<i>Title and subtitle</i> Synchronization in ADSL modems (Synkronisering i ADSL modem)			
<i>Abstract</i> <p>We present two methods for timing recovery in ADSL-modems. Both techniques, the phase-lock loop and the digital phase correction technique, use the pilot tone in the ADSL-signal. The first has a variable receiver sample clock that is tuned to the transmitter sample clock. The latter, also known as the rotor technique, has a non-adjustable receiver clock, but compensates the arising phase errors by rotations of the received QAM-constellation points. We also present a method to achieve frame synchronization. The synchronization frame that is sent every 69th frame is of crucial importance for this method. Simulations show that these synchronization techniques work well in the presence of noise on twisted pair copper wires.</p>

Preface

First of all we would like to thank our supervisor prof. Björn Wittenmark who initiated our contact with the University of Melbourne, Australia. We would also like to thank our supervisors prof. Rob Evans and Dr. Iain Collings at the Dept. of Elec. & Electr. Engineering, University of Melbourne. The telecommunication service provider Telstra made our work possible by funding the work on ADSL at the Dept. of Elec. & Electr. Engineering.

Finally we would like to thank all our friends from Melbourne which made our stay abroad really enjoyable.

Contents

1	Introduction	3
2	ADSL Modem Principles	4
2.1	DMT for ADSL Modems	4
2.2	Frequency Allocation in ADSL Modems	7
2.3	ADSL Transmitter	8
2.4	ADSL Receiver	9
3	Timing Recovery	12
3.1	Pilot Tone	12
3.2	Timing Error	13
3.3	Phase Lock Loop	14
3.3.1	Controller	14
3.3.2	Voltage Controlled Crystal Oscillator	15
3.3.3	Phase Measurement	15
3.3.4	Mathematical Model	15
3.4	Rotor Technique	17
3.4.1	System Model	19
4	Timing Recovery Simulations	21
4.1	PLL Simulations	21
4.1.1	PI-Controller Design	22
4.1.2	RST-Controller Design	23
4.1.3	PLL Performance	23

4.2	Rotor Simulations	25
4.2.1	Rotor Technique Performance	25
4.3	Comparison	26
5	Frame Synchronization	28
5.1	Statistical Properties of the Signals	29
5.2	Maximum Likelihood Detector	29
5.3	A Criterion for Selecting the Beginning of a Frame	32
5.3.1	Example of a Threshold	33
5.4	Frame Position Averaging	34
6	Frame Synchronization Simulations	36
6.1	Channel Modeled by a Kronecker Delta Function	36
6.1.1	Cyclic Prefix for a Kronecker Delta Function	36
6.1.2	Whole Reverb Signal for a Kronecker Delta Function	41
6.2	Realistic Channel Model	42
6.2.1	Cyclic Prefix for a Realistic Channel	43
6.2.2	Whole Signal for a Realistic Channel	45
6.3	A Realistic Scenario	46
7	Conclusions	48

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
