

ULSI Technology

EDITED BY

C. Y. Chang

*Chair Professor, College of Electrical Engineering and Computer Science
National Chiao Tung University
Director, National Nano Device Laboratories
Hsinchu, Taiwan, ROC*

S. M. Sze

*UMC Chair Professor
Department of Electronics Engineering
Director, Microelectronics and Information Systems Research Center
National Chiao Tung University
Hsinchu, Taiwan, ROC*

*This book was set in Times Roman by Publication Services, Inc.
The editors were Lynn Cox and John M. Morriss;
the production supervisor was Denise L. Puryear.
The cover was designed by Farenga Design Group.
Project supervision was done by Publication Services, Inc.
R. R. Donnelley & Sons Company was printer and binder.*

Cover photo: Electron micrograph of contact holes filled with CVD tungsten plugs (see Chapter 8). The diameter is 0.25 micron. *Courtesy of the National Nano Device Laboratories, National Science Council, R.O.C.*

Library of Congress Catalog Card Number: 95-81366

ABOUT THE EDITORS

C. Y. CHANG is Chair professor at the National Chiao Tung University and Director of the National Nano Device Laboratories, Taiwan, R.O.C. He has been the Dean of the College of Engineering and the Dean of the College of Electrical Engineering and Computer Science. He has written a book, *GaAs High Speed Devices*, has published more than 200 technical papers in international journals, and holds eight patents in ULSI, VHIC, and optoelectronics. He has taught many electronics engineers who have contributed significantly to the rapid growth of ULSI industries in Taiwan. Dr. Chang was elected a Fellow of IEEE in 1988 for his “contributions to semiconductor development and to education.”

S. M. SZE is UMC Chair Professor of the Electronics Engineering Dept. and Director of Microelectronics and Information Systems Research Center, the National Chiao Tung University, Taiwan, R.O.C. For many years he was a member of the technical staff at AT&T Bell Laboratories, Murray Hill, New Jersey. Dr. Sze has made pioneering contributions to semiconductor devices and processing technologies, including the invention of the nonvolatile memory (1967) and the fabrication of MOSFETs in the 0.1 μ m regime (1982). Author or coauthor of more than 100 technical papers, Dr. Sze has written three books on semiconductor devices and edited six books on VLSI technology, high-speed devices, semiconductor sensors, and related topics. He has been elected Fellow of IEEE, member of the Academia Sinica, and member of the National Academy of Engineering.

*To Our Colleagues and Students—
Past, Present, and Future
On the Centennial of Our University—

CONTENTS

List of Contributors	xiii
Preface	xv
Introduction	xvii
1 Cleanroom Technology	1
<i>H. P. Tseng and R. Jansen</i>	
1.1 Introduction	1
1.2 Cleanroom Classification	4
1.3 Cleanroom Design Concept	8
1.4 Cleanroom Installation	24
1.5 Cleanroom Operations	32
1.6 Automation	34
1.7 Related Facility Systems	38
1.8 Summary and Future Trends	54
References	55
Problems	58
2 Wafer-Cleaning Technology	60
<i>C. Y. Chang and T. S. Chao</i>	
2.1 Introduction	60
2.2 Basic Concepts of Wafer Cleaning	60
2.3 Wet-Cleaning Technology	92
2.4 Dry-Cleaning Technology	93
2.5 Summary and Future Trends	100
References	101
Problems	104
3 Epitaxy	105
<i>P. Wang</i>	
3.1 Introduction	105
3.2 Fundamental Aspects of Epitaxy	107
3.3 Conventional Si Epitaxy	115
3.4 Low-Temperature Epitaxy of Si	125
3.5 Selective Epitaxial Growth of Si	131

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
