The most common side effects of Xiidra include eye irritation, discomfort or blurred vision when the drops are applied to the eyes, and an unusual taste sensation. Tell your doctor if you have any side effects that bother you. These are not all of the possible side effects of Xiidra.

Use Xiidra twice per day

Use one drop of Xiidra in each eye, two times a day, about 12 hours apart.

Wear contact lenses?

Take 'em out before using Xiidra and wait at least 15 minutes before popping them back in.

Single-dose containers

Each Xiidra container has enough medicine to treat both of your eyes once. So you'll be using two

Scrub those hands

To avoid contamination, wash your hands first & don't let the tip of the container touch your eye or any surface.

containers each day, about 12 hours apart.

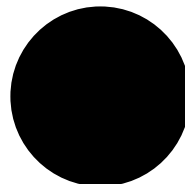

Have bad aim? It's ok!

Each container has some extra solution in case you miss. Throw it out when you're done - don't save it.

Complete Instructions for Use are included with your prescription, but you can also find them **in this pdf.**

WHY TALK TO YOUR EYE DOCTOR? GOOD

QUEST

First of all, it's good to know that you can talk to an optometrist or an ophthalmologist. Either one can diagnose and treat dry eye disease.

They'll want to hear all about your symptoms. They can also do some tests that reveal even more details about your symptoms. Isn't technology amazing?

FUN FACT:

If eye symptoms keep bugging you, getting your eyes checked every year is a good idea. Don't worry, a standard eye exam causes no pain or discomfort. That's a win!

Select Important Safety Information

If you wear contact lenses, remove them before using Xiidra and wait for at least 15 minutes before placing them back in your eyes.

It is not known if Xiidra is safe and effective in children under 17 years of age.
