

Appendix D - Claim Chart for US Patent No. 8,155,342 Against Infotainment Systems of Accused Kia Automobiles

In these Infringement Contentions, Blitzsafe contends that at least the following claims of U.S. Patent No. 8,155,342 (“’342 patent”) identified below are infringed by the infotainment systems in accused Kia automobiles. Blitzsafe does not concede that any claims of the ’342 patent that are not listed below are not infringed by the infotainment systems in accused Kia automobiles. Moreover, the citations to certain documents and other information below are intended to be exemplary only and in no way foreclose Blitzsafe from citing or relying on additional documents, information, and/or testimony at a later time. These contentions are preliminary in nature, and an analysis of Kia’s infotainment systems, internal documentation, source code, and/or testimony from relevant witnesses may be necessary to more fully and accurately describe the infringing features of its accused products. Accordingly, Blitzsafe reserves the right to supplement, correct, modify, and/or amend these contentions once such additional information is made available to Blitzsafe. Furthermore, Blitzsafe reserves the right to supplement, correct, modify, and/or amend these contentions as discovery in this case progresses; in view of the Court’s claim construction order(s); in view of any positions taken by Kia, including but not limited to positions on claim construction, invalidity, and/or non-infringement; and in connection with the preparation and exchange of expert reports.

Claim	Support
49[P]. A multimedia device integration system, comprising:	Each accused Kia automobile includes a device integration system that supports integration of audio/video devices, such as freely lying smartphones and other smart devices connected via Bluetooth, as well as MP3 players (e.g., iPods, iPhones and Zune devices playing MP3 files). Accused Kia automobiles also permit audio streaming over Bluetooth from smartphone apps, such as Pandora, iTunes streaming, and Apple Music.
[49A] an integration subsystem in communication with a car audio/video system; and	Each device integration system of an accused Kia automobile includes, among other things, an integration subsystem for connecting the car audio/video system to portable devices via a Bluetooth connection. The integration subsystem, which comprises at least the software and hardware shown in the yellow dashed boxes below, including at least a Freescale microcontroller and memory modules, is in communication with the car audio/video system. The integration subsystem channels audio signals to the car stereo from a portable device (such as an iPod, iPhone, Zune device or other smart device) external to the car audio/video system.

	<p><i>See, e.g.,</i> http://developer.android.com/guide/topics/connectivity/bluetooth.html (discussing Bluetooth support for the Android platform).</p> <p><i>See, e.g.,</i> Ex. D (Kia Bluetooth Compatibility List).</p>
<p>53. The system of claim 49, wherein said integration subsystem receives a control command issued at the car audio/video system in a format incompatible with the portable device, processes the control command into a formatted command compatible with the portable device, and dispatches the processed control command to the</p>	<p>The integration subsystem of each accused Kia automobile “receives a control command issued at the car audio/video system in a format incompatible with the portable device, processes the control command into a formatted command compatible with the portable device, and dispatches the processed control command to the portable device for execution thereby.” More specifically, once a portable device is connected, commands are received by the integration subsystem from the car audio/video system, where they are processed and converted from a format understandable and compatible with the car audio/video system and associated Kia protocols (i.e., a format incompatible with the portable device) into formatted commands that are compatible with the portable device (i.e., converted into Bluetooth, application and/or device-specific protocols understandable to the portable device). These formatted commands are then dispatched to the portable device via the first and second wireless interfaces (i.e., the Bluetooth interface of the car audio/video system car audio/video system and one or more Bluetooth interfaces in communication with and part of the portable device), where they are executed by the portable device. At least the Freescale microcontroller of the integration subsystem (and potentially other microcontrollers on one or more circuit boards of the device integration system) executes pre-programmed code to perform at least a portion of these functions. It is believed that this code is stored in onboard flash and/or other memory modules, and/or is contained within firmware elsewhere in the integration subsystem (such as within the Freescale microcontroller itself).</p>

Appendix D - Claim Chart for US Patent No. 8,155,342 Against Infotainment Systems of Accused Kia Automobiles

Claim	Support
<p>54. The system of claim 49, wherein said integration subsystem receives data generated by the portable device in a format incompatible with the car audio/video system, processes the data into formatted data compatible with the car audio/video system, and transmits the processed data to the car audio/video system for subsequent display of the processed data on a display of the car audio/video system.</p>	<p>The integration subsystem of each accused Kia automobile “receives data generated by the portable device in a format incompatible with the car audio/video system, processes the data into formatted data compatible with the car audio/video system, and transmits the processed data to the car audio/video system for subsequent display of the processed data on a display of the car audio/video system.” More specifically, the portable device transmits data (such as audio, song and artist information) to the integration subsystem via the first and second wireless interfaces (i.e., the Bluetooth interface of the car audio/video system and one or more Bluetooth interfaces in communication with and part of the portable device). The integration subsystem then processes and converts the data from a format incompatible with the car audio/video system and understandable and compatible with the portable device (i.e., Bluetooth, application and/or device-specific protocols understandable to the portable device) into formatted data compatible with the car audio/video system (i.e., formatted data understandable and compatible with the car audio/video system and associated Kia protocols). The formatted data is then transmitted by the integration subsystem to the car audio/video system for subsequent display of the processed data on a display of the car audio/video system. At least the Freescale microcontroller of the integration subsystem (and potentially other microcontrollers on one or more circuit boards of the device integration system) executes pre-programmed code to perform at least a portion of these functions. It is believed that this code is stored in onboard flash and/or other memory modules, and/or is contained within firmware elsewhere in the integration subsystem (such as within the Freescale microcontroller itself).</p>

Claim	Support
<p>the portable device, transmits the information to the car audio/video system for subsequent display of the information on a display of the car audio/video system,</p>	
<p>[73D] instructs the portable device to play the audio file in response to a user selecting the audio file using controls of the car audio/video system, and receives audio generated by the portable device over said wireless communication link for playing on the car audio/video</p>	<p>See element [49D] support</p>

Appendix D - Claim Chart for US Patent No. 8,155,342 Against Infotainment Systems of Accused Kia Automobiles

Claim	Support
system.	
74. The system of claim 73, wherein said integration subsystem is positioned within the car audio/video system.	See claim 50 support.
75. The system of claim 74, wherein said first wireless interface is positioned within the car audio/video system.	See claim 51 support.
76. The system of claim 75, wherein said second wireless interface is positioned within the portable device.	See claim 52 support.
77. The system of claim 73,	See claim 53 support.

Appendix D - Claim Chart for US Patent No. 8,155,342 Against Infotainment Systems of Accused Kia Automobiles

Claim	Support
<p>wherein said integration subsystem receives a control command issued at the car audio/video system in a format incompatible with the portable device, processes the control command into a formatted command compatible with the portable device, and dispatches the processed control command to the portable device for execution thereby.</p>	
<p>78. The system of claim 73, wherein said integration</p>	<p><i>See claim 54 support.</i></p>

Appendix D - Claim Chart for US Patent No. 8,155,342 Against Infotainment Systems of Accused Kia Automobiles

Claim	Support
subsystem receives data generated by the portable device in a format incompatible with the car audio/video system, processes the data into formatted data compatible with the car audio/video system, and transmits the processed data to the car audio/video system for subsequent display of the processed data on a display of the car audio/video system.	
79. The system of claim 73, wherein said	See claim 55 support.

Appendix D - Claim Chart for US Patent No. 8,155,342 Against Infotainment Systems of Accused Kia Automobiles

Claim	Support
integration subsystem further comprises a voice recognition subsystem for receiving and processing spoken control commands issued by a user.	
80. The system of claim 79, wherein said integration subsystem instructs said portable device to play a desired file in response to a spoken command processed by the voice recognition subsystem.	See claim 55 support.
95. The system of claim 73, wherein the audio file	See claim 71 support.

Appendix D - Claim Chart for US Patent No. 8,155,342 Against Infotainment Systems of Accused Kia Automobiles

Claim	Support
comprises a song stored on the portable device.	
[97P] A multimedia device integration system, comprising:	<i>See preamble [49A] support.</i>
[97A] first and second wireless interfaces establishing a wireless communication link between a car audio/video system and a portable device external to the car audio/video system; and	<i>See element [49B] support.</i>
[97B] an integration subsystem in communication with said wireless communication link,	<i>See element [49A] support.</i>
[97C] wherein	<i>See element [49C] and [49D] support.</i>

Appendix D - Claim Chart for US Patent No. 8,155,342 Against Infotainment Systems of Accused Kia Automobiles

Claim	Support
<p>said integration subsystem channels audio generated by the portable device to the car audio/video system using the wireless communication link for subsequent playing of the audio on the car audio/video system, the audio corresponding to an audio file played by the portable device, and</p>	
<p>[97D] wherein said integration subsystem receives a control command issued by a user through one or more controls of the car audio/video</p>	<p>See claim 53 support.</p>

Appendix D - Claim Chart for US Patent No. 8,155,342 Against Infotainment Systems of Accused Kia Automobiles

Claim	Support
<p>system in a format incompatible with the portable device, processes the control command into a formatted command compatible with the portable device, and dispatches the formatted command to the portable device for execution thereby.</p>	
<p>99. The system of claim 97, wherein said integration subsystem is positioned within the car audio/video system.</p>	<p>See claim 50 support.</p>
<p>100. The system of claim 97, where the audio</p>	<p>See element [49C] support.</p>

Appendix D - Claim Chart for US Patent No. 8,155,342 Against Infotainment Systems of Accused Kia Automobiles

Claim	Support
file is stored on the portable device.	
101. The system of claim 97, wherein the audio file is received by the portable device.	<i>See element [73C] support.</i>
102. The system of claim 97, wherein said integration subsystem further comprises a voice recognition subsystem for receiving and processing spoken control commands issued by the user.	<i>See claims 55 and 57 support.</i>
103. The system of claim 102, wherein said integration subsystem	<i>See claims 55 and 57 support.</i>

Appendix D - Claim Chart for US Patent No. 8,155,342 Against Infotainment Systems of Accused Kia Automobiles

Claim	Support
<p>instructs said portable device to play a desired file in response to a spoken command processed by the voice recognition subsystem.</p>	
<p>106. The system of claim 97, wherein said integration subsystem generates a device presence signal and transmits the device presence signal to the car audio/video system to maintain the car audio/video system in a state responsive to the portable device.</p>	<p>See claim 56 support.</p>
<p>109. The system of claim 97,</p>	<p>See claim 62 support.</p>

Appendix D - Claim Chart for US Patent No. 8,155,342 Against Infotainment Systems of Accused Kia Automobiles

Claim	Support
wherein the portable device comprises a portable digital media player.	
110. The system of claim 109, wherein the portable digital media player comprises a video device, a portable media center, a portable media player, an MP3 player, an MP4 player, a WMV player, an Apple iPod, or an Apple video iPod.	See claim 63 support.
111. The system of claim 97, wherein the portable device comprises a cellular telephone.	See claim 64 support.
120. A	See preamble [97P] support.

Appendix D - Claim Chart for US Patent No. 8,155,342 Against Infotainment Systems of Accused Kia Automobiles

Claim	Support
multimedia device integration system, comprising:	
first and second wireless interfaces establishing a wireless communication link between a car audio/video system and a portable device external to the car audio/video system; and	<i>See element [97A] support.</i>
an integration subsystem in communication with said wireless communication link,	<i>See element [97B] support</i>
wherein said integration subsystem instructs the portable device to play an audio file in response to a user	<i>See element [97C] support.</i>

Appendix D - Claim Chart for US Patent No. 8,155,342 Against Infotainment Systems of Accused Kia Automobiles

Claim	Support
selecting the audio file using controls of the car audio/video system, wherein said integration subsystem channels audio generated by the portable device to the car audio/video system using the wireless communication link for subsequent playing of the audio on the car audio/video system, the audio corresponding to the audio file played by the portable device, and	
wherein said integration subsystem receives data generated by the portable	See element [97D] support.

Appendix D - Claim Chart for US Patent No. 8,155,342 Against Infotainment Systems of Accused Kia Automobiles

Claim	Support
device in a format incompatible with the car audio/video system, processes the data into formatted data compatible with the car audio/video system, and transmits the processed data to the car audio/video system for subsequent display of the processed data on a display of the car audio/video system.
