Thanks, Chris. No, those cites are not part of our proposed structure.

Reza

Hi Reza,

Further to our call last night, can you please provide an update concerning FastVDO's position on the corresponding structures for the means plus function claims? Specifically, can you indicate whether FastVDO contends that the specification cites following the "See, e.g." language are included in FastVDO's proposals for the corresponding structure?

Thanks,
Chris

Hello Chris,

Thanks for the follow up email. This covers the same points raised in your May 25th email. As we previously discussed, we do not think our contentions are deficient. We also believe Defendants' excessive delay in raising these issues not only confirms the sufficiency of FastVDO's disclosures, but also renders any potential dispute moot under Judge Gallo's rules, including Rule IV(C) and (F).

I am available tomorrow afternoon around 2:30 pm Pacific to discuss this further and also Friday morning.

Thanks,
Reza

Counsel,

FastVDO's amended preliminary claim constructions served on 6/1 identified numerous proposed structures for the means plus function elements of claims 7-11 and 22-26. FastVDO's infringement contentions for these claims, however, did not provide the identity of these structures as required by the Court's Scheduling Order. Dkt. 125 (requiring that Plaintiff's contentions include a "chart identifying specifically where each element of each asserted claim is found within each Accused Instrumentality, **including for each element that such party contends is governed by 35 U.S.C. § 112(6), the identity of the structure(s), act(s), or material(s) in the Accused Instrumentality that performs the claimed function**") (emphasis added).

Please confirm that FastVDO will supplement its infringement contentions for these claims to identify the accused structures no later than 6/7, or else confirm that FastVDO is no longer asserting claims 7-11 and 22-26. If FastVDO is unwilling or unable to do so, please provide a time on 6/7 or 6/8 when FastVDO is available to meet and confer.

As we noted previously, the substantive deficiencies in FastVDO's infringement contentions have prejudiced Defendants' ability to fully analyze and consider the alleged scope of the asserted claim limitations in advance of the deadlines to serve proposed claim constructions. Defendants continue to reserve the right to serve modified claim constructions.

Thanks,
Chris

Hello Chris,

Yes, FastVDO currently continues to assert claims 7-11 and 22-26.

Thanks,
Reza
