Preface

pal·i·ki·ne·sia, pal·i·ci·ne·sia (pal-i-ki-nē'zē-ă, -si-nē'zē-ă). Involuntary repetition of movements. [G. palin, again, + kinēsis, movement]

pal·i·nal (pal'i-năl). Moving backward. [G. palin, backward]

pal-in-drome (pal'in-drōm). In molecular biology, a self-complementary nucleic acid sequence; a sequence identical to its complementary strand, if both are "read" in the same 5' to 3' direction, or inverted repeating sequences running in opposite directions (e.g., 5'-AGT-TGA-3') on either side of an axis of symmetry; p.'s occur at sites of important reactions (e.g., binding sites, sites cleaved by restriction enzymes); imperfect p.'s exist, as do interrupted p.'s that allow the formation of loops. [G. palindromos, a running back]

pal·in·dro·mia (pal-in-drō'mē-ă). A relapse or recurrence of a disease. [G. palindromos, a running back, + -ia, condition]

pal·in·drom·ic (pal-in-drom'ik). Recurring.

pal i sade (pal'i-sād). In pathology, a row of elongated nuclei parallel to each other. [Fr. palissade, fr. L. palus, a pale, stake]

pal·la·di·um (Pd) (pă-lā'dē-ŭm). A metallic element resembling platinum, atomic no. 46, atomic wt. 106.42. [fr. the asteroid, Pallas; G. *Pallas*, goddess of wisdom]

pall an es the sia (pal'an-es-thē'zē-ā). Absence of pallesthesia. syn apallesthesia. [G. pallō, to quiver, + anaisthēsia, insensibility]

pall-es-the-sia (pal'es-thē'zē-ă). The appreciation of vibration, a form of pressure sense; most acute when a vibrating tuning fork is applied over a bony prominence. SYN bone sensibility, pallesthetic sensibility, vibratory sensibility. [G. pallō, to quiver, + aisthēsis, sensation]

pall-es-thet-ic (pal-es-thet'ik). Pertaining to pallesthesia.

pal·li·al (pal'ē-ăl). Relating to the pallium.

pal-li-ate (pal'ē-āt). To reduce the severity of; to relieve slightly.

syn mitigate. [L. palliatus (adj.), dressed in a pallium, cloaked]

pal·li a tive (pal·e-ă-tiv). Reducing the severity of; denoting the alleviation of symptoms without curing the underlying disease.

pal·li·dal (pal'i-dăl). Relating to the pallidum.

pal·li-dec·to·my (pal'i-dek'tō-mē). Excision or destruction of the globus pallidus, usually by stereotaxy; a prefix may indicate the method used, e.g., chemopallidectomy (destruction by a chemical agent), cryopallidectomy (destruction by cold). [pallidum + G. ektomē. excision]

pal·li do a myg da lot o my (pal'i-dō-ă-mig'dă-lot'ō-mē). Production of lesions in the globus pallidus and amygdaloid nuclei. [pallidum + amygdala (1) + G. tomē, a cutting]

pal·li do an sot o my (pal'i-dō-an-sot'ō-mē). Production of lesions in the globus pallidus and ansa lenticularis.

pal·li·dot·o·my (pal-i-dot'ō-mē). A destructive operation on the globus pallidus, done to relieve involuntary movements or muscular rigidity. [pallidum + G. tomē, incision]

pal·li·dum (pal'i-dum) [TA]. syn globus pallidus. [L. pallidus,

dorsal p. [TA], those parts of the globus pallidus located generally dorsal to the plane of the anterior commissure; along with the dorsal striatum, functions in motor activities with cognitive origins; also form part of the dorsal basal ganglia. SYN p. dorsale [TA].

p. dorsale [TA], syn dorsal p

ventral p. [TA], those parts of the globus pallidus located ventral to the anterior commissure; includes portions of the substantia innominata; along with the ventral striatum believed to function in motor activities with strong motivational or emotional contructs. SYN p. ventrale [TA].

p. ventrale [TA], syn ventral p.

pal·li·um (pal'ē-um) [TA]. syn cerebral cortex. [L. cloak]

pal·lor (pal'or). Paleness, as of the skin. [L.]

cachectic p., syn achromasia (1).

palm (pahm, pawlm) [TA]. The flat of the hand; the flexor or anterior surface of the hand, exclusive of the thumb and fingers; the opposite of the dorsum of the hand. syn palma [TA]. [L. palma]

liver p., exaggerated erythema of the thenar and hypothenar eminences.

pal·ma, pl. pal·mae (pawl'mă, pawl'mē) [TA]. syn palm. palm.

p. ma'nus, palm of the hand. see palm.

pal·mar (pawl'măr) [TA]. Referring to the palm of the hand; volar. syn palmaris [TA]. [L. palmaris, fr. palma]

pal·mar·is (pawl-mār'is) [TA]. syn palmar, palmar. [L.]

pal·mel·lin (pal'mel-in). A red coloring matter formed by an alga, Palmella cruenta.

Palmer, Walter L., U.S. physician, \*1896. SEE P. acid test for peptic ulcer.

palm·ic (pal'mik). Beating; throbbing; relating to a palmus.

pal·mi·tal·de·hyde (pal·mi·tal'dĕ-hīd). Hexadecanal; the 16-carbon aldehyde analog of palmitic acid; a constituent of plasmalogens.

pal·mi-tate (pal'mi-tāt). A salt of palmitic acid.

pal-mit-ic ac-id (pal-mit'ik). A common saturated fatty acidoccurring in palm oil and olive oil as well as many other fats and waxes; the end product of mammalian fatty acid synthase, syn hexadecanoic acid.

pal·mi·tin (pal'mi-tin). The triglyceride of palmitic acid occurring in palm oil. syn tripalmitin.

pal-mit-o-le-ic ac-id (pal'mi-tō-lē'ik). 9-Hexadecenoic acid; a monounsaturated 16-carbon acid; one of the common constituents of the triacylglycerols of human adipose tissue. syn zoomaric acid.

pal·mi·tyl al·co·hol (pal'mi-til). syn cetyl alcohol.

pal·mod·ic (pal-mod'ik). Relating to palmus (1).

pal·mos·co·py (pal-mos'kŏ-pē). Examination of the cardiac pulsation. [G. palmos, pulsation, + skopeō, to examine]

pal·mus, pl. pal·mi (pal'mus, -mī). 1. syn facial tic. 2. Rhythmic fibrillary contractions in a muscle. see ALSO jumping disease. 3. The heart beat. [G. palmos, pulsation, quivering]

pal·pa·ble (pal'pă-bl). 1. Perceptible to touch; capable of being palpated. 2. Evident; plain. [see palpation]

pal-pate (pal'pāt). To examine by feeling and pressing with the palms of the hands and the fingers.

fipal pation (pal-pā'shūn). 1. Examination with the hands, feeling the for organs, masses, or infiltration of a part of the body, feeling the heart or pulse beat, vibrations in the chest, etc. 2. Touching feeling, or perceiving by the sense of touch. [L. palpatio, finely palpo, pp. -atus, to touch, stroke]

palpation of liver

bimanual p., use of both hands to feel organs or masses, especially in the abdomen or pelvis.

light-touch p., a method of determining the outlines of organs of the arm; 3) lower masses by lightly palpating the surface with the tip of a finger, tempke p., q.v.).

pal-pa-to-per means of com pal-pe-bra, pl kd. [L.] p. III, syn pli. p. infe'rior [T
