Subject: IPR2016-01246: Request for Authorization

Dear PTAB:

IP Bridge Exhibit 2080

During the oral hearing in IPR2016-01246 on Monday, August 7, 2017, Judge Arbes asked Patent Owner's counsel if he knew of a case in the semiconductor field that supports the proposition that it is necessary for Petitioner to demonstrate the process of manufacturing the proposed combination in order to properly support an obviousness invalidity argument. The parties do not have a transcript to get the exact wording, but this accords generally with their recollection. Patent Owner did not have a case citation at the time, but requests authorization to file as an exhibit a recent PTAB Final Written Decision that Patent Owner believes is responsive to the question. A copy of the citation has now been provided to Petitioner Counsel.

Counsel for the parties have met and conferred about this issue, and Petitioner's counsel opposes the request on procedural grounds and because Patent Owner is treating a citation as if it were evidence. If, however, the Board allows the filing, Petitioner asks the Board to allow TSMC to submit a half page paper to address the case. Patent Owner's counsel objects to Petitioner's request.

Counsel for the parties are generally available on the afternoons of 8/11 and 8/14 for a call, should one be needed.

Thank you,
Neil F. Greenblum
Counsel for Patent Owner
