ABSTRACT OF THE DISCLOSURE

The invention provides a process for verifying an on-line registration by telephone. A registrant at least partially completes an on-line registration form at a web-site. During the registration process, the registrant either provides his telephone number, or a verification system telephone number is provided to the registrant. A telephonic connection is established between the registrant and the verification system. A registration code is communicated to the registrant, either through the web-site or via the telephonic connection. The registration code is then input into either the on-line registration form or by telephone into the verification system.

GONEN-46975

WHAT IS CLAIMED IS:

1. A process for verifying an on-line registration, comprising the steps of:

providing a web-site having an on-line registration form to a registrant;

at least partially completing the on-line registration form, including providing a registrant telephone number;

establishing a telephonic connection with the registrant via the registrant telephone number by sending the registrant an electronic message using the registrant telephone number;

communicating a registration code to the registrant; and

inputting the registration code into at least one of the on-line registration form or a telephone verification system.

2. The process of claim 1, wherein the electronic message comprises a short message service (SMS) message received by registrant's telephone.

3. The process of claim 1, including the step of informing the registrant via the web-site that the electronic message is being sent to the registrant via the registrant telephone number.

4. The process of claim 1, wherein the electronic message includes a verification system telephone number for the registrant to call to receive the registration code.

5. The process of claim 4, wherein the registration code is input into the on-line registration form after receiving it from the verification system.

6. The process of claim 1, wherein the communicating step includes the step of communicating the registration code to the registrant

at the web-site, and wherein the electronic message includes a verification system telephone number for the registrant to call to input the registration number.

5   7. The process of claim 6, wherein the registration code is input by telephone using voice or key pad entry.

          8. A process for verifying an on-line registration, comprising the steps of:

10   providing a web-site having an on-line registration form to a registrant;

          at least partially completing the on-line registration form, including providing a registrant telephone number;

          informing the registrant via the web-site that an electronic message

15   is being sent to the registrant via the registrant telephone number;

          establishing a telephonic connection with the registrant via the registrant telephone number by sending the registrant a short message service (SMS) electronic message using the registrant telephone number;

          communicating a registration code to the registrant; and

20   inputting the registration code into at least one of the on-line registration form or a telephone verification system.

          9. The process of claim 8, wherein the electronic message includes a verification system telephone number for the registrant to call to

25   receive the registration code.

          10. The process of claim 9, wherein the registration code is input into the on-line registration form after receiving it from the verification system.

30

          11. The process of claim 8, wherein the communicating step includes the step of communicating the registration code to the registrant at the web-site, and wherein the electronic message includes a verification
