PRELIMINARY AMENDMENT

Sir:

Prior to the examination of this application,
applicants amend the application as follows:

Amendments to the Specification are reflected in the
listing of claims which begins on page 2 of this paper.

Amendments to the Claims are reflected in the listing
of claims which begins on page 3 of this paper.

Remarks/Arguments begin on page 6 of this paper.

Amendments to the Specification

Please replace the paragraph after the title of the specification and starting on line 4, page 1 of the specification with the following paragraph showing amendments:

--CROSS REFERENCE TO RELATED APPLICATION APPLICATIONS

This application is a continuation of United States patent application No. 09/776,267, filed on February 2, 2001, which is based on a United States provisional application Serial No. 60/180,114, filed on February 3, 2000, both of which ~~is~~ are hereby fully incorporated herein by reference.--

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of the Claims

1-16. (cancelled)

17. (new) A method for providing accelerated loading of an operating system comprising:

maintaining a boot data list, wherein at least a portion of boot data is associated to said boot data list;

preloading said at least a portion of boot data into a memory upon initialization of said computer system;

accessing said at least a portion of boot data in a compressed form from said memory;

decompressing said at least a portion of boot data in compressed form accessed from said memory at a rate that increases the effective access rate of said memory; and

utilizing said decompressed at least a portion of boot data in loading said operating system for said computer system.

18. (new) The method of claim 17, wherein said at least a portion of boot data comprises program code associated with an application program.

19. (new) The method of claim 17, wherein said preloading comprises retrieving said at least a portion of boot data from a memory device and storing said retrieved at least a portion of boot data into said memory.

20. (new) The method of claim 17, wherein said preloading is controlled by a data storage controller.

21. (new) The method of claim 17, further comprising updating said boot data list.

22. (new) The method of claim 17, further comprising updating said boot data list by associating additional boot data to said boot data list.

23. (new) The method of claim 17, further comprising updating said boot data list by removing the association of additional boot data from said boot data list.

24. (new) The method of claim 17, further comprising receiving a request for additional boot data not previously associated with said boot data list.

25. (new) The method of claim 17, further comprising:
receiving a request for additional boot data not
previously associated with said boot data list; and
adding to the list any boot data requested by the
computer system not previously stored in the list.

26. (new) The method of claim 17, further comprising
removing the association of additional boot data from said boot
data list not requested by said computer system.

27. (new) The method of claim 17, further comprising
compressing said at least a portion of boot data to provide said
at least a portion of boot data in compressed form.

28. (new) The method of claim 17, further comprising
compressing said at least a portion of boot data to provide said
at least a portion of boot data in compressed form, wherein said
compressing is performed by a data compression engine.

29. (new) The method of claim 17, further comprising
compressing said at least a portion of boot data to provide said
at least a portion of boot data in compressed form, wherein said
compressing is performed by a data compression engine and said
data compression engine performs said decompressing.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
