About This Book

The MindShare Architecture Series	1
Organization of This Book	2
Designation of Specification Changes	3
Cautionary Note	3
Who this Book is For	4
Prerequisite Knowledge	4
Object Size Designations	4
Documentation Conventions	5
Hex Notation	5
Binary Notation	5
Decimal Notation	5
Signal Name Representation	5
Identification of Bit Fields (logical groups of bits or signals)	6
We Want Your Feedback	6

Chapter 1: Intro To PCI

PCI Bus History	7
PCI Bus Features	8
PCI Device vs. Function	12
Specifications Book is Based On	13
Obtaining PCI Bus Specification(s)	13

Chapter 2: Intro to PCI Bus Operation

Burst Transfer	15
Initiator, Target and Agents	17
Single- Vs. Multi-Function PCI Devices	17
PCI Bus Clock	17
Address Phase	18
Claiming the Transaction	19
Data Phase(s)	19
Transaction Duration	20
Transaction Completion and Return of Bus to Idle State	20
Response to Illegal Behavior	20
"Green" Machine	21

Chapter 3: Intro to Reflected-Wave Switching

Each Trace Is a Transmission Line	23
Old Method: Incident-Wave Switching	24

1 *Intro To PCI*

This Chapter

This chapter provides a brief history of PCI, introduces its major feature set, the concept of a PCI device versus a PCI function, and identifies the specifications that this book is based upon.

The Next Chapter

The next chapter provides an introduction to the PCI transfer mechanism, including a definition of the following basic concepts: burst transfers, the initiator, targets, agents, single and multi-function devices, the PCI bus clock, the address phase, claiming the transaction, the data phase, transaction completion and the return of the bus to the idle state. It defines how a device must respond if the device that it is transferring data with exhibits a protocol violation. Finally, it introduces the "green" nature of PCI—power conservation is stressed in the spec.

PCI Bus History

Intel made the decision not to back the VESA VL standard because the emerging standard did not take a sufficiently long-term approach towards the problems presented at that time and those to be faced in the coming five years. In addition, the VL bus had very limited support for burst transfers, thereby limiting the achievable throughput.

Intel defined the PCI bus to ensure that the marketplace would not become crowded with various permutations of local bus architectures peculiar to a specific processor bus. The first release of the specification, version 1.0, became available on 6/22/92. Revision 2.0 became available in April of 1993. Revision 2.1 was issued in Q1 of 1995. The latest version, 2.2, was completed on December 18, 1998, and became available in February of 1999.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
