

DECLARATION

I, **Crystal Daugherty**, declare that the following statements are true and correct to the best of my knowledge, information and belief:

1. I am a **Author School Relations Customer Service** employed by ProQuest LLC ("ProQuest") in Ann Arbor, Michigan. I have worked for ProQuest since 1990 (26 years). ProQuest is an information company that collects, organizes publishes and distributes for sale content from a wide range of sources, including dissertations and master's theses. A "Record" (as defined in paragraph 3) of each dissertation and each master's thesis submitted to ProQuest is published in ProQuest's print publication Dissertations Abstracts International or Master's Abstracts International, respectively, as well as our ProQuest® Digital Dissertations and Theses Database ("Abstract Database").¹ I am fully familiar with ProQuest's sales and publication practices as well as the Abstract Database.
2. ProQuest receives dissertations and master's theses from participating degree granting institutions. Shortly after these works are received, ProQuest makes them available for sale to the public, unless specifically restricted from sales by the dissertation author or the degree granting institution.
3. I am fully familiar with ProQuest's business practices in relation to its dissertations and master's theses publishing program. ProQuest maintains a Record for each dissertation or master's thesis. At the time of publication of the **Dissertation** in question (the full citation is provided in paragraph 6 below), ProQuest published in the Abstract Database

¹ This Database has been maintained exclusively by ProQuest under various corporate names, including Bell & Howell Information and Learning Company, ProQuest Information and Learning Company, UMI Company and University Microfilms, Inc. and has been licensed to subscribers under various product names including "Dissertation Abstracts Online" and "ProQuest® Digital Dissertations." ProQuest LLC (and its predecessor entities) is and at all times has been a U.S. Company based in Ann Arbor, MI.

a Record of each dissertation and each master's thesis that ProQuest offers for sale with records added on a **monthly** basis. The Abstract Database is widely available throughout the United States. Currently approximately 1,500 institutions subscribe to the database. Each Record consists of an abstract, index record and citation. Once a Record is published on the Abstract Database, the Record is available to the students, faculty, staff and/or patrons of any institutions that subscribe to the Abstract Database.

4. At the time of the Dissertation's publication, the publication of the print publication **Dissertations Abstracts International (DAI)** occurred on a **monthly** basis, a dissertation may be available for sale before its Record is published in the print edition. Once ProQuest has received a work and made it available for sale, the work may be ordered in print, microform and for dissertations published after 1997 in PDF form, even if the Record has not yet been included in a print edition of DAI.
5. Originally, Records were published only in the print publications Dissertations Abstracts International and Master's Abstracts International. In 1985, the Records in these print publications were combined to create the Abstract Database which was made available online through third party vendors, including Dialog. In 1987, ProQuest began to offer the Abstract Database on CD ROM, and in 1997, ProQuest made available the contents of the Abstract Database in its ProQuest Digital Dissertations and Theses service ("PQDT"), which is accessible via the world wide web to authenticated subscribers. The PQDT service includes the Dissertation Abstracts International Records and the Master's Theses International Records and is supplemented by the addition of certain select dissertations and master's theses in PDF format. Whether a dissertation is represented in full PDF format varies based on a number of factors, including the format in which the dissertation or theses was originally submitted for publication (digital, paper or microfiche) or whether the dissertation or theses was part of a retrospective digitization effort.
6. I have reviewed ProQuest's records regarding the dissertation cited as:

| | |
|--------------------|---|
| Dissertation No. : | 9708664 |
| Title: | A new file system for mobile computing |
| Degree Date: | 1997 |
| University: | University of Notre Dame |

These records show that the Dissertation was received by ProQuest on **December 2, 1996** and first made available for sale on **February 5, 1997**. The full text of the dissertation was released in PDF format in PQDT on **February 10, 2006**, and made available for sale in microfilm, print and/or PDF formats. A Record of the Dissertation was published in the print edition of Dissertation Abstracts International (DAI) volume and publication date noted above. The print edition of DAI was distributed to subscribing Academic Research Libraries, including those located in the United States. The Record was made available online via third party vendors, including Dialog, as part of the Abstract Database which was made available via such vendors in the ordinary course of business on or about the same time as the print publication.

7. The attached print copy of the Dissertation is a true and complete copy of the Dissertation as originally published and kept by ProQuest in the ordinary course of its business.

I declare that the foregoing is true and correct to the best of my information, knowledge and belief after reasonable investigation.

Executed on June 30, 2016

Crystal Daugherty
