Bluetooth ESDP for UPnP

Abstract:

This document is a Bluetooth Extended Service Discovery Profile (ESDP) for **Universal Plug and Play™ (UPnP™)**. The profile defines how devices with Bluetooth wireless communications can use the Bluetooth Service Discovery Protocol (SDP) initially to discover other devices that support UPnP services and retrieve information about these services. This profile further defines how a device with Bluetooth wireless communications can support UPnP services over the Bluetooth protocol stack using the Logical Link Control and Adaptation Protocol (L2CAP) layer and/or an Internet Protocol (IP) stack using either the Personal Area Network (PAN) Profile or the Local Area Network (LAN) Access Profile.

Revision History

Revision	Date	Comments
0.40	June 02, 2000	Initial draft.
0.49	June 29, 2000	Incorporate comments from ESDP face-to-face meeting on 12 th and 13 th June 2000.
0.50	July 20, 2000	Incorporate review comments.
0.51	August 11, 2000	Incorporate review comments.
0.70	August 24, 2000	Incorporate comments from ESDP face-to-face meeting on 17 th and 18 th August 2000.
0.71	August 24, 2000	Include reference for LAN Access Profile test specification.
0.90	October 04, 2000	Incorporate comments from ESDP face-to-face meeting on 3 rd and 4 th October 2000.
0.91	November 07, 2000	Incorporate review comments.
0.92	November 21, 2000	Incorporate review comments.
0.93	December 18, 2000	Incorporate comments from ESDP face-to-face meeting on 4 th December 2000.
0.95	January 12, 2001	Incorporate review comments.
0.95a	January 31, 2001	Incorporate review comments.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
