COVER 1569

When rotated above a critical frequency, a single quantum of circulation, known as a vortex, forms in a gaseous Bose-Einstein condensate, marking the breakdown of superfluidity in a quantum fluid. The vortex core appears in this absorption image of the rubidium atom cloud as a hole in the density profile. The Gordon Research Conference on Atomic Physics will meet at Williams College on 17 to 22 June. The summer and international conference schedules begin on p. 1569. [Image: Kirk W. Madison, Frédéric Chevy, Jean Dalibard/Laboratoire Kastler Brossel, École Normale Supérieure, Paris]

How rusty is the Red Planet?

AMERICAN
ASSOCIATION FOR THE
ADVANCEMENT OF
SCIENCE

SCIENCE (ISSN 0036-8075) is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1200 New York Avenue, NW, Washington, DC 20005. Periodicals Mail postage (publication No. 484460) paid at Washington, DC, and additional mailing offices. Copyright © 2001 by the American Association for the Advancement of Science. The title SCIENCE is a registered trademark of the AAAS. Domestic individual membership and subscription (51 issues): \$115 (\$64 allocated to subscription). Domestic institutional subscription (51 issues): \$370; Foreign postage extra: Mexico, Caribbean (surface mail) \$55; other countries (air assist delivery) \$87. First class, air-mail, student, and emeritus rates on request. Canadian rates with GST available upon request, GST #1254 88122. Publications Mail Agreement Number 1069624. Printed in the U.S.A.

Change of address: allow 4 weeks, giving old and new addresses and 8-digit account number. Postmaster: Send change of address to *Science*, P.O. Box 1811, Danbury, CT 06813-1811. Single copy sales: \$9.00 per issue prepaid includes surface postage; bulk rates on request. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that \$9.00 per article is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923. The identification code for *Science* is 0036-8075/01 \$9.00. *Science* is indexed in the *Reader's Guide to Periodical Literature* and in several specialized indexes.

SCIENCE EXPRESS

www.scienceexpress.org

Photoinduction of Fast, Reversible Translational Motion in a Hydrogen-Bonded Molecular Shuttle A. M. Brouwer, C. Frochot, F. G. Gatti, D. A. Leigh, L. Mottier, F. Paolucci, S. Roffia, G. W. H. Wurpel

PERSPECTIVE: A Light-Driven Linear Motor at the Molecular Level J.-P. Sauvage

Light speeds up molecular shuttles to the microsecond time scale.

Turing-Type Patterns on Electrode Surfaces Y.-J. Li, J. Oslnovitch, N. Mazouz, F. Plenge, K. Krischer, G. Ertl

Analogs of Turing patterns turn up at the surfaces of gold electrodes and may be observable in many electrochemical systems.

Length of the Flagellar Hook and the Capacity of the Type III Export Apparatus

S. Makishima, K. Komoriya, S. Yamaguchi, S.-I. Aizawa

The export apparatus apparently acts as a kind of "measuring cup" to define the remarkably uniform size of the hook structure at the base of the bacterial flagellum.

TECHNICAL COMMENTS

Polyploidy and Gender Dimorphism

In a study of the North American plant genus *Lycium*, Miller and Venable (Reports, 29 Sep. 2000, p. 2335) proposed that polyploidy may trigger gender dimorphism "by disrupting self-incompatibility and leading to inbreeding depression." Brunet and Liston argue that the analysis by Miller and Venable "does not support the claimed associations," suggest possible shortfalls in their method for measuring self-compatibility, and hold that showing the importance of the claimed associations in the evolution of gender dimorphism requires a demonstration "that gender dimorphism arises more frequently via this pathway than via other pathways." Miller and Venable cite additional phylogenetic work supporting their analysis and suggest some additional statistical tests for the notion of polyploidy as a trigger for gender dimorphism.

The full text of these comments can be seen at www.sciencemag.org/cgi/content/full/291/5508/1441a

Published by the American Association for the Advancement of Science (AAAS). *Science* serves its readers as a forum for the presentation and discussion of important issues related to the advancement of science, including the presentation of minority or conflicting points of view, rather than by publishing only material on which consensus has been reached. Accordingly, all articles published in *Science*—including editorials, news and comment, and book reviews—are signed and reflect the individual views of the authors and not official points of view adopted by the AAAS or the institutions with which the authors are affiliated.

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objectives are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, to advance education in science, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
