CIRCLE 104 ON READER SERVICE CARD

Who says preparing your tax return is easy? We do, with the incredible Timeworks® Swiftax™.

Here's an easy-to-operate, menu-driven program that lets you prepare and complete your Federal income tax returns—even if you don't know much about computers or accounting. And our easy-to-use manual gives you all the knowledge you need to complete your tax return accurately.

Features: Guides you through every step of the tax preparation process with full user prompts, and instructs you on which forms you must complete.

Automatically checks your tax alternatives, such as income averaging, etc., and calculates the lowest amount of income tax you must pay.

Sets up a unique Taxpayer File, enabling you to make changes to your completed tax return, at a later date.

Completes the most commonly used supporting schedules—A, B, C, D,

G, W and SE—stores the totals, and integrates this information onto your Form 1040, 1040A or 1040EZ.

Prints your tax information and prints out itemized lists of dividends, interest, etc., that are too long for the standard forms.

Prints out amortization schedules, summarizing yearly principle and interest payments.

A new program disc and manual can be obtained for one additional year at a nominal charge.

Swiftax! It's just another good example of Timeworks' commitment to quality, problem-

solving programming.

Now at your favorite dealer.

WHERE TO SEND IT

All **editorial** material, including article submissions, press releases, and products for evaluation should be sent to:

Creative Computing
39 E. Hanover Ave.
Morris Plains, NJ 07950

Correspondence regarding other Creative Computing products and publications should also be sent to the Morris Plains address.

Correspondence related to **advertising**, including ad copy, questions on billing, and requests for rates, should be sent to:

Advertising Department
Creative Computing
Ziff-Davis Publishing Co.
One Park Ave.
New York, NY 10016

Correspondence regarding **subscriptions**, including orders, changes of address, and problems should be sent to:

Creative Computing
P.O. Box 5214
Boulder, CO 80321

Your help in choosing the correct address for your correspondence is appreciated. An incorrectly addressed letter or package can take as long as several weeks to reach its proper destination.

SUBSCRIPTIONS

All subscription orders and other correspondence related to subscriptions should be addressed to:

Creative Computing
P.O. Box 5214
Boulder, Colorado 80321

Foreign subscriptions must be accompanied by payment in U.S. currency.

Subscription prices:

U.S.	Canada	Foreign
1 year \$24.97	1 year 29.97	1 year 34.97
2 years 43.97	2 years 53.97	2 years 63.97
3 years 57.97	3 years 72.97	3 years 87.97

Airmail delivery on foreign subscriptions is available for a one-year period only at \$75.00 additional for mail to Asia and Australia, and \$50.00 additional for all other foreign.

Subscribers in the United Kingdom may send payment in sterling to:

Hazel Gordon
10 Bishops Way
Sutton Coldfield
West Midlands B74 4XU

Please allow at least eight weeks for change of address. Include old address as well as new—enclosing if possible an address label from a recent issue.

New Qantex 7065. A fast printer at a slow price.

No matter how heavy the traffic, our new Qantex 7065 multimode printer will keep your documents flowing smoothly. At a very affordable price.

Use it for data processing, and the 7065 zips along at 300 cps bidirectionally. Both user-defined formats and six-part forms capability are standard.

Switch to word processing and the 7065 delivers near letter quality at 125 cps. Plus features such as proportional spacing, justification, auto-underline and bold.

And as a 65 cps letter quality

printer, it's fast enough and quiet enough to leave the competition in the dust. You get high density, double pass printing in your choice of some 20 fonts.

The 7065 is also a dot addressable graphics printer with resolution to 144 x 144 dots per inch and a full complement of line drawing graphics.

Besides being very fast, the 7065 is very compatible — with IBM, Apple, Lotus 1-2-3 and just about any other personal computer or software on the market. It offers built-in bar code capability. And its 500-million-plus char-

acter print head and industrial quality construction are designed for long, hard use.

To find out how quickly the Qantex 7065 could bring your information processing up to speed, contact Qantex for details or a demo. Qantex, 60 Plant Avenue, Hauppauge, NY 11788. Call toll-free 800-645-5292; in New York State 516-582-6060.

LETTERS TO THE EDITOR

INPUT/ OUTPUT

Revised Kids On Keys

Dear Editor:

I am writing in response to your October review of the Apple version of our product, Kids On Keys.

You are absolutely right. The version your reviewer, Penny Smith, used was far too difficult for the intended age group for the program, kids aged 3 to 9. The problem was identified by our staff two months ago and has been corrected. The corrected version is now available in stores across the country.

Consumers who have purchased the old, faulty version can send that disk to our customer service department and we will be happy to send them a new disk free of charge.

Tricks and Treats

Dear Editor:

Thank you for the tenth anniversary issue of *Creative Computing*. I saw myself in several of the now successful people who started large companies with little more than dreams—especially in the story of Forrest Mims parking cars with an engineering degree.

I'd like to offer a prediction for the future of computing. The twentieth anniversary issue of *Creative Computing* will contain an article by a computer snob—some kid now in high school learning Basic, who will state that to be a *real* computer, a machine must have 30Mb of memory, voice recognition, a 64-bit address bus, and artificial intelligence in ROM.

I also predict that the public will swallow the AI myth hook, line, and sinker, and fail to realize that AI is based on the same kind of magic used by Blackstone and Edger Bergen. (The difference between Blackstone and today's com-

puter science magicians is that Blackstone knew that it was only a sophisticated trick!)

Steve McGrew
RAM-BAM Arts & Games
617 Constitution Dr.
Orlando, FL 32809

Selectricity

Dear Editor:

In one area of history, your publication has been deficient. I happen to be a strong fan of standard electric typewriter keyboard layouts for computers. However, I cringe when I read, for the umpteenth time, "why didn't IBM use its Selectric keyboard on the IBM PC."

For starters, the standard arrangement of keys on an electric typewriter (≠ over 6, * over 8) existed before IBM introduced the first Selectric typewriter back in 1961. In fact, it wasn't until the Selectric II that the IBM Selectric conformed to the standard completely, by placing the exclamation point over the numeral 1.

Lately, inexpensive daisywheel-based typewriters have been making inroads into the market for the good old IBM golfball. So, with the introduction of its Electronic Typewriters, models 30, 40, 50 and 70 (since superseded by the models 65 and 85) and the Selectric III, IBM decided to match the daisywheel in one area by increasing the number of characters per element from 88 to 96.

For mechanical reasons, the printable character keys on an electric typewriter, even a Selectric, must be grouped closely together. Thus, the offending key between the lefthand Shift key and the letter Z was born. To convince people to continue buying IBM typewriters, and that this new arrangement wasn't all that bad, IBM then copied the arrangement to its other products—the IBM 3101 ASCII terminal, new terminals in their 3278 line, and the Displaywriter. And, of

FASTER THAN 5 NANO-SECONDS, STRONG AND SOLID STATE

Electra-Guard stops every spike, glitch and surge in less than 5 billionths of a second. All you do is plug it in. No more overvoltage.

We build it solid. Diodes, solder, wire and case—all are heavy duty.

It far exceeds the surge voltage guides for AC power outlets. Its simple style and neutral color suit your home or office.

\$49.95 to \$79.95

Electra-Guard System 2 (above left) keeps six devices safe from overvoltage. Cost: \$49.95.

The System 4 (center) with EMI/RFI filter; protects 3 devices from overvoltage and electronic noise. Cost \$79.95.

Electra-Guard System 12 (far right) has an on/off

PLUG IN THE BEST BUY IN SURGE PROTECTION: ELECTRA-GUARD.

Eei Ee I/O

Dear Editor:
For the past few days, I have been thumbing through your excellent magazine, admiring the interesting articles and drooling over the ads. You are to be

congratulated for making an excellent magazine fly for ten years.

I have decided to start a user's group for farmers using computers. This would give farmers and agribusinessmen a means of exchanging information and a means by which newcomers in the farm computer field could get help with special problems that more experienced farm computer operators might already have overcome.

I would welcome correspondence from readers who might be interested.

NOTICES

Let Us Do The Typing

Many of the programs that appear in *Creative Computing* are available for direct downloading from the Creative Computing Special Interest Group (SIG) on CompuServe. In addition, the SIG features a public bulletin board, "mailboxes" for each of the regular columnists, a street price index, and regularly scheduled rap sessions with editors and contributors. To get the SIG quickly once you are logged on, simply type GO PCS 22 at any prompt.

Reach An Editor Quickly

Want to reach Betsy Staples, John Anderson, Dave Ahl, or another editor in a hurry? You can do so via MCI Mail. Send to BSTAPLES or account number 257-0077.

Innovative Educational Applications

A national conference, "Innovative Microcomputer Applications in School Programs" will be held March 31-April 2, 1985 at the Baltimore Plaza Hotel in Baltimore, MD. The program is designed for computer studies directors, K-12 teachers, and administrators. For information, contact Melinda Curtis, Friends School, 5114 N. Charles St., Baltimore, MD 21210. (301) 435-2800.

ACT Apricot Address

Since we ran our reviews and previews of the ACT product line, the company has moved to new quarters. You can contact them at ACT Computers, Inc., 3375 Scott Blvd., Suite 342, Santa Clara, CA 95954, (408) 727-8090.

Free Computer Handbook

Trends in Information Technology: 1985 is an excellent 80-page handbook for executives and others who want a grounding in the effects of computers—technological, social, and economic—as well as trends in information systems, network architecture, and system development. The book closes with a series of specific (and pragmatic) action recommendations for the coming year. The book is free from your local Arthur Anderson & Co. office, or write Arthur Anderson & Co., 69 W. Washington St., Chicago, IL 60602.

New Address for Hope Center

The current address for the Hope Center "Hands Off Program Experience" (see "Of Passion and Pet Projects" by Peter McWilliams, Nov. 1984) is Hope Center, Attn: Gerry Schwartz, c/o Voice Prints, Inc., P.O. Box 16171, Irvine, CA 92713, (714) 756-9099.

SQUEEZE MORE OUT OF EVERY ON-LINE MINUTE.

WITH NEW VIDTEX™ COMMUNICATIONS SOFTWARE FROM COMPU SERVE.

Presenting the software package that makes your computer more productive and cost-efficient.

CompuServe's new Vidtex™ is compatible with many personal computers sold today (including Apple®, Commodore® and Tandy/Radio Shack® brands). And it offers the following features*—and more—to let you communicate more economically with most time-sharing services (including CompuServe's Information Service).

Auto-Logon. Lets you log on to a host simply and quickly by utilizing prompts and responses defined by you. Also allows quick transmission of predefined responses to host application programs after logging on.

*Some versions of the Vidtex software do not implement all features listed.

Vidtex is a trademark of CompuServe, Incorporated. Apple is a trademark of Apple Computer, Inc. Commodore is a trademark of Commodore Business Machines. Radio Shack is a trademark of Tandy Corp.

Function Keys. Let you consolidate long commands into single keystrokes. Definitions can be saved to and loaded from disk file, allowing multiple definitions for multiple applications.

Error-Free Uploading and Downloading. CompuServe "B" Protocol contained in Vidtex lets you transfer from your computer to CompuServe and from CompuServe to your computer anywhere in the country. Also provides error-free downloading from CompuServe's extensive software libraries.

Full Printer Support. Printer buffer automatically buffers characters until printer can process; automatically stops on-line transmission when full; and automatically resumes transmission when capacity is re-established. Also, lets you print contents of textual video screen or RAM buffer at any time.

Capture Buffer. Saves selected parts of a session. Contents can be written to a disk file; displayed both on and off line; loaded from disk; and transmitted to the host.

On-line Graphics. Integral graphics protocol displays stock charts, weather maps and more.

If you are already a CompuServe subscriber, you can order Vidtex on line by using the GO ORDER command. Otherwise, check with your nearest computer dealer; or to order direct, call or write:

Introducing the most powerful

The new IBM Personal Computer AT.

Hold on to your hat.

The new IBM Personal Computer AT (for Advanced Technology) is based on the advanced 80286 16-bit microprocessor. This remarkable computer will run many of the programs written for the IBM PC, up to three times faster. You'll be able to recalculate large spreadsheets in seconds and retrieve files in a flash.

It's got the power (and price) to surprise you. In many ways.

Compatibility, expandability, networking too.

With the IBM Disk Operating System, the IBM Personal Computer AT can use many programs from the fastest-growing library in the personal computer software industry.

The IBM Personal Computer AT is also available with up to 3 million bytes of user memory to run multiuser, multitasking operating systems such as XENIX™. Volume upon volume of information is available at your fingertips. You can customize your system to store up to 20,000 pages of information at one time. And its keyboard helps you use all of this computing power more easily.

This new member of the IBM PC Family is a powerful stand-alone computer that can also be both the primary file server and a station on your

network. With the new IBM PC Network (which is so easy to connect you can do it yourself), the

IBM Personal Computer AT Specifications

User Memory 256KB-3MB*	Diagnostics Power-on self-testing* Parity checking* CMOS configuration table with battery backup*
Microprocessor 16/24-bit 80286* Real and protected modes*	Languages BASIC, Pascal, FORTRAN, Macro Assembler, COBOL, APL
Auxiliary Memory 1.2MB and 360KB diskette drives* 20MB fixed disk drive* 41.2MB maximum auxiliary memory*	Printers Supports attachment of serial and parallel devices
Keyboard Enlarged enter and shift keys 84 keys 10-foot cord* Caps lock, num lock and scroll lock indicators	Permanent Memory (ROM) 64KB Clock/calendar with battery*
Display Screen IBM Monochrome and Color Displays	Color/Graphics Text mode Graphics mode
Operating Systems DOS 3.0, XENIX*	Communications RS-232-C interface
	Networking High-performance, high-capacity station on the IBM PC Network*

*Advanced Features for Personal Computers

IBM Personal Computer AT can share information with IBM PCs, PC/XTs and IBM *Portable* PCs.

Get a hands-on, hats-off demonstration.

The new IBM Personal Computer AT has the power, compatibility and expandability many PC users need, at a very appealing price.

For more information contact your authorized IBM PC dealer, IBM Product Center or IBM marketing representative. For a store near you call 1-800-447-4700. In Alaska or Hawaii call 1-800-447-0890.

personal computer IBM has ever made.

Red Ink and Layoffs

Latest casualties in the personal computer market: **Otrona Advanced Systems**, maker of a transportable IBM clone. The company plans to liquidate rather than try to reorganize under the protection of Chapter 11. **Franklin Computer**, now operating under Chapter 11, has been unable to find a buyer or merger partner, and also plans to liquidate.

In 1973, Archie McGill, the youngest vice president of IBM, left for the greener pastures of AT&T. Eight years later, the feisty McGill departed AT&T to assume the presidency of Rothschild Ventures, a venture capital firm. A major venture, of which McGill became chairman, was **Knoware, Inc.** of Cambridge, MA. The company, founded by two MIT professors, marketed a software package that purported to teach executives how to climb the corporate ladder by learning to use their personal computers. Purchasers weren't convinced, and after many months of going nowhere, the firm is now in liquidation.

At the Softcon show last year, **Ovation** was touting a new integrated software package. "It will run rings around *Symphony* and *Framework*," said enthusiastic booth personnel. But the product was plagued by delay after delay. Today, the firm is for sale. Ever optimistic, President Thomas Gregory hopes someday to see the product on the market.

Handwriting on the wall? Last June, Rodnay Zaks of **Sybex Computer Books** invited 20 notable computing pioneers for Pioneer Days in San Francisco. It was a gala media event. Then, three months later, each pioneer received a letter from the credit manager of the Hyatt Regency which said, "Sybex has not paid for your account and your charges have been placed on your personal credit card." Pretty shabby, Sybex.

CDs Invade Computer Field; Floppies Retaliate

Four leaders in audio company disc technology, **Denon, Philips, Sony and 3M**, have announced the development of a CD-based optical read only memory

(ROM) system for computers. A single 4 3/4" CD-ROM has a capacity of over 550Mb, about the equivalent of 500 double density floppy disks. In addition to offering efficient storage, this enormous capacity also provides the opportunity to store high-resolution graphics along with standard ASCII data.

* * * * *

Information Storage of Colorado Springs has introduced a 5 1/4" 100 Mb, write-once optical disk drive. The medium is supplied by Hitachi/Maxell and Sumitomo Chemical and is seen as a first move into the U.S. market by Sumitomo.

Evaluation units are priced at \$3000; however, company president Steve Popovich expects prices to drop to \$500 by 1986. Popovich feels the drive will satisfy "a real need for archival and audit trail data."

"Record Album" Diskettes

Memron, a San Jose floppy disk maker, has developed a process, Chromadisk, to print full-color images directly onto a diskette carrier. Says Bill Bollinger of Memron, "Of course it's not fair to judge a word processing package, spreadsheet, or educational program by the way it looks. Nevertheless," he added, "people will always tend to judge a book by its cover."

A secondary benefit of printed diskette carriers is prevention of commercial piracy; dishonest stores will have a difficult time selling a black copy of a disk that should be printed.

Random Bits

We hear from Japan that **IBM** ordered upwards of one million 3.5" microfloppy drives from Toshiba and Alps. For what you might ask? A new portable, perhaps? . . . **IBM** also bought a bunch of Japanese MSX computers, peripherals, and software from Qest Publishing, a group of former SpectraVideo employees.

Microsoft has developed a new operating system, HH-DOS (hand held DOS), which integrates common applications of notebook computers and is file compatible with MS-DOS . . . On the other hand, an apologetic letter from

Vice President Steve Ballmer of **Microsoft** discloses a further delay in the shipment of *Microsoft Windows* from November 1984 to June 1985. Apparently the designers are having problems with speed, graphics capabilities, and reliability . . . **Microsoft** isn't alone. **Gordon Mustain** of **Rising Star** announced yet another delay in the release of *Valdocs 2.0* for the **Epson QX-10** to increase the speed of the word processing module and add additional features . . . And speaking of **Epson**, they recently proposed a standard coding scheme for printers called *ESC/P*. It seems sensible to us and perhaps with 40% of the dot-matrix printer market, **Epson** can make it happen.

Having lost \$3 million in the first nine months of 1984, **Management Science America (MSA)** has put **Peachtree Software** up for sale. So far, no takers. **Peachtree** recently bought two educational software publishers, **Edu-Ware** and **Design Ware** but killed off the **Edu-Ware** label. Now, **Design Ware** plans to re-introduce the label . . . **Sherwin Steffin**, founder of **Edu-Ware**, has filed an \$11.6 million suit against **MSA** alleging securities fraud, conspiracy, and violation of agreements related to the acquisition. He claims that **MSA** deliberately depressed **Edu-Ware** sales after the acquisition was completed in order to diminish payments to **Edu-Ware** shareholders.

Doubleday paid one of the biggest advances ever for a computer book, \$1.3 million, to **Stewart Brand** for the *Whole Earth Software Catalog*. To make money on the deal, **Stewart** figures **Doubleday** will have to sell more than 500,000 copies. *Infoworld* is betting they do it; I'll be surprised if they touch 100,000.

Troubled **VisiCorp** will merge with a new Sunnyvale-based company, **Paladin**. Founders **Dan Fylstra** and **Peter Jennings** will not have a role in the new company . . . We hear that **Apple** will discontinue the **Lisa** line in 1985 and concentrate on the larger **Macs**. After discussing the 16-bit **Apple IIx** on **Compuserve**, **Steve Wozniak** now denies any plans for it at all . . . In early November 1984, **Apple** built its two millionth **Apple II**. ■
