### **DETAILED ACTION**

The amendments filed September 13, 2002 have been entered. The cancellation of claims 1-23 in the amendments filed September 13, 2002 is acknowledged. The addition of claims 24-50 in the amendments filed September 13, 2002 is acknowledged.

Claims 24 – 50 are drawn to a method of treating benign or malignant disease of the breast or reproductive tract.

The outstanding objection is withdrawn in view of the cancellation of the claims.

The IDS received September 13, 2002 has been considered.

#### ***Claim Objections***

Claim 32 is objected to because of the following informalities: no period at the end of the claim. Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 24-50 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for cancer and certain hormonal-dependent benign diseases of the breast and endometrial lining, does not reasonably provide enablement for other non-hormonal dependent conditions of the breast and the reproductive tract. The specification does not enable any person skilled in the art to which it pertains, or

Art Unit: 1617

with which it is most nearly connected, to use the invention commensurate in scope with these claims.

In the instant case, the specification fails to provide information that would allow the skilled artisan to practice the instant invention without undue experimentation.

Attention is directed to *In re Wands*, 8 USPQ2d 1400 (CAFC 1988) at 1404 where the court set forth the eight factors to consider when assessing if a disclosure would have required undue experimentation. Citing *Ex parte Forman*, 230 USPQ 546 (BdAplis 1986) at 547 the court recited eight factors:

- 1) the quantity of experimentation necessary,
- 2) the amount of direction or guidance provided,
- 3) the presence of absence of working examples,
- 4) the nature of the invention,
- 5) the state of the prior art,
- 6) the relative skill of those in the art
- 7) the predictability of the art, and
- 8) the breadth of the claims.

Applicant fails to set forth the criteria that define "benign disease of the breast and reproductive tract". In the instant case, only a limited number of "disease of the breast and reproductive tract" examples are set forth, thereby failing to provide sufficient working examples. It is noted that these examples are neither exhaustive, nor define the type or kind of disease treated. The pharmaceutical art is unpredictable, requiring each embodiment to be individually assessed for physiological activity. The instant

Art Unit: 1617

claims read on all "disease of the breast and reproductive tract" which including non-hormonal-dependent medical conditions, such as yeast vaginitis, bacterial vaginitis, genital herpes, viral vaginitis, and sexual transmitted diseases, necessitating an exhaustive search for the embodiments suitable to practice the claimed invention.

Applicants fail to provide information sufficient to practice the claimed invention, absent undue experimentation.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 32 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 32 is not understood because it is an incomplete claim.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
