## **VII. Professional Experience**

### **Details of My Professional Accomplishments**

#### ***US Government at National Science Foundation (3 years)***

In 2007 and 2008, I worked as the lead Program Director for Emerging Models and Technologies (EMT) program in the Division of Computing and Communication Foundations (having nearly \$140 Million annual budget) of the Directorate for Computer and Information and Science and Engineering, National Science Foundation, Arlington, Virginia. My mandate was to manage research grants in Nanoelectronic Modeling and Systems, Quantum Computing, and Biologically Inspired Computing for which I had an operating annual budget of about \$18 Million. Additionally, I participated in several NSF crosscutting programs such as Cyber-Enabled Discovery and Innovation (CDI), Expeditions in Computing, Major Research Instrumentation (MRI), Computing Research Infrastructure (CRI) and Cyber Physical Systems (CPS). In 2009, I worked as a Program Director in the Engineering Directorate where I managed research in three broad areas: Adaptive Intelligent Systems (Machine Learning), Quantum, Molecular and High-Performance Modeling, and Electronic and Photonic Devices. During these three years, I interacted with several program managers and administrators of NSF, DARPA, ARO, ONR, and AFOSR to help launch national-level major research initiatives. I consider that serving the US government for a stint of three years has provided me an exceptional opportunity to acquire a vast amount of knowledge in various fields of science and engineering, to network with numerous researchers around the nation, and to gain divergent administrative experience.

#### ***Teaching Experience (29 years)***

Since 1988, I have been teaching at the Department of Electrical Engineering and Computer Science of the University of Michigan, Ann Arbor, Michigan.

*Graduate courses developed and taught:* 1) VLSI System Design, 2) Optimization and Synthesis of VLSI Layout, 3) Testing of Digital Circuits and Systems, 4) Advanced Computer Architectures, 5) Nanocircuits and Nanoarchitectures, 6) Ultra-Low-Power Subthreshold CMOS Circuits, and 7) Terahertz Technology and Applications.

*Undergraduate courses upgraded and taught:* 1) Introduction to Digital Logic Design (sophomore level), 2) Digital Integrated Circuit Design (junior level), and 3) VLSI System Design (senior level).

#### ***Industrial Experience (6.5 years)***

After my baccalaureate degrees in Physics and Electrical Engineering, I worked for six years (1976-1982) as a Senior R&D Engineer at Bharat Electronics Ltd. (BEL) in its Integrated Circuits Division. I designed several bipolar and CMOS analog and digital integrated circuits for consumer electronic systems. I was associated with the following chip development projects: i) Raster-scan vertical deflection system microchip for TV display, ii) Sync processing and horizontal deflection system microchip for TV display, iii) Video and audio IF stage IC's for vestigial-AM and FM signal detection in TV receiver, iv) High-gain audio amplifier microchip for TV audio stage, v) Tape Recorder IC with
