MARGOLIES, *Administrative Patent Judge*.

DECISION
Denying Patent Owner's Request for Rehearing
37 C.F.R. § 42.71

DOCKET ALARM

I. INTRODUCTION

Voip-Pal.com, Inc. ("Patent Owner") filed a Request for Rehearing (Paper 9, "Rehearing Request" or "Reh'g Req.") of the Decision granting institution of *inter partes* review dated November 21, 2016 (Paper 6, "Institution Decision" or "Inst. Dec."). Patent Owner requests reconsideration of the decision to institute *inter partes* review of claims 1, 7, 27, 28, 34, 54, 72–74, 92, 93, and 111 of U.S. Patent No. 8,542,815 B2 (Ex. 1001, "the '815 patent"). For the reasons discussed below, Patent Owner's request is denied.

II. STANDARD OF REVIEW

The party challenging a decision in a request for rehearing bears the burden of showing the decision should be modified. 37 C.F.R. § 42.71(d). A request for rehearing "must specifically identify all matters the party believes the Board misapprehended or overlooked, and the place where each matter was previously addressed." *Id.* Upon a request for rehearing, the decision on a petition will be reviewed for an abuse of discretion. 37 C.F.R. § 42.71(c).

III. DISCUSSION

Patent Owner maintains that, in the Institution Decision, the Board overlooked Patent Owner's argument that a proper construction of the claims requires a particular ordering of steps, whereas Petitioner's obviousness argument is based on the performance of these steps in a different order. Reh'g Req. 2. Patent Owner also argues that the Board overlooked Patent Owner's arguments that Petitioner failed to provide a

DOCKET ALARM Find authenticated court documents without watermarks at docketalarm.com.

valid motivation for why a skilled person would have combined with Chu ’684[1] with either Chu ’366[2] or Chen.[3] *Id.* at 3. We address each argument below.

A. Ordering of steps argument

Patent Owner argues that the Board overlooked Patent Owner’s argument—set forth in pages 19 through 21 of Patent Owner’s Preliminary Response—that a proper construction of the challenged claims requires a particular ordering of steps, and that Petitioner’s obviousness analysis fails “when a claim construction of the ordering of steps is carried out and the obviousness case considered in view of the construed claims.” *Id.* at 3, 7. Specifically, Patent Owner argues that the Board overlooked the argument that Petitioner’s obviousness analysis fails to account for performing the “locating” step before the “classifying” step. *Id.* at 6–7. Patent Owner maintains that the Board “overlooked the significance of the Patent Owner’s claim construction explaining the required ordering of steps and the Patent Owner’s arguments showing that the Petitioner’s obviousness arguments fail due to Chu ’684’s distinct ordering of steps.” *Id.* at 5. Patent Owner also maintains that the Board “misapprehended the distinction between the claims and the cited references with respect to the order of steps.” *Id.*

We disagree. We did not overlook or misapprehend Patent Owner’s argument regarding the ordering of steps. First, we explicitly cited Patent

Owner's argument and repeated Patent Owner's explanation of the argument in the context of Figure 6 of Chu '684, as follows:

> Figure 6, above, depicts a sequence for handling an on-net call. Ex. 1003, 8:39–40. *According to Patent Owner*, in step 608, server *consults a dial plan* to classify the call, and *in subsequent step 610*, soft-switch 220 determines a match between a calling attribute and at least a portion of a callee identifier. Prelim. Resp. 19–21. Patent Owner argues that step 608 therefore is not based on the claimed match. *Id.* at 19.

Inst. Dec. 22 (emphasis added). As shown above, we expressly referenced Patent Owner's argument that Petitioner's analysis improperly relies on performing the classifying step (step 608) after the step of locating a caller dialing profile (step 610). *Id.*; *see also* Prelim Resp. 21 (arguing that "Chu '684's step 608 occurs *before* the 'locating' step 610"). Second, in our Institution Decision, we explained that Petitioner sufficiently met its burden at the preliminary stage to show that the combined teachings of the references rendered the subject matter of the claims obvious, and that Patent Owner's attempt to distinguish the single reference Chu '684 did not address Petitioner's showing that the combination teaches the claimed steps. *Id.* at 22–23 (citing *In re Mouttet*, 686 F.3d 1322, 1333 (Fed. Cir. 2012) and *In re Keller*, 642 F.2d 413, 425 (CCPA 1981) ("[T]he test for obviousness is what the combined teachings of the references would have suggested to those having ordinary skill in the art.")); *see also id.* at 20 (addressing Petitioner's reliance on both Chu '684 and Chu '366 for teaching the locating step, including Petitioner's reliance on Chu '366 for teaching call origin profiles that include calling attributes such as geographic location, country code, and area code); Pet. 21–22 (relying on both Chu '684 and Chu '366 for teaching the locating step of claim 1), 43–44 (relying on both Chu '684 and Chen for

teaching the locating step of claim 1). Patent Owner again raises the same argument it raised in its Preliminary Response—that Petitioner's obviousness analysis fails because *Chu '684's* ordering of steps is distinct—without explaining how we overlooked a previously-made argument that squarely addresses Petitioner's proposed combinations. *See, e.g.*, Reh'g Req. 4 (arguing that Petitioner "premised its obviousness theory on Chu '684's ordering of steps, which are distinct from those in claim 1"), 5 (arguing that "Chu '684 teaches a method distinct from that of claim 1 because Chu '684 performs its method in an order different from that required by claim 1"), 5 (arguing that the Institution Decision overlooked "Patent Owner's arguments showing that the Petition's obviousness arguments fail due to Chu '684's distinct ordering of steps").

For the above reasons, we are not persuaded that we overlooked or misapprehended the ordering of steps argument in our Institution Decision.

B. Motivation to combine argument

Patent Owner also argues that the Board overlooked Patent Owner's argument that the purported motivation to combine—that allowing users to place calls as if they were dialing from a standard PSTN phone would be desirable—is unsupported by substantial evidence. Reh'g Req. 7–12. Specifically, Patent Owner argues that the Institution Decision relies on testimony from Petitioner's declarant, Dr. Houh, and that that declaration testimony "do[es] not rely upon any evidence for support." *Id.* at 10. Patent Owner also argues that the Board overlooked Patent Owner's argument that Dr. Houh's testimony should be entitled to little or no weight. *Id.* at 11–12.

We do not agree that we overlooked Patent Owner's argument regarding the motivation to combine. In the Institution Decision, we

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
