

Appendix A - Claim Chart for US Patent No. 7,489,786 Against Infotainment Systems of Accused Hyundai Automobiles

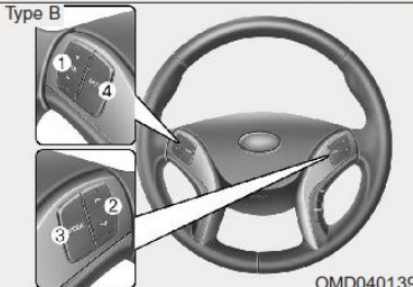

In these Infringement Contentions, Blitzsafe contends that at least the following claims of U.S. Patent No. 7,489,786 (“’786 patent”) identified below are infringed by the infotainment systems in accused Hyundai automobiles. Blitzsafe does not concede that any claims of the ’786 patent that are not listed below are not infringed by the infotainment systems in accused Hyundai automobiles. Moreover, the citations to certain documents and other information below are intended to be exemplary only and in no way foreclose Blitzsafe from citing or relying on additional documents, information, and/or testimony at a later time. These contentions are preliminary in nature, and an analysis of Hyundai’s infotainment systems, internal documentation and/or testimony from relevant witnesses may be necessary to more fully and accurately describe the infringing features of its accused products. Accordingly, Blitzsafe reserves the right to supplement, correct, modify, and/or amend these contentions once such additional information is made available to Blitzsafe. Furthermore, Blitzsafe reserves the right to supplement, correct, modify, and/or amend these contentions as discovery in this case progresses; in view of the Court’s claim construction order(s); in view of any positions taken by Hyundai, including but not limited to positions on claim construction, invalidity, and/or non-infringement; and in connection with the preparation and exchange of expert reports.

Claim	Support
1[P]. An audio device integration system comprising:	Each accused Hyundai automobile includes a device integration system, which supports docking integration of audio/video devices, such as freely lying or docked smartphones and other smart devices, as well as MP3 players (e.g., iPods and iPhones playing MP3 files, as well as Android devices). Accused Hyundai automobiles also support audio streaming from iPhones and other smart devices using downloadable apps, such as Google Play Music, Spotify and Pandora apps.
[1A] a first connector electrically connectable to a car stereo;	Each device integration system of accused Hyundai automobiles includes the car stereo, including one or more car stereo components, such as, for example, DSPs, coils, tuner circuitry, car stereo software, virtual buttons, display unit, etc. The device integration system also includes an interface for, among other things, channeling audio signals to the car stereo from an after-market audio device, such as an iPhone, iPad or Android Device, connected via a USB connector. The device integration system includes “a first connector electrically connectable to a car stereo” because, as set forth below, the car stereo controls may be used to control the after-market audio device, and because the car stereo receives information from the after-market audio device regardless of the particular configuration of the device integration system. The “first connector electrically connectable to a car stereo” may include an electrical connector such as a circuit board connector, soldered connector, wired connector or software/virtual connector that is connectable to the car stereo or any component thereof, including at least the connector set forth in the yellow dashed box below.

Claim	Support
<p>[1C] a third connector electrically connectable to one or more auxiliary input sources external to the car stereo and the after-market audio device;</p>	<p>Each device integration system of accused Hyundai automobiles includes “a third connector electrically connectable to one or more auxiliary input sources external to the car stereo and the after-market audio device.” Specifically, accused Hyundai automobiles are provided with an “AUX terminal” at one or more locations in the automobile, such as in the center console. The auxiliary input jack is connected via the third connector, which is believed to be included in one of the connectors within the yellow dashed box below, to the device integration system and permits audio from a device connected to the auxiliary input jack to be played through the automobile’s speakers.</p>

Claim	Support
	<p>iPod</p> <hr/> <p>Using iPod Devices</p> <ul style="list-style-type: none"> • iPod is a registered trademark of Apple Inc. • iPod mode will not operate if the connected iPod cannot be recognized due to operation of unsupported versions that do not support related protocols, iPod abnormalities, or iPod device defects. Some iPods with unsupported communication protocols may not properly operate with the Multimedia system. • For fifth generation iPod Nano devices, the iPod may not be recognized when the battery level is low. Please charge the iPod for use. • Search/play orders shown within the iPod device may differ with the orders shown within the Multimedia system. • If the iPod malfunctions due to an iPod device defect, reset the iPod and try again. (To learn more, refer to your iPod manual) <p>2-30 I AV</p>

- If repeatedly connect and disconnect iPod/iPhone to the Multimedia system with USB cable in short time, it may cause abnormal operation.
- The time for recognition of iPod/iPhone may vary depending on device type, firmware version and iOS version.
- For some iPod Touch and iPhone devices, connecting Bluetooth® while the iPod is operating may result in discontinued iPod sound. When such devices with Bluetooth® support are connected, this problem occurs as the sound source is changed from the Dock Connector (USB connector cable) to Bluetooth.
- To prevent this symptom, Bluetooth Audio function in the Multimedia system is limited if iPod/iPhone is connected to the system through both cable and Bluetooth. To listen to the iPod sound, use either iPod menu with USB connection or Bluetooth Audio with Bluetooth connection.
- To listen to the iPod sound, reconnect the USB cable or change the audio output settings in iPod/iPhone to Dock.
- In order to use the iPod while operating the keys, you must use a dedicated iPod cable. (the cable that is supplied when purchasing iPod/ iPhone products)
- ※ During ACC ON state, connecting the iPod through the iPod cable (The cable that is supplied when purchasing iPod/ iPhone product.) will charge the iPod through the head unit.
- ※ The use of genuine iPod cables supplied by Apple is recommended. (The use of other products may result in noise or abnormal operation.)

Claim	Support
<p>[1H] a third pre-programmed code portion for switching to one or more auxiliary input sources connected to said third electrical connector.</p>	<p>The interface of each device integration system of the accused Hyundai automobiles is pre-programmed to execute “a third pre-programmed code portion for switching to one or more auxiliary input sources connected to said third electrical connector.” At least the Telechips microcontroller of the interface (and potentially other microcontrollers on one or more circuit boards of the device integration system) executes pre-programmed code to perform at least a portion of this function. It is believed that this code is stored in onboard flash and/or other memory modules (such as the Micron flash memory module), and/or is contained within firmware elsewhere in the interface (such as within the Telechips microcontroller itself).</p>

Claim	Support
	<p>iPod</p> <hr/> <p>Using iPod Devices</p> <ul style="list-style-type: none"> • iPod is a registered trademark of Apple Inc. • iPod mode will not operate if the connected iPod cannot be recognized due to operation of unsupported versions that do not support related protocols, iPod abnormalities, or iPod device defects. Some iPods with unsupported communication protocols may not properly operate with the Multimedia system. • For fifth generation iPod Nano devices, the iPod may not be recognized when the battery level is low. Please charge the iPod for use. • Search/play orders shown within the iPod device may differ with the orders shown within the Multimedia system. • If the iPod malfunctions due to an iPod device defect, reset the iPod and try again. (To learn more, refer to your iPod manual) <p>2-30 I AV</p>

- If repeatedly connect and disconnect iPod/iPhone to the Multimedia system with USB cable in short time, it may cause abnormal operation.
- The time for recognition of iPod/iPhone may vary depending on device type, firmware version and iOS version.
- For some iPod Touch and iPhone devices, connecting Bluetooth® while the iPod is operating may result in discontinued iPod sound. When such devices with Bluetooth® support are connected, this problem occurs as the sound source is changed from the Dock Connector (USB connector cable) to Bluetooth.
- To prevent this symptom, Bluetooth Audio function in the Multimedia system is limited if iPod/iPhone is connected to the system through both cable and Bluetooth. To listen to the iPod sound, use either iPod menu with USB connection or Bluetooth Audio with Bluetooth connection.
- To listen to the iPod sound, reconnect the USB cable or change the audio output settings in iPod/iPhone to Dock.
- In order to use the iPod while operating the keys, you must use a dedicated iPod cable. (the cable that is supplied when purchasing iPod/ iPhone products)
- ※ During ACC ON state, connecting the iPod through the iPod cable (The cable that is supplied when purchasing iPod/ iPhone product.) will charge the iPod through the head unit.
- ※ The use of genuine iPod cables supplied by Apple is recommended. (The use of other products may result in noise or abnormal operation.)

Appendix A - Claim Chart for US Patent No. 7,489,786 Against Infotainment Systems of Accused Hyundai Automobiles

Claim	Support
44. An apparatus for docking a portable device for integration with a car stereo comprising:	<i>See</i> preamble [1P] support.
a storage area remote from a car stereo for storing the portable device;	The accused Hyundai automobiles include “storage areas remote from the car stereo for storing the portable device,” including glove boxes, center consoles and dash receptacles.

Appendix A - Claim Chart for US Patent No. 7,489,786 Against Infotainment Systems of Accused Hyundai Automobiles

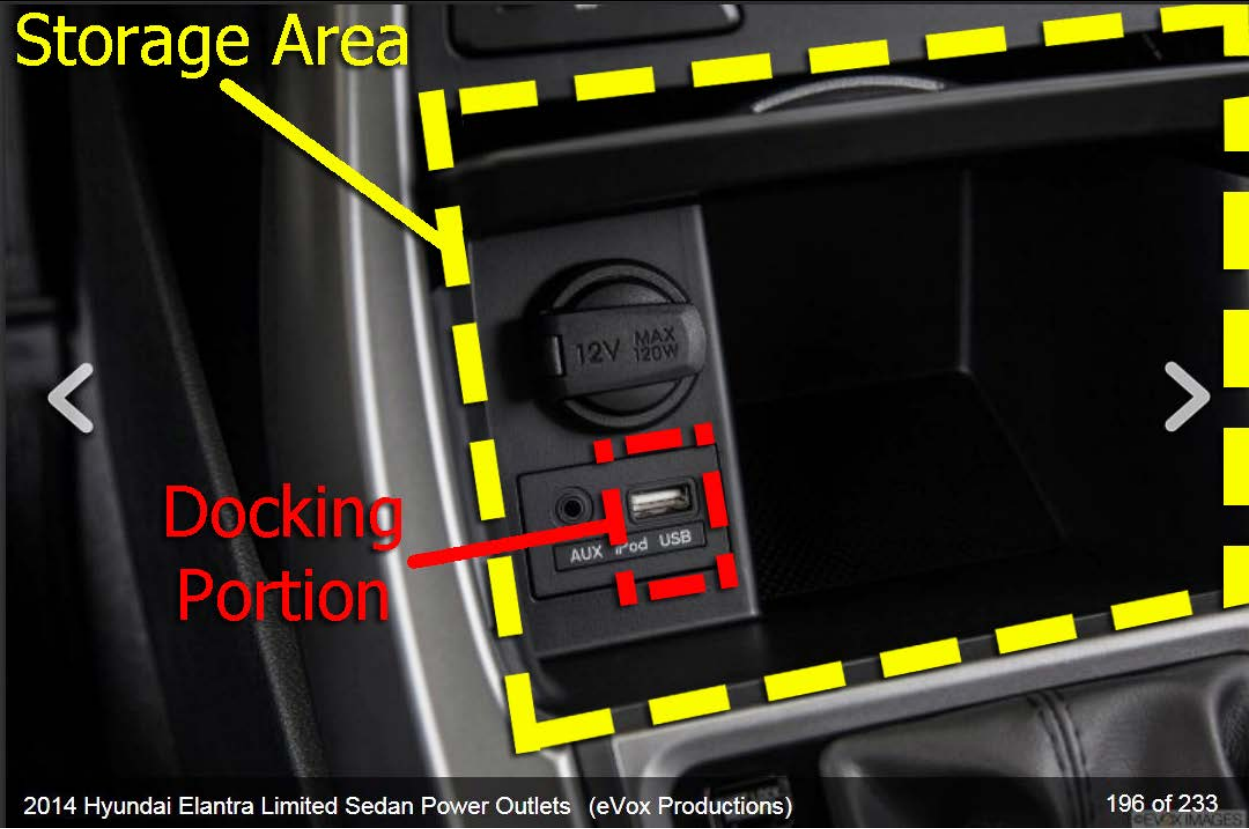

Claim	Support

Claim	Support
<p>comprises an Original Equipment Manufacturer (OEM) car stereo connected to the first electrical connector.</p>	
<p>60. The system of claim 57, wherein said microcontroller is pre-programmed to execute a third code portion for receiving data from the MP3 player in a format incompatible with the car stereo, processing received data into formatted data compatible with the car</p>	<p>See element [1G] support.</p>

Appendix A - Claim Chart for US Patent No. 7,489,786 Against Infotainment Systems of Accused Hyundai Automobiles

Claim	Support
stereo, and transmitting formatted data to the car stereo for display thereby.	
61. The apparatus of claim 60, wherein said third code portion processes data generated by the MP3 player including track and time information.	See claim 7 support.
62. The apparatus of claim 60, wherein said third code portion processes data generated by the MP3 player including song title and artist information.	See claim 8 support.

Appendix A - Claim Chart for US Patent No. 7,489,786 Against Infotainment Systems of Accused Hyundai Automobiles

Claim	Support
<p>63. The apparatus of claim 60, wherein commands are input by a user using one or more control buttons or presets on the car stereo.</p>	<p>See claim 13 support.</p>
<p>64. The apparatus of claim 57, further comprising a bus connection established between the MP3 player and said interface.</p> <p>65. The apparatus of claim 64, wherein the bus connection comprises a Universal Serial Bus (USB)</p>	<p>See claims 23 and 24 support.</p>

Appendix A - Claim Chart for US Patent No. 7,489,786 Against Infotainment Systems of Accused Hyundai Automobiles

Claim	Support
connection.	
86. A device for integrating video information for use with a car stereo, comprising:	<i>See preamble [1P] support.</i>
a first electrical connector connectable to a car stereo;	<i>See element [1A] support.</i>
a second electrical connector connectable to an after-market video device external to the car stereo;	<i>See element [1B] support.</i>
an interface connected between said first and second electrical connectors for transmitting video information from the after-	<i>See element [1D] support.</i>

Appendix A - Claim Chart for US Patent No. 7,489,786 Against Infotainment Systems of Accused Hyundai Automobiles

Claim	Support
market video device to the car stereo,	
the interface including a microcontroller in electrical communication with said first and second electrical connectors, said microcontroller pre-programmed to execute:	See element [1E] support.
a first pre-programmed code portion for generating a device presence signal and transmitting the signal to the car stereo through said first electrical connector to maintain the car stereo in an operational	See claim 6 support.

Appendix A - Claim Chart for US Patent No. 7,489,786 Against Infotainment Systems of Accused Hyundai Automobiles

Claim	Support
state responsive to signals generated by the after-market video device.	
<p>88. The apparatus of claim 86, further comprising a bus connection established between the video device and said interface.</p> <p>89. The apparatus of claim 88, wherein the bus connection comprises a Universal Serial Bus (USB) connection.</p>	<p>See claims 23 and 24 support.</p>
90. The apparatus of claim 86,	<p>See element [1F] support.</p>

Appendix A - Claim Chart for US Patent No. 7,489,786 Against Infotainment Systems of Accused Hyundai Automobiles

Claim	Support
<p>wherein said microcontroller is pre-programmed to execute a second code portion for receiving a control signal from the car stereo in a format incompatible with the video device, processing a received control signal into a formatted control signal compatible with the video device, and transmitting the formatted control signal to the video device for execution thereby.</p>	
<p>91. The</p>	<p><i>See element [1G] support.</i></p>
