Art Unit: 2633

The present application is being examined under the pre-AIA first to invent provisions.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of pre-AIA 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 42, 43, 46, 50, and 52 are rejected under pre-AIA 35 U.S.C. 102(a) as being anticipated by Suzuki (US 5,896,419).

Regarding claim 42, Suzuki teaches a communication device (see figure 7) comprising: a multicarrier transmitter operable to support a bit scrambler and a phase scrambler for transmission of a plurality of input bits (see figure 7), wherein the bit scrambler is operable to scramble the plurality of input bits to generate a plurality of scrambled output bits (see figure 7, component 102) and wherein the phase scrambler is operable to scramble a plurality of phases associated with the plurality of input bits (see figure 7, component 103 and 104).

Regarding claim 43, which inherits the limitations of claim 42, Suzuki further teaches wherein the multicarrier transmitter is further operable to transmit at least one scrambled output bit on a first carrier and transmit the at least one scrambled output bit on a second carrier (see figure 7).

Application/Control Number: 13/718,016 Page 3

Art Unit: 2633

Regarding claim 46, which inherits the limitations of claim 43, Suzuki further teaches wherein the transceiver is a wireless transceiver (see abstract).

Regarding claim 49, the method including the features corresponds to subject matter mentioned above in the rejection of claim 42 is applicable hereto.

Regarding claim 50, which inherits the limitations of claim 49, the claimed method including the features corresponds to subject matter mentioned above in the rejection of claim 43 is applicable hereto.

Regarding claim 52, which inherits the limitations of claim 49, the claimed method including the features corresponds to subject matter mentioned above in the rejection of claim 46 is applicable hereto.

Claim Rejections - 35 USC § 103

The following is a quotation of pre-AIA 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 44, 45, 47, 48, 51, 53, and 54 are rejected under pre-AIA 35 U.S.C. 103(a) as being unpatentable over Suzuki (US 5,896,419).

Regarding claim 44, Suzuki in view of Suzuki et al does not expressly teach cable transceiver. However there is no criticality in these limitations. It is well known in the art that applying Suzuki et al in a cable transceiver is within the scope of one of ordinary skilled in the art.

Application/Control Number: 13/718,016 Page 4

Art Unit: 2633

Regarding claim 45, Suzuki in view of Suzuki et al does not expressly teach DSL transceiver. However there is no criticality in these limitations. It is well known in the art that Applying Suzuki et al in a DSL transceiver are within the scope of one of ordinary skilled in the art.

Regarding claim 47, Suzuki in view of Suzuki et al does not expressly teach high speed internet access transceiver. However there is no criticality in these limitations. It is well known in the art that Applying Suzuki et al for high speed internet access are within the scope of one of ordinary skilled in the art.

Regarding claim 48, Suzuki in view of Suzuki et al does not expressly teach the transceiver is for transporting video. However there is no criticality in these limitations. It is well known in the art that applying Suzuki et al for transporting video are within the scope of one of ordinary skilled in the art.

Regarding claim 51, the claimed multicarrier communications transceiver including the features corresponds to subject matter mentioned above in the rejection of claim 45 is applicable hereto.

Regarding claim 53, which inherits the limitations of claim 49, the claimed multicarrier communications transceiver including the features corresponds to subject matter mentioned above in the rejection of claim 47 is applicable hereto.

Regarding claim 54, which inherits the limitations of claim 49, the claimed multicarrier communications transceiver including the features corresponds to subject matter mentioned above in the rejection of claim 48 is applicable hereto.

DOCKET

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
