Patent Owner's expert used a an analysis of an 18,000-foot example, and in particular	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	I'm confused. You're making it sound like there is no simulation basis at all, yet clearly some information has been exchanged between the parties. MR. FOSTER: Yes, Judge. Let me clarify that. With Petitioner's reply, Dr. Tellado did provide a simulation for a 12,000-foot scenario. The source code for that simulation was provided in Exhibit 1034 to Patent Owner's counsel. And the graph resulting from running Exhibit 1034 was included in Dr. Tellado's second declaration, which was Exhibit
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	question is, same to you, which is, why isn't this, in your opinion, routine or additional discovery? And more importantly, why what is the basis for determining that you would not provide the 18,000-foot simulation information?  MR. FOSTER: Thank you, Judge Jefferson.  This is Mr. Foster.  The Petitioner believes this is not an appropriate discovery request first and foremost because it's clear from Dr. Tellado's second declaration that was filed with Petitioner's reply that he did not rely on a simulation of an 18,000-foot scenario in expressing any of the opinions in his declaration.  Regarding his analysis for why Patent Owner's expert used a an analysis of an 18,000-foot example, and in particular Patent Owner's expert use of what was called a	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	I'm confused. You're making it sound like there is no simulation basis at all, yet clearly some information has been exchanged between the parties. MR. FOSTER: Yes, Judge. Let me clarify that. With Petitioner's reply, Dr. Tellado did provide a simulation for a 12,000-foot scenario. The source code for that simulation was provided in Exhibit 1034 to Patent Owner's counsel. And the graph resulting from running Exhibit 1034 was included in Dr. Tellado's second declaration, which was Exhibit 1026. JUDGE JEFFERSON: So the declaration relies on one of these MATLAB simulations?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	question is, same to you, which is, why isn't this, in your opinion, routine or additional discovery? And more importantly, why what is the basis for determining that you would not provide the 18,000-foot simulation information?  MR. FOSTER: Thank you, Judge Jefferson.  This is Mr. Foster.  The Petitioner believes this is not an appropriate discovery request first and foremost because it's clear from Dr. Tellado's second declaration that was filed with Petitioner's reply that he did not rely on a simulation of an 18,000-foot scenario in expressing any of the opinions in his declaration.  Regarding his analysis for why Patent Owner's expert used a an analysis of an 18,000-foot example, and in particular Patent Owner's expert use of what was called a Gaussian approximation is inappropriate.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	I'm confused. You're making it sound like there is no simulation basis at all, yet clearly some information has been exchanged between the parties. MR. FOSTER: Yes, Judge. Let me clarify that. With Petitioner's reply, Dr. Tellado did provide a simulation for a 12,000-foot scenario. The source code for that simulation was provided in Exhibit 1034 to Patent Owner's counsel. And the graph resulting from running Exhibit 1034 was included in Dr. Tellado's second declaration, which was Exhibit 1026. JUDGE JEFFERSON: So the declaration relies on one of these MATLAB simulations? MR. FOSTER: Yes.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	question is, same to you, which is, why isn't this, in your opinion, routine or additional discovery? And more importantly, why what is the basis for determining that you would not provide the 18,000-foot simulation information?  MR. FOSTER: Thank you, Judge Jefferson.  This is Mr. Foster.  The Petitioner believes this is not an appropriate discovery request first and foremost because it's clear from Dr. Tellado's second declaration that was filed with Petitioner's reply that he did not rely on a simulation of an 18,000-foot scenario in expressing any of the opinions in his declaration.  Regarding his analysis for why Patent Owner's expert used a an analysis of an 18,000-foot example, and in particular Patent Owner's expert use of what was called a Gaussian approximation is inappropriate.  Dr. Tellado sets forth in great	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	I'm confused. You're making it sound like there is no simulation basis at all, yet clearly some information has been exchanged between the parties. MR. FOSTER: Yes, Judge. Let me clarify that. With Petitioner's reply, Dr. Tellado did provide a simulation for a 12,000-foot scenario. The source code for that simulation was provided in Exhibit 1034 to Patent Owner's counsel. And the graph resulting from running Exhibit 1034 was included in Dr. Tellado's second declaration, which was Exhibit 1026. JUDGE JEFFERSON: So the declaration relies on one of these MATLAB simulations? MR. FOSTER: Yes. JUDGE JEFFERSON: And during the
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	question is, same to you, which is, why isn't this, in your opinion, routine or additional discovery? And more importantly, why what is the basis for determining that you would not provide the 18,000-foot simulation information? MR. FOSTER: Thank you, Judge Jefferson. This is Mr. Foster.  The Petitioner believes this is not an appropriate discovery request first and foremost because it's clear from Dr. Tellado's second declaration that was filed with Petitioner's reply that he did not rely on a simulation of an 18,000-foot scenario in expressing any of the opinions in his declaration.  Regarding his analysis for why Patent Owner's expert used a an analysis of an 18,000-foot example, and in particular Patent Owner's expert use of what was called a Gaussian approximation is inappropriate.  Dr. Tellado sets forth in great detail in paragraphs 16 to 29 of his	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	I'm confused. You're making it sound like there is no simulation basis at all, yet clearly some information has been exchanged between the parties. MR. FOSTER: Yes, Judge. Let me clarify that. Let's turn back to Patent Owner. Counsel, briefly.  MR. McANDREWS: Yes. Thank you, your Honor.  JUDGE JEFFERSON: And as brief as you can. I think we've honed in here. I understand we have the 18,000-foot scenario simulation. It was discussed without diving into the details in the deposition, which I confess to not having done. I've looked enough to know I think I understand the issues as you both presented them.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	section of his testimony JUDGE JEFFERSON: I want to stop you there. I'm going to stop you, because I mean I don't think I'm going to be able to bridge the gap between the parties.  If we need to read it, I'm sure I can read it. Judge Deshpande and Judge Medley and I will read it in a brief sometime soon, if we get that far.  But I'm trying to at least understand that's the crystalized dispute here. You claim that the parties had clearly Dr. Tellado relied on the 18,000, or at least performed it, relied on it, and to the extent that it's contrary, you would argue it falls under routine discovery, even if not contrary to positions held by Petitioner, and testimony from Dr. Tellado you would argue it's additional discovery given the discussion that was raised in the cross-examination deposition. Is that fairly accurate or something else I need to  MR. McANDREWS: That states it perfectly,
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	declaration.  JUDGE JEFFERSON: Continue.  MR. FOSTER: And regarding his deposition testimony, he provided answers to all Patent Owner's questions about what he remembered with what that 18,000-foot simulation had showed.  And there was there's no testimony that any of what that showed was inconsistent with his conclusions that Dr. Short used an approximation that was appropriate.  JUDGE JEFFERSON: Okay. Let's turn back to Patent Owner. Counsel, briefly.  MR. McANDREWS: Yes. Thank you, your Honor.  JUDGE JEFFERSON: And as brief as you can. I think we've honed in here. ## Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## **Real-Time Litigation Alerts**

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

### **Advanced Docket Research**

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## **Analytics At Your Fingertips**

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

#### API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

#### **LAW FIRMS**

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

#### **FINANCIAL INSTITUTIONS**

Litigation and bankruptcy checks for companies and debtors.

### **E-DISCOVERY AND LEGAL VENDORS**

Sync your system to PACER to automate legal marketing.
