

UNITED STATES PATENT AND TRADEMARK OFFICE

BEFORE THE PATENT TRIAL AND APPEAL BOARD

CISCO SYSTEMS, INC., DISH NETWORK, LLC,
COMCAST CABLE COMMUNICATIONS, LLC,
COX COMMUNICATIONS, INC.,
TIME WARNER CABLE ENTERPRISES LLC,
VERIZON SERVICES CORP., and ARRIS GROUP, INC.,
Petitioner,¹

v.

TQ DELTA, LLC,
Patent Owner.

IPR No. IPR2016-01021
U.S. Patent No. 8,718,158 B2

PETITIONER'S REPLY

¹ DISH Network, L.L.C., who filed a Petition in IPR2017-00255, and Comcast Cable Communications, L.L.C., Cox Communications, Inc., Time Warner Cable Enterprises L.L.C., Verizon Services Corp., and ARRIS Group, Inc., who filed a Petition in IPR2017-00417, have been joined in this proceeding.

TABLE OF CONTENTS

Petitioner’s Exhibit List4

I. Summary.....7

II. Claim Construction.....7

 A. “scrambling...a plurality of carrier phases”.....7

 B. “transceiver”.....7

III. Combining the teachings of Shively and Stopler would have been obvious to a POSITA.....8

 A. DMT-based communications systems were known to be susceptible to challenges caused by signals with high PAR.....9

 B. Transmitting the same data on multiple carriers causes a spike in signal amplitude and increases PAR10

 C. Shively transmits the same data on multiple carriers, which increases PAR11

 D. Phase scrambling was a known technique for reducing PAR.....12

 E. Combining Stopler’s phase scrambler with Shively’s transmitter is merely the use of a known technique to improve a similar device.14

 F. Market forces would have prompted a POSITA to combine Shively and Stopler.....15

IV. Stopler’s phase scrambler reduces PAR because it scrambles phases of individual QAM symbols16

 A. Dr. Short admitted that Stopler’s phase scrambler is applied to QAM symbols.....16

 B. Stopler does not describe phase scrambling DMT symbols17

 C. Stopler contemplates systems with multiple pilot tones and multiple kinds of overhead channel symbols.....19

 D. TQ Delta’s arguments about the ’156 patent are moot because it changes the phase of individual QAM symbols.....20

V. TQ Delta’s remaining arguments are without merit.....22

 A. Shively’s technique is not limited to 18,000 foot cables22

 B. Dr. Short’s analysis of a hypothetical 18,000 foot cable is flawed.....26

 1. Likelihood of phase alignment for random data27

2.	Likelihood of phase alignment using Shively’s bit-spreading technique	28
3.	Comparing the phase-alignment likelihoods for Shively’s technique and random data.....	29
C.	A rigorous analysis of using Shively’s technique shows that it significantly increases PAR and the likelihood of clipping	31
D.	High PAR causes more problems than just clipping.....	36
E.	Stopler’s diagonalization technique is optional, not required	36
F.	Ground #2: Combining Bremer with Shively and Stopler would have been obvious	38
VI.	Conclusion	39
VII.	Certificate of Word Count	40

Petitioner's Exhibit List

June 8, 2016

- Ex. 1001 U.S. Patent No. 8,718,158 to Tzannes (“the ’158 patent”)
- Ex. 1002 Prosecution File History of U.S. Pat. No. 8,718,158
- Ex. 1003 Prosecution File History of U.S. Pat. No. 8,090,008
- Ex. 1004 Prosecution File History of U.S. Pat. No. 7,769,104
- Ex. 1005 Prosecution File History of U.S. Pat. No. 7,471,721
- Ex. 1006 Prosecution File History of U.S. Pat. No. 7,292,627
- Ex. 1007 Prosecution File History of U.S. Pat. No. 6,961,369
- Ex. 1008 U.S. Provisional Application No. 60/164,134
- Ex. 1009 Declaration of Dr. Jose Tellado under 37 C.F.R. § 1.68
- Ex. 1010 Curriculum Vitae of Dr. Jose Tellado
- Ex. 1011 U.S. Patent No. 6,144,696 to Shively et al. (“Shively”)
- Ex. 1012 U.S. Patent No. 6,625,219 to Stopler (“Stopler”)
- Ex. 1013 U.S. Patent No. 6,424,646 to Gerszberg et al. (“Gerszberg”)
- Ex. 1014 Harry Newton, NEWTON’S TELECOM DICTIONARY, 13th Ed. (1998) (selected pages)
- Ex. 1015 Kim Maxwell, “Asymmetric Digital Subscriber Line: Interim Technology for the Next Forty Years,” *IEEE Communications Magazine* (Oct. 1996).
- Ex. 1016 Walter Goralski, ADSL AND DSL TECHNOLOGIES (McGraw-Hill 1998) (selected pages)

- Ex. 1017 U.S. Patent No. 4,924,516 to Bremer et al. (“Bremer”)
- Ex. 1018 American National Standard for Telecommunications, Network and Customer Installation Interfaces—Asymmetric Digital Subscribers Line (ADSL) Metallic Interface (ANSI T1.413-1995)
- Ex. 1019 U.S. Patent No. 5,515,369 to Flammer, III et al. (“Flammer”)
- Ex. 1020 Declaration of David Bader
- Ex. 1021 Fig. 6 from Ex. 2009 (T. Regan, “ADSL Line Driver/Receiver Design Guide, Part 1” (February 2000)).
- Ex. 1022 Robert T. Short, “Physical Layer,” *in* WIMEDIA UWB (2008).
- Ex. 1023 Denis J. G. Mestdagh and Paul M. P. Spruyt, “A Method to Reduce the Probability of Clipping in DMT-Based Transceivers,” *IEEE Transactions on Communications*, Vol. 44, No. 10, (October 1996).
- Ex. 1024 Stefan H. Muller and Johannes B. Huber, “A Comparison of Peak Power Reduction Schemes for OFDM,” IEEE Global Telecommunications Conference (1997).
- Ex. 1025 Jose Tellado-Mourelo, “Peak to Average Power Reduction for Multicarrier Modulation,” A dissertation submitted to the Department of Electrical Engineering and the Committee on Graduate Studies of Stanford University (Sept. 1999)
- Ex. 1026 Second Declaration of Dr. Jose Tellado under 37 C.F.R. § 1.68
- Ex. 1027 Deposition Transcript of Dr. Robert T. Short
- Ex. 1028 T. Starr, J. M. Cioffi, P. J. Silverman, UNDERSTANDING DIGITAL SUBSCRIBER LINE TECHNOLOGY (1999) (selected pages).
- Ex. 1029 Abe, RESIDENTIAL BROADBAND (2000) (selected pages).
- Ex. 1030 Mohamed Zekri, et al., “DMT Signals with Low Peak-to-Average Power Ratio,” *Proceedings of the IEEE International Symposium on Computers and Communications* (held July 6-8, 1999).
- Ex. 1031 Second Declaration of David Bader

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
