(57) **ABSTRACT**

A coaxial cable connector comprising a connector body; a post engageable with the connector body; a nut, rotatable with respect to the post and the connector body, the nut having a first end and an opposing second end, wherein the nut includes an internal lip; and a continuity member disposed within a second end portion of the nut and contacting the post and the nut, so that the continuity member extends electrical grounding continuity through the post and the nut is provided.
