1995

The present work was produced during the period from April, 1992 to April, 1995 at the Gesellschaft für Biotechnologische Forschung mbH [Society for Biotechnological Research mbH], Braunschweig, under the direction of Prof. Dr. W.-D. Deckwer, whom I thank for suggesting the thesis and supporting my work.

Furthermore, I would like to thank Prof. Dr. D. C. Hempel for conducting the review.

A special thanks goes to Dr. U. Rinas, who helped me familiarize myself with this subject matter, and provided supervision during this study. She provided a great deal of help through her willingness to engage in discussion, in resolving problems that arose, or preventing them from occurring.

Furthermore, I would like to thank all of my co-workers in the study group for developing methods, for the pleasant work climate and for their assistance. I would like to thank Mrs. M. Schreiner for her excellent technical assistance.

Pero vull també agrair molt especialment a en David per la seva ajuda i comprensió mostrada durant la meva promoció.

I would like to thank my family with all my heart for the support they have provided me during my education, without whom I could never have completed this study.

3.3	Off-line Analysis during High Cell Density Cultivation .....	33
3.3.1	Determination of Cell Growth .....	33

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
